Editor's Note

With this monograph *A Grammar of Tirukkural* by Dr. A. Dhamotharan we continue our series SOUTH ASIAN STUDIES with another work on linguistics after we had published Dr. Bahadur Singh's study "The Dialect of Delhi" as No. 3 of the same series. This time the language of the well-known Tamil classic has been scrutinized on modern linguistic lines.

Dr. Dhamotharan's work was originally submitted as a Ph. D. thesis to Kerala University in 1966. After assignments for a short period as Lecturer in Tamil in K. M. College, Adirampattinam, and as Lecturer in Linguistics in Annamalai University, Dr. Dhamotharan has been a Reader in Tamil at the South Asia Institute of the University of Heidelberg since July, 1968.

Through this publication we are glad not only to make a valuable work available to interested scholars, but also hope to contribute to Dravidian Studies, which have not found proper attention in traditional indology.

Jürgen Lüdt

Foreword

Many years ago, in 1957, in a paper in which I coined the term Late Old Tamil, and, again, in a subsequent paper entitled “*Ṭṇiyavai nārpātu*” and published in *Archiv Orientalni*, I tried to show that the only solid and honest way how to deal with the long and complicated history of the Tamil language was to prepare linguistic descriptions of the subsequent stages of its development as reflected in a set of representative texts. That, at least, was, no doubt, the first, unavoidable step.

I was happy to see that this request was being fulfilled in the course of the last decade in very numerous single descriptions, performed mostly by young Indian linguists, but, alas, almost inevitably left unpublished, and rotting in the libraries of Indian universities as so many ‘unpublished dissertations’. Not all of these descriptions of which I have seen quite a number were of equal importance and quality.

I am therefore very happy to see that one of them, which has the distinction to belong to the best of them, is destined to be published. Dr. A. Dhamotharan has chosen the text of the *Tirukkural* as the target of his work, and, judging from his enormously valuable book *Tirukkural mēṛkōḷ viḷakkam* (1970), he knows his text better than may be anyone else at present. What is, however, even more important is the fact that Dhamotharan has stuck to one of the most fruitful and productive methods and techniques of linguistic description, based on Kenneth L. Pike’s tagmemic theory which was probably the first of the great contemporary movements in American linguistics to depart from the neopositivistic, post-Bloomfieldian structuralistic descriptivism.

The result is an outstanding work, and I welcome with great intellectual joy the fact that it will not share in the unfortunate fate of those descriptions which are buried, almost forgotten and useless, in the libraries all over India.

Introduction

1.1. *A Grammar of TirukkuRaḷ* is part of my Ph.D. dissertation submitted to the Kerala University, Trivandrum in 1966. The scope of the present study is twofold: firstly, to describe in general the structure of the language of Tirukkural starting from the high-level unit (sentence) and proceeding to the low-level unit (phoneme) of the text and secondly, to test in particular the procedural feasibility of the Tagmemic model by applying it to the grammatical description of the text, Tirukkural. To be more precise, the study begins from sentence and ends with sounds of Tirukkural with the application of Tagmemics.

1.1.1. This model for the grammatical analysis has been expounded and developed by K. L. Pike in his work, *Language in Relation to a Unified Theory of the Structure of Human Behavior* (1954). This work represents the main spring of Tagmemic notions and the theoretical facets of the conceptual framework. The four main characteristics of Pike's approach which are elaborately discussed in his work, *Language ...* are: (1) Language is viewed as behavior, (2) Language is hierarchically ordered, (3) Language consists of emic units and (4) Language is trimodally structured. These characteristics are not independent of each other; they can be discussed only with reference to some of the others. Among the four, as a matter of fact, the last one is an innovation of Pike in his conception of language structure. All the rest have been recognized and accepted already by other linguists in one way or other.

1.1.2.1. **Language Viewed as Behavior:** The consideration of language as a behavioral phenomenon is not a new one among linguists. But Pike has extended the boundary to include more and more features of human behavior by attempting to relate

language behavior to other aspects of human behavior. Hence in Pike's approach language is not a "pure system"; the behavioral aspects come under the consideration of language itself. There is a direct connection between systematic relationships and physical action — those which produce speech on one extreme and meaningful responses to language on the other. This is to say that both phonetics and meaning are considered as part of language. The importance of this in the overall approach may be seen in that the features which distinguish and define all relevant linguistic units have two sorts of characteristics: they are identificational (that is, they have reference to a phonetic base in articulatory behavior directly or indirectly) and they are meaningful (that is, they occupy a significant position in a functioning cultural system)¹. This inclusion of articulatory behavior and response behavior differentiates Pike's approach from other contemporary linguistic works.

1.1.2.2. Language ■ Hierarchically Ordered : In modern structural linguistics, views on language as hierarchically ordered are again not uncommon. However, there are some differences which may be seen in the manner of presentation of the hierarchical organizations in Pike's model. The hierarchical structuring of Pike is different from the unidirectional sequence of linguistic level proposed by most other theoreticians, i.e. the sequence of phonology, morphology, and syntax in which phonology is frequently thought of as being at the bottom of this vertical layering of subsystems, and syntax at the top. Instead, Pike sets up three distinct and equally important hierarchies, the phonological, the lexical and the grammatical. Each begins on the same plane, i.e. with a minimal structural unit, and each reveals an internal succession of larger, more inclusive units. Eventually each of the three distinct hierarchies interlocks with the other two. Within the hierarchies of Pike the units are related to each other not merely in terms of a sequence, but in terms of significant layerings. The larger units are determined partly in terms of the smaller units, while the smaller units occur only in the structurally relevant positions within the larger, more inclusive units in the hierarchy. For example, in

the phonological hierarchy the units posited are phonemes, syllables, phonemic words, and phonemic phrases (the last two sometimes called stress groups and breath groups, respectively). These units occur in precisely this order of 'upward' succession, i.e. the phoneme is the smallest emic unit in the hierarchy, the others are hyper-emic units in the same hierarchy. The syllable, for instance, is determined partly in terms of phonemes, while, on the other hand, the phoneme cannot be adequately determined unless the analyst describes its distribution within the syllable, i.e. the larger, more inclusive unit².

1.1.2.3. Language Consists of Emic Units: Emic-etic distinction in structural linguistics is in no way a novel one. By extending this distinction from phonology to grammatical and lexical structure in the linguistic structure and also to non-verbal behavior Pike adds one more special feature in his theory. For Pike emic units are not physical entities per se, but rather structurally relevant parts of a system or systems. With respect to language, an emic description describes each unit according to its relation to a total structure. Furthermore, all emic units are meaningful, in so far as they are part of a functioning, culturally significant system (see Scott (1965)).

1.1.2.4. Language is Trimodally Structured: This conception of trimodal structuring is central to Pike's theory in which he describes each emic unit according to three modes of complex overlapping components.

1.1.2.4.1. Feature Mode: The feature mode includes the identifying-contrastive features of the unit. These include the features by which a thing is what it is, an identity and the features which contrast it with other units of the system (the same features, but in contrast). The phoneme has its contrastive features; a morpheme is contrasted by its meaning with all other units of meaning; the feature mode of a tagmeme is the functional slot in a frame, including the structural, or grammatical meaning, which is associated with this function-slot.

1.1.2.4.2. Manifestation Mode: The manifestation mode includes the concrete variants that occur. In the phoneme, the manifestation includes the phones which represent the phoneme in a particular utterance; the morpheme, likewise, is manifested by the morphs which occur; the tagmeme is manifested by the morphemes or morpheme sequences — the filler-classes — which fill the functional slot in the construction frame.

1.1.2.4.3. Distribution Mode: The distribution mode is the distribution of the units within utterances, and refers to the total distribution of the unit in a language, as well as its actual occurrence in any particular instance. Phonemes have characteristic distribution, as do morphemes. The tagmeme also, as a slot-class correlative, has a characteristic distribution in the hierarchy of a language with the immediate environment being the construction in which the tagmeme appears³.

1.1.2.5. Summary: To sum up, Pike's model of language design is characterized by the hierarchical ordering of units, the explicit distinction at several points between an emic and an etic approach, the attempt to move in the direction of a unified theory for the analysis of behavioral systems, the trimodal structuring in the description of linguistic units, the positing of units of distributional structure and utilizing the tagmeme both as a unit of description and as a tool of analysis.

1.2. In the exposition as well as the application of Tagmemics several scholars of the Summer Institute of Linguistics have considerably contributed to the original theoretical structure. Specifically Robert E. Longacre has suggested some useful insights within the theoretical model and in methodology. The present dissertation has been heavily influenced by his work *Grammar Discovery Procedures - a Field Manual* (1964)⁴. So the impact of his thinking as I have understood from his works may evidently be seen in each and every page of this work. So let us have a detailed discussion about the analytical procedures set forth by Longacre.

1.2.1. Both Pike and Longacre have suggested a scheme of trimodal linguistic structuring. In this scheme the two basic assumptions are (1) the division of language into phonology, grammar and lexicon and (2) the consideration of linguistic phenomena under three different perspectives, as *particle*, *string* and *field*.

1.2.2. As Longacre (1964) describes, Tagmemic theory assumes that "whatever may be the difficulties in studying and evaluating human behavior in relation to language, behavior is nevertheless more objective and observable than intuition or introspection. We can observe behavior; we can only affirm intuition." The reason for this assumption is that linguistic patterning is related to the patterning of all purposeful behavior.

1.2.2.1. In human behavior the role of patterning is crucial and central. After recognizing however both the facts that language is a human behavior and is the centrality of patterning in human behavior, it is reasonable to require that a linguistic theory gives centrality to linguistic patterns.

1.2.2.2. Then the grammatical description of a given language means the description of the various patterns and pattern points of that language which comprise a system. Tagmemics attempts to present this system as straight as possible. Tagmemics terms the pattern *syntagme* and the pattern point *tagme*.

1.2.3. Further discussion needs some technical definitions of the fundamental concepts of Tagmemics. The four fundamental insights in the grammatical description of Tagmemics, as Longacre (1965) clearly states, are "the correlativity of function and set, the search for constructions of maximum relevance, the emphasis on explicit, systemic hierarchy and the concept of relatedness in logical space (with transformation as only one of the possible parameters which relates constructions)"⁵.

1.2.3.1. **Tagme** : A correlative of function and set formerly known as slot-class. Function refers to the particular role of one

formally distinguishable part of a syntagmeme in relation to other parts of the same construction. Set refers to the manifestation of a function with a set of items and/or sequences. Thus in the verbal clause *tiiyinaal cutṭa puṇ ul aaRum* (fire, by - (which) was burned-sore - inside - will heal — ‘the blister caused by fire will heal inwardly’) there are three functional segments, viz. subject, location and predicate which are manifested by both sequence and item. These three segments in this clause manifest not only the grammatical functions (roles) but relations within the clause.

1.2.3.2. Syntagmeme: An identifying contrastive type on a given level of hierarchical structure, consisting of a string of constituents, e.g. a word syntagmeme, a phrase syntagmeme, a clause syntagmeme, a sentence syntagmeme, etc. More elaborately a syntagmeme is, as defined by Longacre (1965), a functionally contrastive string on a given level and has (1) closure and internal coherence; (2) a minimal structure (a nucleus, at least part of which is obligatory) and usually an expanded structure (the entire nucleus plus the optional periphery); and (3) contrast, variants, and distribution. It may also be characterized by internal layering or grouping and by multiple nesting.

1.2.3.3. Hierarchy: The vertical relationship of units comprises the system of grammatical hierarchy. In general, lower level units build into higher level units. In other words, syntagmemes of one structural level manifest tagmemes of the next higher level, e.g. phrase syntagmemes manifest clause-level tagmemes. Hence the external distribution of units comprises the grammatical hierarchy of systemic levels. In the structure of a given language such a positation of systemic levels is essential in obtaining the constructions of maximum relevance, i.e. syntamemes. However nesting types of constructions are not uncommon. This phenomenon may be termed as (1) Recursive layerings, (2) Back looping and (3) Level skipping.

1.2.3.3.1. Recursive Layerings: It refers to an imbedded structure in which a syntagmeme may manifest as tagmeme of another syntagmeme on the same level, e.g. phrase within a phrase.

1.2.3.3.2. Back Looping: It refers to an imbedded structure in which a syntagmeme of a higher level may manifest a tagmeme of a lower level, e.g. a clause may occur within a phrase.

1.2.3.3.3. Level Skipping: It refers to an imbedded structure in which a syntagmeme of a lower level may manifest a tagmeme of an alternative higher level, e.g. a word may occur in a clause. In the later two phenomena, order can very well be fixed on the basis of the distribution of units such as first-order back-looping, second-order back-looping, first-order level-skipping and second-order level-skipping.

1.2.3.3.4. Matrix: It is a device to present the relations between syntagmemes. As Longacre (1965) describes Matrix is a device whose model is space in n dimensions (uni-dimensional matrices are trivial except in a system of matrices with further dimensions). In grammar this develops the notion of relatedness in logical space by arranging syntagmemes or tagmemes in a system of co-ordinates.

1.2.3.4. In general, all these concepts are correlative. Tagmeme is the correlative of function and set. Tagmeme and syntagmeme are correlative since tagmemes can exist only by virtue of placement in one or more constructions. On the other hand syntagmemes can exist only with their constituents, i.e. tagmemes. So also syntagmemes and systemic levels of grammatical hierarchy are correlative concepts since syntagmeme is functionally a contrastive string on a particular level of grammatical structuring. Finally the hierarchy and matrix are also correlative. In the presentation of field structure of hierarchy they are very useful by presenting clearly the regular hierarchical structuring as well as the apparent exceptions to hierarchy — the characteristics of the structure of a given language.

1.2.3.5. If we admit that the syntagmeme is functionally a contrastive string, then it follows that we have to set up the criteria to distinguish syntagmemes. A corollary of this assumption needs the criteria to distinguish tagmemes. The rule

suggested by Longacre (1964) for distinguishing these units is as follows: the criteria for separating pattern points (tagmemes) are relatively straightforward, the criteria for separating the patterns themselves (syntagmemes) are necessarily more complicated. Thus, any clear difference — including distinctions in linear ordering — can establish a contrast between two tagmemes. But we require more than this to distinguish two syntagmemes: *For two patterns (syntagmemes) to be in contrast they must have more than one structural difference between them; at least one of these differences must involve the nuclei of the syntagmemes.* In practice this amounts to insistence on a two-fold minimal difference at least one of which involves the nuclei.

1.2.3.5.1. Syntagmemic Difference: Longacre (1964) lists the structural differences between syntagmemes as follows: (a) differing linear orderings; (b) differing number of tagmemes; (c) differing syntagmemes manifesting similar but distinct tagmemes; (d) differing emic classes manifesting similar but distinct tagmemes; and (e) differing transform potential (or differing derivations via transform).

1.2.3.5.2. Tagmemic Difference: Again he lists the differences between two tagmemes as follows: (a) distinctive physical positions; (b) difference in obligatory versus optional status; (c) distinctive manifestations in terms of word classes; (d) distinctive manifestations in terms of word types, phrase types, or subordinate clauses; (e) distinctive cross reference of certain nuclear tagmemes to affixes within the verb manifesting predicate; and (f) of distinctive transforms.

1.2.4. The terms nuclei and emic class need some clarifications.

1.2.4.1. Nuclear versus peripheral distinction in the phrase and clause levels parallels the obligatory versus optional distinction in word and sentence levels which are of course useful in the analytical procedure in the search for constructions of maximum relevance. The following criteria can be used to

distinguish the unclear tagmemes suitably for clause level and phrase level tagmemes: (1) obligatory status, (2) cross reference or agreement, (3) manner of occurrence, (4) restriction in distribution or diagnostic features, (5) transformations, and (6) manifesting sets.

1.2.4.2. **Emic Class**: An emic class as described by Longacre (1964) is either a small closed function set (an order of affixes or a group of function particles of the sort posited in Fries' *Structure of English*), or a subdivision of a large and open hyperclass (e.g. a subdivision including some but not all verbs). In the latter case the words grouped as an emic class should be relevant to at least two spots in the grammar - with one spot not transformationally related to the other.

1.2.5. Although one of the assumptions of tagmemics is that units are form-meaning composites, it lies only as the background of the analysis. Obviously it depends entirely on the formal features.

1.2.5.1. In the grammatical description of the Tagmemic model, the conventional formulaic representations are indicated by the dual function-set symbolism. The presentation of linguistic patterns may be represented in a straight forward and summary fashion through this map-like structure of the tagmemic formulae. For simplicity in presenting the formulae, unitary symbols are used here for tagmemes but this does not reflect any change in the function-set correlation.

1.2.5.2. As we have seen in this introduction, Tagmemics is a unique grammatical description in the field of structural linguistics. Its attention to field structure, its explanatory adequacy in taxonomic linguistics and its functionally oriented views distinguish it from other schools. With all these qualities it has gained ground internationally. Extensive application of this system of analysis to actual language data (nearly 260 languages) is going on and the results are being published.⁶ The body of literature about the theoretical implications

and the practical analysis of particular languages is considerable. So this system of grammatical description cannot be underestimated. It has been clearly pointed out by Cook (1964) in these words: "No linguist today can afford to ignore this massive body of material; no course in linguistics can claim to be complete, which does not take tagmemics into consideration."

1.2.5.3. He acknowledges the fact that in the recent works in Tagmemic analysis there is a tendency to incorporate the concept of transforms, rewrite operations and to point out the generative possibilities but he states that it in no way affects the theoretical frame work of Tagmemics but helps the theory function both as taxonomic and generative. This practice can very well be viewed as a reasonable and even predictable development, and that the new tagmemic-transformational model is not just eclectic, but rather represents a reasonable supplementation of Tagmemics with a new transformational apparatus. In the past six years (after I have completed this work) considerable changes have taken place in the Tagmemic theory especially in the application side. These later developments have not been incorporated in this study as the fundamental principles of Tagmemics have not been affected by these later developments.

1.3. **The Text Under Analysis:** Tirukkural, the 'Bible' of the Tamil people, stands as a perennial light and enlightens all mankind through its thought and diction. It deals in extense, with the maxims of human life free from all sorts of dogma. The crowning glory of the early literature of Tamils lies in Tirukkural, on which the entire structure of the Tamil culture and heritage rests. This essence of perfection in Tamil literature is now widely recognized as a gospel of mankind and an inimitable masterpiece of eternal validity. Its intrinsic excellence, noble ideals and the underlying philosophy have been praised as, for example, "the masterpiece of Tamil literature - one of the highest and purest expressions of human thought." This primary source for Tamil philosophy, has been included as one among

the eighteen minor classics (*patin-eṇ kiil-k-kaṇakku*) which are mostly ethical works.

1.3.1. Tirukkural contains 133 chapters. Every chapter consists of 10 couplets and thus we have a total of 2660 lines. It has been divided into three main parts with suitable subheads.

1.3.1.1. The first part is called *ARattu-p-paal* — on righteousness, which consists of 38 chapters dealing with domestic and ascetic life.

1.3.1.2. The second part is called *Poruṭ-paal* — on socio-economics which consists of 70 chapters dealing with the political organizations and social affairs.

1.3.1.3. The third and last part called *Kaamattu-p-paal* — on (sexual) pleasure, which consists of 25 chapters, treats the love affairs of both premarital and marital partners.

1.3.2. The metric form of the verse as the title indicates is *kuRaḷ*, a type of *veṇṇpaa* which consists of two lines in which the first line is composed of four *ciirs* and the second of three *ciirs*⁸. Perhaps the author might have chosen this metre for brevity. But within this narrow limit he has commendably used all sorts of poetic devices. Tirukkural was and still is, the only well-known masterpiece in this type of metre in the field of Tamil literature.

1.3.3. About the author nothing more than his name is known. The age in which he lived is also not definitely known. Although various anecdotes and legends have gathered around Tiruvalluvar, the author of this work, we know nothing about the life of this genius. The age of this monumental work is again still controversial. In general many scholars have considered this work to belong to the post-Sangam age, i.e. the 2nd century A.D. Differences of opinion still exist among scholars in admitting this date⁹.

1.3.4. Tirukkural has been edited by several scholars from the beginning of 19th century A. D. It is said that the first edition was brought out by Ramanuja Kavirayar and Drew; however it is incomplete in that it contains only 63 chapters out of the total 133 chapters. In 1830 Saravanapperumal Aiyar, a student of Kavirayar, published a complete edition with a commentary for the *Tiruvalluvamaalai* which is collection of 55 songs written in praise of Tirukkural by several poets. However, the author has no chance to use an early edition for this analysis. This study is based on the tenth edition of Arumuganavalar who is considered to be one of the best editors of Tamil works¹⁰. But mention must be made of a few other good editions which are as follows:

- Arumuga Navalar (ed.). 1861. *TirukkuRa! Muulamum Parimeelalakar Uraiyum*, Madras.
- Pushparath Chetti (ed.). 1885. *TirukkuRa! Parimeelalakar Urai*, Kalarathnakaram, Madras.
- Murugesu Mudaliar (ed.). 1885. *TirukkuRa! Parimeelalakar Urai*, Madras.
- Vadivelu Chettiar (ed.). 1904. *TirukkuRa! Parimeelalakar Urai*, Madras.
- Sadagoparamanujachari, V. M. (ed.). 1949. *TirukkuRa!*, Madras.
- Dandapani Desikar (ed.). 1950. *TirukkuRa! Uraivalam* (Vol. I : 1950, Vol. II : 1951, Vol. III : 1952) Dharmapuram.
- Pattuswami Othuvai (ed.). 1960. *TirukkuRa! Uraikkottu* (Vol. I : 1960, Vol. II : 1960, Vol. III : 1961), Tiruppananthai.
- Jagannathan, K. V. (ed.). 1963. *TirukkuRa! Aaraayaccippattippu*, Sri Ramakrishna Mission Vidyalayam, Coimbatore.

1.3.5. A large number of critical commentaries of Tamil as well as non-Tamil scholars are available for this text. The tradition talks about ten commentators who had interpreted this text before the 13th century A.D. The commentary of Parimelalakar who is considered to be the last among the ten commentators and perhaps the best among them has been published in full by several scholars. The commentary of Manakkudavar was first published by Ponnuswamy Nattar in 1925. Following this

it was again published by V. O. Chidambaram Pillai in 1917 and by Siva Sampasiva Sarma in 1958. The commentaries of Kalingar and Paripperumal were first published by T. P. Palaniappa Pillai in the year 1945. The other commentaries have not yet been published except as extracts, for instance, some stray portions of the commentaries of Paruti, Tamattar, Naccar and Tarumar were published by Dhandapani Desikar (1950). Again a collection of commentaries with an English translation of the text was published by Pattusami Othuvar in the year 1961. An old commentary by an unknown author was also recently published by the authorities of the Swaminathaiyer Library in 1961. Besides the old commentators, several scholars have attempted to annotate this work. Mention may be made of the commentaries of the following authors:

- Kaviraja Pandithar. 1949. *TirukkuRaḷ*, Sadhu Press, Madras.
 Kulanthai. 1961. *TirukkuRaḷ*, Ilango Puthakasalai, Erode.
 Chidambaranar, Sami. 1959. *TirukkuRaḷ Poruḷ Viḷakkam*, Star Publication, Madras.
 Ramalingam Pillai, V. 1954. *TirukkuRaḷ*, Inpa Nilaiyam, Madras.
 Varadarajan, G. 1954. *TirukkuRaḷ Urai Viḷakkam*, Trichy.
 Varadarajan, M. 1959. *TirukkuRaḷ Teḷivurai*, SISSWPS, Madras.

1.3.6. Translation of this text was initiated by the Western scholars in the beginning of the 18th century A.D.¹¹ The first two parts of the text were first translated into Latin by Beschi in the year 1730. When Ariel published his French translation of the third part of this text in 1848, he referred to another French translation attempted by some author by about 1767 A.D. In the year 1794, Kindersely translated some of the couplets into English. A complete translation in English was brought out only in the second half of the 19th century. Among the English translations the following authors' deserve mention:

- Aiyer, V. V. S.
 Balasubramaniam, K. M.
 Chakravarthy, A.
 Dikshitar, V. R. R.

Drew, W. H. and Lazarus, John
 Pope, G. U.
 Popley, H. A.

Besides English it has been translated into other foreign languages such as Chinese, French, German, Latin, Malay, Russian and almost all the Indian languages.¹²

1.4. And now there remains the pleasant duty of recording my gratitude to the individuals and institutions who have helped me in connection with this work. In the first place I wish to express my indebtedness to my esteemed teacher Prof. Dr. V. I. Subramoniam who taught me the a-b-c of linguistics, supervised my work patiently and extended me every possible help and encouragement.

1.4.1. I must express my sincere gratefulness to the University Grants Commission, New Delhi for the award of a fellowship from 1962 to 1966; to the authorities of the Kerala University, Trivandrum for having offered me facilities for pursuing my research there; to the Summer Institute of Linguistics, Santa Ana, U. S. A., for having provided me with a huge amount of literature on Tagmemics and to the South Asia Institute, University of Heidelberg, Heidelberg, for financing the publication of this work.

1.4.2. Further I am deeply indebted to Prof. K. L. Pike, Prof. R. E. Longacre, Prof. H. Berger, Prof. S. Agesthialingom, Prof. K. Meenakhisundaram, Dr. RM. Sundaram, Dr. P. R. Subramanian, Dr. R. Panneerselvam, Thiru. M. Sundaramahalingam, Thiru. P. Nedumaran and the late Prof. A. C. Chettiar who have kindly helped me at one stage or another in my endeavour.

1.4.3. I am grateful to Dr. J. Lütt, the representative, South Asia Institute, University of Heidelberg, Delhi Branch, India for including this volume in the *South Asian Studies* series. My heartiest thanks are due to Prof. Dr. K. Zvelebil who has kindly accepted to write a foreword to this monograph.

1.4.4. I should also thank Thiru. S. Subramoniam who typed the original material neatly and Messrs. Sivakami Printers who have printed this in an attractive manner.

1.4.5. In conclusion I wish to add a word of appreciation to my wife Sinnayal who gave me not only her constant support, but also sustained the responsibility at home enabling me to complete my research fruitfully. I need not add that any shortcomings and errors are, of course, to be laid at my door.

phonetic symbols in phonemics
- Non-occurring form
- + Unless otherwise stated it indicates only addition
- <= "is derived from"
- => "is transformed to"
- Used to mean changing as
- { } Used to mean that the items listed within these
braces are in complementary distribution
- ϕ Zero

Sentence level syntagmemes

2.1.1.0. Sentences are strings of tagmemes which are manifested by sets from any level of the grammatical hierarchy.

2.1.1.1. As Longacre (1964) has defined, the sentence is "a class of syntagmemes of a hierarchical order ranking above such syntagmemes as the clause and below such syntagmemes as the paragraph and discourse. It may consist of a single clause, of a patterned combination of clauses, or of a clause fragment (usually of phrasal structure and often dependent in sense on other sentences in the linguistic context or on context of situation). It tends to be characterized by more closure and grammatical independence than the clause, as evidenced by introducing and closing particles as well as by features of intonation and pause".

2.1.1.2. In general sentences manifest tagmemes in higher level, i.e. paragraph or discourse. Any sentence may be formalized by this formula $\pm Peri + Nuc$, in which $\pm Peri$ refers to optional peripheral and $+ Nuc$ refers to obligatory nuclear tagmemes. The following chart will represent the sentence types.

CHART 1

Tagmemic Notation Paradigm of Sentence Types

Particle Sentence	$\pm \textit{Peri} + \textit{PtB}$
Simple Sentence	$\pm \textit{Peri} + \textit{CLB}$
Quote Sentence	$\pm \textit{Peri} + \textit{Q} + \textit{QF}$
Comparative Sentence	$\pm \textit{Peri} + \textit{T}_y \pm \textit{Com} + \textit{AT}_y$
Condition Sentence	$\pm \textit{Peri} + \textit{Pro} + \textit{Hy} + \textit{Apo}$
Sequence Sentence	$\pm \textit{Peri} + \textit{MS}' \pm \dots \pm (+\textit{MS}^n)$ $+ \textit{MS}^{n+1}$
Series Sequence Sentence	$\pm \textit{Peri} + \textit{SS}' \pm \textit{C} \pm \dots \pm$ $(+ \textit{SS}^n \pm \textit{C}^n) + \textit{SS}^{n+1}$

2.1.2.0. Peripheral tagmemes are common to all the sentence types. They are manifested either by vocatives or exclamations or the expletive clitic / *maRRu* /. E.g.

*karum maṇiyil paavaay! nii pootaay.*¹³ (1123)

‘O! Image in the blue pupils! you go!’

ooo! initee. emakku i nooy ceyta kaṇ
taam itan paṭṭatu (1176)

‘Oh! It is nice that the very eyes that have created this passion in me are themselves suffering from it.’

maRRu avar col keeṭṭal inpam. cevikku (65)

‘And to hear the words of the children is a pleasure for the ears.’

2.1.2.1. Particle sentence may be formalized by the formula \pm *Peri* + *PtB* in which \pm *Peri* refers to optional periphery and + *PtB* refers to obligatory particle base tagmeme.

PtB is manifested by something less than a clause, i.e. without a predicate, but occurs with sentence final intonation. E.g.

oRuttaarkku oru naalai inpam. (156)

‘The pleasure lasts one day for the resensor.’

celvattu! celvam cevi+ celvam. (411)

‘The best among the wealths is the wealth acquired through listening’.

2.1.2.2. Simple sentence is formalized by the formula \pm *Peri* + *CLB* in which + *CLB* refers to obligatory clausal base tagmeme.

CLB is manifested by any one of the clauses. E.g.

ooo! initee. emakku i nooy ceyta kaṇ
CLB

taaam itan paṭṭatu (1176)

CLB

‘Begetting good children is its (family life’s) good ornament.’

CLB

'Convey your quick return to those who will survive.'

2.1.2.3. Quote sentence may be formalized by the formula $\pm Peri + Q + QF$ in which $+Q$ refers to obligatory quote tagmeme and $+QF$ refers to obligatory quotation formula tagmeme.

Q tagmeme may be manifested by any unit of any one of the levels, i.e. it may be either a root in the lower level or a sentence in the higher level.

The *QF* is manifested by a clause containing the verb stem / *en-* / 'say' or 'think'. E.g.

$$\frac{mankalam}{O} \quad \frac{enpa \quad manai \quad maatci}{OF} \quad (60)$$

'It is said that the eminence of the wife is the excellence.'

$$\frac{\text{man uyir oompi arul aalvaarkku il enpa.}}{Q \quad QF}$$

$$\text{tan uyir amcum vinai} \quad (244)$$

'There is no dreadful act for him who cares for all beings and exercises grace'.

$$\frac{\text{porul} \quad \text{niimki} + \text{poccaamtaar}}{Q} \quad \frac{\text{enpar.} \quad \text{arul} \quad \text{niimki}}{QF}$$

$$\text{al} \quad \text{avai} \quad \text{ceytu} \quad \text{olukuvhaar} \quad (246)$$

‘Those who practice evil ways without grace will be said to have forgotten to do the verity.

Hy may be manifested either by *|aayin|* or *|enin|* or *|eel|* 'if'. E.g.

$$\begin{array}{c} \text{ciRappoṭu puucanai cellaatu. vaanam} \\ \text{Apo} \\ \text{vaRakkum eel vaanoorkkum iinṭu} \\ \text{Pro Hy} \end{array} \quad (18)$$

'If the sky becomes dry, there won't be any worship with due reverence even for the celestials.'

$$\begin{array}{c} \text{manai maaṭci illaaḷkaṇ il aayin vaaḷkkai} \\ \text{Pro Hy} \\ \text{enai maaṭcittu aayinum il} \\ \text{Apo} \end{array} \quad (52)$$

'If the family decorum is nil in the wife, then the family life is null and void, however dignified it may be in other respects'.

$$\begin{array}{c} \text{taanam tavam iranṭum taamkaa. viyan ulakam} \\ \text{Apo} \\ \text{vaanam vaḷamkaatu enin} \\ \text{Pro Hy} \end{array} \quad (19)$$

'Both charity and penance won't prevail in the wide world, if it doesn't rain'.

2.1.2.6. Sequence sentence may be formalized by the formula $\pm \text{Peri} + \text{MS}' \pm \dots \pm (+ \text{MS}^n) + \text{MS}^{n+1}$ in which $+ \text{MS}'$ refers to obligatory member of sequence sentence.

The MS' and MS^n tagmemes may be manifested by the subordinate infinitive clauses.

The MS^{n+1} tagmeme is manifested by ■ clause. The superscript n indicates that the given tagmeme may occur an indefinite number of times in a given sentence. E.g.

katam kaattu kaRRu aṭamkal aaRRuvaan cevvi
aRam paarkkum. aaRRin nuḷaimtu (130)

MS^{n+1}

MS'

‘Virtue itself will join the path of one who guards anger after having learned and submitted.’

naṭuvu inRi nan poruḷ vevkin kuṭi ponRi +
MS' MS''
kuRRamum aamkee tarum. (171)

MS^{n+1}

‘Inequitable coveting of wealth results in both the ruin of the family and blemish.’

poruḷ keṭuttu + poy meeRkoḷiii aruḷ keṭuttu
MS' MS'' MS'''
allal uḷappikkum. cuutu (938)
 MS^{n+1}

‘Gambling will make a man suffer from the grief after destroying the wealth, making him undertake falsehood and destroying grace.’

2.1.2.7. Series sequence sentence may be formalized by the formula $\pm Peri + SS' \pm C \pm \dots \pm (+ SS^n \pm C^n) + SS^{n+1}$ in which $+ SS' + SS^n$ refers to series sequence tagmemes and $\pm C$ refers to optional connector tagmeme.

$SS' SS^n$ may be manifested either by a clause or a sentence.

C may be manifested by the connectors $|aa|$ or $|aaka|$ or $|aay|$. E.g.

tunnā + tuRamtaarai nemcattu uṭaiyeem aa
SS' C'
innum ilattum kavin (1250)
 SS^{n+1}

‘Having kept my beloved in my heart who has abandoned me, I will lose surely even my innate beauty’.

iḷaitu aaka muḷ maram kolka. (879)

SS' C' SSⁿ⁺¹

‘Let one fell the thorny tree while it is a sapling.’

ellaa poruḷum uḷaittu aay iḷattu utavum

SS' C'

nal aal uḷaiyatu. aran

(746)

SSⁿ⁺¹

‘That which possesses, after having all provisions, loyal heroes who will help in destruction, is the fortress.’

2.1.3.0. Syntagmemic distinction: The identifying - contrastive features which syntagmemically distinguish one sentence type from the other are discussed here.

2.1.3.1. Particle sentence versus Simple sentence: The identifying-contrastive features which distinguish Particle sentence from Simple sentence are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinctive derivation.

Particle sentence is distinct from Quote sentence by these structural features: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes, i.e. the manifesting set of items of the quote tagmeme and particle base tagmeme are different.

By the same structural differences Simple sentence may also be differentiated from Quote sentence.

Particle sentence is distinct from all the other sentences by this criterion: a difference of two in the number of obligatory and optional tagmemes.

By the same structural difference Simple sentence is distinct from all the other sentences.

2.1.3.2. *Quote versus other sentences*: Quote sentence is differentiated from Comparative sentence by these features: (1) ■ difference in the count of the obligatory, tagmemes and (2) a difference in manifesting similar but distinct tagmemes. i.e. quote tagmeme is distinct from all the other tagmemes in manifestation.

By the same structural differences Quote sentence is distinct from all the other sentences.

2.1.3.3. *Comparative versus other sentences*: The structural features which syntagmemically distinguish Comparative sentence from Condition sentence are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes, i.e. the *Com* and *Hy* tagmemes are different in their manifestation. A further difference can also be seen in the fact that the comparative sentence may be transformed to condition sentence by deleting the optional *Com* tagmeme and interposing the obligatory *Hy* tagmeme.

Comparative sentence is distinct from the Sequence sentences by this criterion: ■ difference of two in the number of obligatory tagmemes in these two varieties of sentences, i.e. in the sequence sentences the tagmemes MS^n and SS^n should also be considered obligatory tagmemes since the parallel MS' and SS' tagmemes are obligatory.

2.1.3.4. *Sequence vs. Series Sequence sentences*: The structural features which distinguish these two sentence types are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in the absence versus presence of the connector tagmeme.

2.1.4.0. **Allosyntagmas :**

2.1.4.1. Interrogative sentences are treated as allosyntagmas of the corresponding sentence types. They are derived from the sentence types by employing the interrogative particle or the clitic. E.g.

tan kuRRam niikki + piRar kuRRam kaan̄kiRpin
en kuRRam aakum? iRaikku (436)

‘After eschewing his faults, if a king looks at the faults of others what fault can be attributed to him?’

anpiRkum un̄too aṭaikkum taal? (71)
 ‘Is there a bolt to lock affection too?’

Clause Level Syntagmemes

2.2.0.0. In the grammatical hierarchy clause level is neither at the top nor at the bottom; but the tagmeme concept may easily be seen in this level. From this level, analysis can be done both down and up in the grammatical hierarchy.

2.2.0.1. As Longacre (1964) has defined, clause is "a class of syntagmemes of a median hierarchical order ranking above such syntagmemes as the phrase and word and below such syntagmemes as the sentence and discourse."

A clause is any string of tagmemes which contains one and only one predicate or its equivalent and a subject among the constituent tagmemes of the string, and whose tagmemes may be expressed by free forms or the subject may be bound to the predicate. Hence clauses are identified by the presence of ■ predicate and ■ subject tagmeme. Clause syntagmemes typically but not always manifest functions on the sentence level.

2.2.0.2. Clause level tagmemes which consist of function - set correlations, are divided into two as nuclear and peripheral. The peripheral tagmemes are fairly common from one to another clause types but the nuclear tagmemes have distinctive features. The indicative clauses are described in detail and the imperative and the subordinate clause types are described as transforms of the corresponding indicative clause types. The clause types are presented in the accompanying chart.

CHART 2

Clause Types

		<i>Indicative</i>	<i>Subordinate</i>	<i>Imperative</i>
<i>Verbal</i>	Descriptive	+	+	
	Intransitive	+	+	+
	Transitive	+	+	+
	Ditransitive	+	+	+
<i>Nominal</i>	Equative	+		
	Possessive	+		

2.2.1.0. A composite formula for any clause type may be given as $\pm Peri + Nuc$ in which $\pm Peri$ refers to the peripheral tagmemes and $+Nuc$ refers to the nuclear tagmemes of the clause types.

2.2.1.1. Peripheral tagmemes are optional and are mostly the same in all types except where a restriction is mentioned under a particular clause type. These peripheral tagmemes are: Locational-Temporal (LT), Benefactive Object (BO), Object₁ (O₁), Manner (M), Instrumental (I), Directional (D) and Sociative (So). The nuclear tagmemes are: Subject (S), Subject₁ (S₁), Object (O), Indirect Object (IO) and Predicate (P) tagmemes. Linear ordering of tagmemes is free except in the order of the directional tagmeme which occurs in first orbit to the predicate tagmeme. Only the preferential order is given in the formulae.

2.2.1.2. Since the peripheral tagmemes occur commonly in various clause types they are summarised at first. Examples are taken from various clause types.

2.2.1.2.1. Locational-Temporal tagmeme may be manifested either by a noun phrase or a clause or a sentence with or without locational case sign. *LT* may occur twice in a clause. E.g.

neṭum punaluḷ vellum. mutalai (495)
LT

‘In deep water the crocodile will triumph.’

poruḷ peṇṭir poymmai muyakkam iruṭṭu aRaiyil
LT (913)

‘The false embrace of the covetous woman resembles the embrace of a strange corpse in a dungeon.’

aRan kaṭai ninRaaruḷ ellaam piRan kaṭai
LT

ninRaarin peetaiyaar il. (142)

‘Among those who have severed from virtue, there is no greater fool than one who stood at the back door of another.’

piRan poruḷaal peṭṭu oḷukum peetaimai ṇaalattu
aRam poruḷ kaṇṭaarkaṇ il. (141)
LT

‘The folly of coveting another’s wife is not found in one who has known virtue and righteousness.’

aruḷ karuti anpu uṭaiyar aatal poruḷ karuti+
poccaappu+ paarppaarkaṇ il (285)
LT

‘Desiring kindness and attaining affection are not for those who look for the unguarded hour.’

2.2.1.2.2. Benefactive Object tagmeme may be manifested either by a noun phrase or a clause or a sentence with post-posed dative case sign. E.g.

anpiRkum uṇṭoo? aṭaikkum taal (71)
BO

‘Is there a bolt to lock affection too?’

ceyyaamal ceyta utavikku vaiyakamum

BO

vaanakamum aaRRal aritu (101)

‘Even the earth and the heaven cannot recompense for the obligation that is done without being obliged first.’

aru! ceermta nemcinaarkku illai. (243)

BO

‘(It) is not for those who have a gracious heart’.

allal aru! aa!vaarkku illai. (245)

BO

‘Vexation is not for the gracious.’

aiyattin niimki+ telimtaarkku vaiyattin

BO

vaanam naṇaiyatu ṭaittu (353)

‘To those who have freed from all doubts and realized the verity, heaven is nearer than this world.’

2.2.1.2.3. Object₁ tagmeme which occurs only in the descriptive (2.2.2.1.) and possessive (2.2.2.6.) clauses, may be manifested either by a noun phrase or a clause with or without an accusative case sign. E.g.

anpu uṭaiyaar (72)

O₁

‘Those who have affection.’

kai aRiyaamai uṭaittee. poru! koṭuttu

O₁

mey ariyaamai koḷal (925)

‘To buy unconsciousness by giving money is possessing ignorance.’

uru! perum teerkku

O₁

accu aaṇi annaar uṭaittu. (667)

‘There are men who resemble the axle-pin for a mighty rolling chariot.’

2.2.1.2.4. Manner tagmeme may be manifested either by a noun phrase or a clause or a sentence with postposed comparative case sign. E.g.

malarinum mellitu. kaamam (1289)

M

‘Love is more delicate than a flower.’

taam viiṭṭaavar men tooṭṭu tuyilin initukol? (1103)

M

‘Is (it) sweeter than reclining on the tender arms of the beloved?’

payan ila pallaar mun collal nayan ila
naṭṭaarkaṇ ceytalin tiitu. (192)

M

‘The frivolous talk before many is worse than the unjust acts done to the friends.’

naaṭṭaatu naṭṭalin keepu illai. (791)

M

‘Nothing is more harmful than making friendship without thinking twice.’

2.2.1.2.5. Instrumental tagmeme may be manifested either by a noun phrase or a clause with or without instrumental case sign. *I* tagmeme may occur twice in a clause. E.g.

itanai itanaal ivan muṭikkum (517)

I

‘Such and such a man will do such and such a thing in such and such a manner.’

viṭṭai takaiyaan veeṇṭi iruppar. (804)

I

‘Because of the desirability the wise will remain.’

oḷukkam viṭṭupam taralaan oḷukkam

I

uyirinum oompappaṭum. (131)

‘As good conduct brings forth a good name it should be cared for better than one’s life.’

uRu tooRu uyir taḷirppa+ tiṇṭalaal peetaikku

I_1

amiḷtin iyanRana. too! (1106)

I_2

‘The shoulders are made of ambrosia for this fair one because whenever I embrace they touch me so as to stir my life.’

2.2.1.2.6. Directional tagmeme may be manifested by a noun phrase with or without ablative case sign. E.g.

nilaiyin tiriyaatu (124)

D

‘Without deviating from (his) state’

tuRaivan tuRamtamai tuuRRaakol? mun kai

D

iRai iRavaa ninRa vaḷai (1157)

‘Will not the bracelets themselves which have slipped from my wrists tom tom the separation of my lord?’

2.2.1.2.7. Sociative tagmeme may be manifested either by a noun phrase or a clause or a sentence with postposed sociative case sign. E.g.

kaṭaaa uruwoṭu kaṇ amcaatu (585)

So

‘Without fearing but with an unsuspecting appearance’

aruḷoṭum anpoṭum vaaraa (755)

So

‘(Which) has not come with grace and kindness’

civikai poRuttaanoṭu uurmtaan (37)

So

‘The one in palanquin with the one who bears it’

uṇṭal uṇamka viṭuvaarooṭu en nemcam

So

kuṇṭuveem enpatu avaa (1310)

‘While I am paining in bouderie, the thinking of my heart ‘we shall unite’ with the one who allows me to remain alone, is sheer wish.’

2.2.2.0. The peripheral tagmemes occur less frequently than the nuclear tagmemes. However all the peripheral tagmemes do not occur in a given clause type. Clauses of one and two peripheral tagmemes are common. Verbal clauses have concord. But concord is optional for equative clauses.

2.2.2.1. Descriptive clause is formalized by the formula $\pm Peri - D + [\pm S + Pd]$ in which $\pm Peri - D$ refers to optional periphery minus *D* tagmeme, *S* refers to subject, and *Pd* refers to descriptive predicate. E.g.

veeṇṭatal veeṇṭaamai ilaan aṭi ceermṭaarkku

BO

yaṇṭum iṭumpai ila. (4)

LT S Pd

‘There is no evil at all for those who have surrendered at the feet of Him who doesn’t have likes and dislikes.’

malarinum mellitu. kaamam (1289)

M Pd S

‘Loye is more delicate than the flower.’

Subject tagmeme may be manifested either by a noun phrase or a clause or a sentence. E.g.

piRan porulaal peṭṭu olukum peetaimai ṇaalattu

S

aRam poruḷ kaṇṭaarkaṇ il. (141)

‘The folly coveting another’s wife is not found in one who has known righteousness and wealth.’

kaanam muyal eyta ampinil - yaanai
pilaitta veel eemtal initu. (772)
 S

‘It is pleasant to hold the lance that has missed the elephant than the arrow that has hit the hare in the forest.’

pakai akattu+ caavaar eliyar. (723)
 S

‘Those who die amidst the enemies are ordinary people.’

unnaatu nooRpaar periyar. (160)
 S

‘Those who perform penance by fasting are great.’

Descriptive predicate (*Pd*) is manifested by a descriptive verb phrase. E.g.

malarinum mellitu. kaamam (1289)
Pd

‘Love is more delicate than the flower.’

2.2.2.2. Intransitive clause is formalized by the formula $\pm Peri + [\pm S + Pi]$ in which $\pm Peri$ refers to optional periphery and $+ Pi$ refers to obligatory intransitive predicate. E.g.

alukkaaRu utaiyaarkku atu caalum (165)
 B O

‘The envy of the envious is enough (to harm them).’

veeloṭu ninRaam (552)
 So

‘The one who stands with a lance.’

puRam tuymai niiraan amaiyum. (298)
 I

‘The purity of the surface of the body is obtained with water.’

olukkattin olkaar. uravoor (136)
 D

‘The firm minded will never swear from conduct.’

Subject tagmeme may be manifested by the same set of items that manifests *S* in descriptive clause. E.g.

itan il paruvattum oppuraviRku olkaar.
kaṭan aRi kaaṭci avar
S (218)

‘The wise who know their duty will not pine for civility even without means.’

olukkam uṭaiya avarkku ollaavee. tiiya
vaṭukkiyum vaayaal colal
S (139)

‘It is impossible to utter evil words for a man of conduct even forgetfully.’

olukkattin olkaar. uravoor
S (136)

‘The great ones will not deviate from good conduct.’

uṭutu uṇṭu vaalvaaree vaalvaar.
S (1033)

‘Only those who till the earth and enjoy the fruits are considered as living.’

Intransitive predicate (P_1) tagmeme is manifested by an intransitive verb phrase. E.g.

iṭan il paruvattum oppuraviRku olkaar.
P₁
kaṭan aRi kaaṭci avar (218)

‘The wise who know their duty will not pine for civility even without means.’

2.2.2.3. Transitive clause is formalized by the formula $\pm Peri + [\pm S \pm O + Ptr]$ in which $\pm O$ refers to optional object tagmeme and $+ Ptr$ refers to obligatory transitive predicate tagmeme. E.g.

eḷumai eḷu piRappum uḷḷuvar. tamkaṇ
 LT Ptr
viḷumam tuṭaitta avar naṭpu
 O

(107)

‘People will remember in all the seven births the friendship of those who have removed their misery.’

Subject tagmeme may be manifested by the same set of items that manifests ‘S in descriptive clause. E.g.

poruḷ poruḷaar pul nalam tooyaar. aruḷ poruḷ
aayum aRivin avar
 S

(914)

‘The wise who care about wealth coupled with grace will never taste the vile pleasure of the wealth-loving women.’

cevi uṇavin keeḷvi uṭaiyaar avi uṇavin
 S
aanRaarooṇu oppar. nilattu

(413)

‘Those who obtain listening, the food of the ear, in this world are equal to the celestials who receive oblation.’

pukaḷ paṭa vaalaataar tam noovaar tammai
 S
ikaḷvaarai noova atu evan.

(237)

‘Why do the worthless people suffer the revilers, without blaming themselves.’

Object tagmeme may be manifested either by a noun phrase or a clause or a sentence with or without postposed accusative case sign. E.g.

poruḷ poruḷaar pul nalam tooyaar. aruḷ poruḷ
 O
aayum aRivin avar

(914)

‘The wise who care about wealth coupled with grace will never taste the vile pleasure of the wealth-loving women.’

piRan porulai + ka'lattaal kalveem (282)

O

'I will steal the property of another.'

mikutiyaan mikka avai ceytaarai + taam tam

O

takutiyaan venRu viṭal. (158)

'One should win by patience those who have done excess by pride.'

inpattuḷ inpam vilaiyaataan (629)

O

'He who never desires the pleasure of pleasures.'

Transitive predicate (*Ptr*) tagmeme is manifested by a transitive verb phrase. E.g.

ceyirin talaippirimta kaaṭciyaar uṇṇaar.

Ptr

uyirin talaippirimta uun (258)

'Those who have vision which is free from fault, do not eat flesh obtained from a creature.'

2.2.2.4. Ditransitive clause is formalized by the formula $\pm Peri - BO + [\pm S \pm O \pm IO + Ptr_2]$ in which $\pm Peri - BO$ refers to periphery minus *BO* tagmeme, $\pm IO$ refers to optional indirect object and $+Ptr_2$ refers to obligatory ditransitive predicate. E.g.

arum payan aayum aRivinaar collaar

S

Ptr₂

perum payan illaata col (198)

O

'The wise who seek worthiness will never utter vain words.'

tavattoṭu taanam ceyvaar (295)

So

O

Ptr₂

'He who performs charity in addition to penance'

Subject tagmeme may be manifested by the same set of items that manifests subject in the descriptive clause. E.g.

anpu iinum. aarvam uṭaimai

(74)

'Affection will yield desirability.'

ciRumaiyu! niimkiya in col maRumaiyum

S

immaiym inpam tarum. (98)

‘Sweet words devoid of meanness will yield pleasure both here and hereafter.’

tunai nalam aakkam taruum. (651)

S

‘The efficacy of alliance will yield prosperity.’

arum payan aayum aRivinaar collaar

S

perum payan illaata col (198)

‘The wise who seek worthiness will never utter vain words.’

tavam ceyvaar tam karumam ceyvaar. (266)

S

‘Those who perform penance are considered as those who perform their duty.’

Object tagmeme may be manifested by the same set of items that manifests *O* in transitive clause. E.g.

tavam ceyvaar tam karumam ceyvaar. (266)

S

O

Ptr₂

‘Those who perform penance are considered as those who perform their duty.’

arum payan aayum aRivinaar collaar.

perum payan illaata col

O

(198)

‘The wise who seek worthiness will never utter vain words.’

kaḷavinkaṇ kanRiya kaatal viḷaivinkaṇ

viiyaa viḷumam tarum.

(284)

O

‘The thirst to defraud others will lead to endless sufferings.’

inpattu! inpam payakkum.

(854)

O

‘(It) will yield the greatest pleasure.’

Indirect object tagmeme may be manifested either by a noun phrase or a clause or a sentence with postposed dative case sign. E.g.

pacamta en paṇpu yaarkku uraikkoo? (1181)
IO

‘To whom shall I speak of the nature of this pallor?’

*iruḷ niimki inpam payakkum. maruḷ niimki
maacu aRu kaatci avarkku* (352)
IO

‘Darkness disappears and bliss results for those who are free from delusion and have the true vision.’

*naaṇ ennum nallaaḷ puRam koṭukkum. kaḷ ennum
peeṇaa+ perum kuRRattaarkku* (924)
IO

‘She who possesses the fair mind of modesty will turn her back to those who have the great deleterious crime of drink.’

uRaaarkku uRu nooy uraippaay. (1200)
IO

‘You will communicate the grief to the one who doesn’t favour’

ceyyaamal ceRRaarkkum innaata ceyta pin (313)
IO

‘When injury was done even to those who have injured unreasonably’

Ditransitive predicate (Ptr_2) tagmeme is manifested by a ditransitive verb phrase. E.g.

tavam ceyvaar tam karumam ceyyaavar (266)
 Ptr_2

‘Those who perform penance are considered as those who perform their duty.’

2.2.2.5. Equative clause is formalized by the formula $\pm Peri - ISDM + [+S_1 + Pn]$ in which $\pm Peri - ISDM$ refers to optional periphery minus *ISD* and *M* tagmemes, $+S_1$ refers to obligatory subject₁ tagmeme and $+Pn$ refers to obligatory nominal predicate. E.g.

$$\begin{array}{ccc} \underline{aRRam} & \underline{maRaittaloo} & \underline{pul} \quad \underline{aRivu.} \quad \underline{tam} \quad \underline{vayin} \\ S_1 & & Pn \\ \underline{kuRRam} & \underline{maRaiyaa} & \underline{va\dot{i}} \\ LT & & \end{array} \quad (846)$$

‘While one’s faults don’t disappear, to cover up one’s nudity is conceited vanity.’

Subject (S_1) tagmeme may be manifested either by a noun phrase or a verbal noun clause or a particle sentence. E.g.

$$\begin{array}{ccc} \underline{oru} & \underline{nookku} & nooy \quad nookku \\ S_1 & & \end{array} \quad (1091)$$

‘One look is tormenting look.’

$$\begin{array}{ccc} \underline{manam} & \underline{nalām} & man \quad uyirkku \quad aakkam. \\ S_1 & & \end{array} \quad (457)$$

‘Goodness of heart is the wealth for all the human beings.’

$$\begin{array}{ccc} \underline{makka\dot{l}} & \underline{mey} & \underline{tiintal} \quad u\dot{t}aRku \quad inpam. \\ S_1 & & \end{array} \quad (65)$$

‘The sensation of one’s children touching one’s body is a pleasure to the body.’

$$\begin{array}{ccc} \underline{celvattul} & \underline{celvam} & cevi + celvam \\ S_1 & & \end{array} \quad (411)$$

‘Wealth among wealths is the wealth acquired by listening.’

Nominal predicate (Pn) tagmeme, may be manifested either by a noun phrase or by a particle sentence. E.g.

$$\begin{array}{ccc} aRivu & \underline{aRRam} & \underline{kaakkum} \quad \underline{karuvi.} \\ & Pn & \end{array} \quad (421)$$

‘Knowledge is an armour to ward off destruction.’

$$\text{celvattu! celvam } \underline{\text{cevi} + \text{celvam.}} \quad (411)$$

Pn

‘Wealth among wealths is the wealth acquired by listening.’

$$\text{aru! celvam } \underline{\text{celvattu! celvam.}} \quad (241)$$

Pn

‘The wealth of grace is the greatest wealth.’

2.2.2.6. Possessive clause is formalized by the formula $\pm \text{Peri} - D + [\pm S + Pp]$ in which $\pm \text{Peri} - D$ refers to optional periphery minus *D* tagmeme and $+Pp$ refers to obligatory possessive predicate. Equative clause can be transformed to a possessive clause by adding the person number or person number / gender markers to the *Pn*.

$$S_1 + Pn - png \Rightarrow \text{Pos CL}$$

$$\begin{array}{ccc} \underline{\text{anpin}} & \underline{\text{vali} - \text{atu}} & \underline{\text{uyir} \text{ nilai}} \\ Pn & png & S_1 \\ \Rightarrow & \underline{\text{anpin} \text{ valiyatu}} & \underline{\text{uyir} \text{ nilai}} \\ & Pp & S \end{array} \quad (80)$$

‘The body is the abode of affection’.

Examples for the Possessive clauses :

$$\begin{array}{ccc} \underline{\text{kolai} \text{ vinaiyar}} & \underline{\text{aakiya} \text{ maakka!}} & \underline{\text{pulai} \text{ vinaiyar.}} \\ S & & Pp \\ \underline{\text{punmai} \text{ terivaar} \text{ akattu}} & & \\ LT & & \end{array} \quad (329)$$

‘The slaughterous are mean in the estimation of those who know the meanness of killing.’

$$\begin{array}{ccc} \underline{\text{tannai} +} & \underline{\text{taān}} & \underline{\text{kaatalan}} \\ O_1 & S & Pp \end{array} \quad (209)$$

‘He who loves himself’

$$\begin{array}{ccc} \underline{\text{yaarinum}} & \underline{\text{kaatalam}} & \dots \\ M & Pp & \end{array} \quad (1314)$$

‘most affectionate than anybody else’

vilamkoṭu makka! anaiyar (410)

So Pp

'are like beasts in comparison to men'

2.2.2.7. An indicative clause is transformed into an imperative clause by using the imperative form of the predicate. The subject tagmeme is manifested by second person pronoun. E.g.

enakku urai. ... (1151)

'Tell me'

karappaar iravanmin (1067)

'Do not beg those who conceal'

2.2.2.9. All the subordinate clauses represented in the following chart are derived from their corresponding indicative clauses.

CHART 3

Sub-types of Subordinate Clauses

	<i>Infinitive</i>	<i>Relative Participle</i>	<i>Verbal Noun</i>
Descriptive	+	+	
Intransitive	+	+	+
Transitive	+	+	+
Ditransitive	+	+	+

2.2.2.9.1. Infinitive clauses (*Inf CL*):

Descriptive Inf CL

Std + inf	<=	Std + p + n	
<i>in</i> + <i>ti</i>	<=	<i>in</i> + ϕ + <i>tu</i>	(354)
'without'		'not : it'	

Verbs (here verb stem includes intransitive, transitive and ditransitive).

$St \pm tr + t + inf$	$<=$	$St \pm tr + te \pm aug + p + n$	
$a\dot{u} + t + u$	$<=$	$a\dot{u} + t + aa + !$	(1317)
'having wept'		'wept : she'	
$aRi + mt + u$	$<=$	$aRi + mt + ee + n$	(1083)
'having known'		'knew : I'	
$cey + t + u$	$<=$	$cey + t + aa + r$	(320)
'having done'		'did : they'	

The conditional gerund and gerund clauses are allosyntagmas of infinitive clause.

Conditional gerund :

$St \pm tr + t + c\ gr$	$<=$	$St \pm tr + t + aug + p + n$	
$a\dot{u} + t + aal$	$<=$	$a\dot{u} + t + aa + !$	(1317)
'if (she) weep(s)'		'wept: she'	
$aRi + mt + aal$	$<=$	$aRi + mt + ee + n$	(1083)
'if (I) know'		'knew : I'	
$cey + t + aal$	$<=$	$cey + t + aa + r$	(320)
'if (they) do'		'did : they'	

Gerund :

$St \pm tr + gr$	$<=$	$St \pm tr + t \pm aug + p + n$	
$a\dot{u} + a$	$<=$	$a\dot{u} + t + aa + !$	(1317)
'to weep'		'wept : she'	
$aRi + a$	$<=$	$aRi + mt + ee + n$	(1083)
'to know'		'knew: I'	
$cey + a$	$<=$	$cey + t + aa + r$	(320)
'to do'		'did: they'	

2.2.2.9.2. Relative Participle Clause (*R.P.CL*):*Descriptive R.P.CL.*

Std + rp	<=	Std + p + n	
nal + a	<=	nal + a + r	(403)
'good'		'good: they'	

The descriptive relative participle base clause is an allosyntagma of *R.P.CL*.

Std	<=	Std + p + n	
nal	<=	nal + a + r	(403)
'good'		'good :they'	

Verbs:

St ± tr + t + rp	<=	St ± tr + t ± aug + p + n	
a <u>l</u> u + t + a	<=	a <u>l</u> u + t + aa + !	(1317)
'(who) wept'		'wept: she'	
aRi + mt + a	<=	aRi + mt + ee + n	(1083)
'(who) knew'		'knew:I'	
cey + t + a	<=	cey + t + aa + r	(320)
'(who) did'		'did: they'	

The relative participle base clause is an allosyntagma of *R.P.CL*.

St ± tr	<=	St ± tr + t ± aug + p + n	
a <u>l</u> u	<=	a <u>l</u> u + t + aa + !	(1317)
'weeping'		'wept: she'	
aRi	<=	aRi + mt + ee + n	(1083)
'knowing'		'knew: I'	
cey	<=	cey + t + aa + r	(320)
'doing'		'did: they'	

2.2.2.9.3. *Verbal Noun Clause (V.N.CL):*

St ± tr + vn	<=	St ± tr + t ± aug + p + n	
a <u>l</u> u + tal	<=	a <u>l</u> u + t + aa + !	(1317)
'the act of weeping'		'wept : she'	
aRi + tal	<=	aRi + mt + ee + n	(1083)
'the act of knowing'		'knew : I'	
cey + tal	<=	cey + t + aa + r	(320)
'the act of doing'		'did : they'	

2.2.3.0. **Syntagmemic Distinctions:** The Structural differences which distinguish one clause type from the other are discussed here. Structural distinctions among clause types in the vertical series are primary; structural distinctions among clause types in the horizontal order are secondary since they are transforms of the corresponding indicative clauses.

2.2.3.1.1. *Nominal clause versus other clause types:* The identifying-contrastive features which syntagmemicly distinguish equative clause from all other clause types are: (1) a difference in manifesting similar but distinct tagmemes, i.e. the predicates are different and (2) a difference in the obligatory versus optional status of the subject tagmemes, i.e. while clause level subject tagmeme is obligatory in equative clause, it is optional for other clauses. A further difference can also be seen in the fact that the equative clause has only restricted i.e. peripheral tagmemes.

2.2.3.1.2. *Possessive clause versus other clause types:* The identifying-contrastive features which syntagmemicly distinguish possessive clause from all other clause types are: (1) a difference in manifesting similar but distinct tagmemes, i.e. predicate tagmemes are distinct and (2) a difference in distinct derivation, possessive clause can be derived from equative clause.

2.2.3.1.3. *Descriptive clause versus other verbal clause types:* The identifying-contrastive features which syntagmemicly

distinguish descriptive clause from other verbal clauses are: (1) ■ difference in manifesting similar but distinct tagmemes and (2) a difference in distinct transform potential, i.e. while the other verbal clauses may be transformed to imperative clause types, the descriptive clause has no such transform potentiality.

2.2.3.1.4. *Intransitive versus other verbal clause types*: The identifying-contrastive features which syntagmatically distinguish intransitive clause from other verbal clauses are: (1) a difference in the number of nuclear tagmememes and (2) ■ difference in distinct transform potential, i.e. while the transitive and ditransitive clauses may be transformed to passive, the intransitive clause has no such transform potentiality.

2.2.3.1.5. *Transitive clause versus ditransitive clause*: The identifying-contrastive features which syntagmatically distinguish transitive clause from ditransitive clause are: (1) a difference in the number of nuclear tagmememes and (2) a difference in manifesting similar but distinct tagmememes, i.e. predicate tagmememes are different in terms of phrase types.

2.2.3.1.6. *Indicative versus imperative clauses*: The identifying-contrastive features which syntagmatically distinguish indicative clauses from imperative clauses are: (1) a difference in manifesting similar but distinct tagmememes, i.e. the subject of the imperative clause is restricted to the second person pronoun only and (2) a further difference can be seen in the fact that the imperative clause is never imbedded within a clause type or phrase type whereas the indicative clause types have this multiple nesting type of nature. Yet another difference may be cited in the restriction of the occurrence of the peripheral tagmememes in imperative clauses.

2.2.3.2.1. *Clauses versus subordinate clauses*: The identifying-contrastive features which syntagmatically distinguish subordinate clauses from clauses are: (1) ■ difference in the absence versus presence of the subject tagmeme and (2) ■ difference in distinctive derivation.

2.2.3.2.2. *Infinitive versus other subordinate clause types:*

The identifying-contrastive features which syntagmemically distinguish *Inf CL* from *R.P.CL* are: (1) a difference in distinct derivation and (2) ■ difference in the optional selection of the coordinator / *um* /.

By the same structural differences descriptive *Inf CL* and descriptive *R.P.CL* can also be differentiated.

The structural features which distinguish *Inf CL* from *V.N.CL* are: (1) a difference in distinct derivation and (2) ■ difference in the optional selection of case signs.

By the same structural difference *R.P.CL* may be distinguished from *V.N.CL*.

2.2.4.0. The optative, indicative₂, interrogative, negative and passive clauses are treated as allosyntagmas of the corresponding indicative clauses. Besides these any addition of clitics such as /*ee*/, /*oo*/, /*manRa*/, /*oorum*/, /*kol*/, /*man*/, etc. will constitute allosyntagmas of the given clause type. These clitics may indicate some difference in the shades of meaning of the clause type such as emphatic, dubious, etc. or occur as mere expletives.

2.2.4.1. **Optative:** An indicative clause is transformed into an optative and an indicative₂ by using the optative and indicative₂ forms of the predicate tagmeme respectively. E.g.

colluka collin payan uṭaiya (200)
Opt

‘Let one make useful utterances.’

yaan nookkum kaalai nilan nookkum. (1094)
Ind₂

‘when I look at her, she looks at the ground.’

2.2.4.2. An indicative clause is transformed into an interrogative clause by employing either the closing title /*oo*/ or interrogative clitics. E.g.

marumtoo? maRRu uun oompam vaalkkai

perum takaimai

pīitu aḷiya vamta iṭattu (968)

‘When one’s honour is at stake, can we consider his life caring more for his flesh as anything important?’

pacamta en paṇpu yaarkku uraikkoo? (1181)

‘To whom shall I talk about the nature of this pallor?’

ciRai kaakkum kaappu evan ceyyum? (57)

‘What avails the guard of a prison?’

2.2.4.3. An indicative clause is transformed into negative clause either by using the negative form of the predicate or by adding the descriptive predicate of the stem /al/. E.g.

kaṭal ooṭaa. kaal val neṭum teer (496)

‘The strong-wheeled chariot never runs on the surface of the sea.’

ceyirin talaippirimta kaaṭciyaar uṇṇaar.

uyirin talaippirimta uun (258)

‘Those who have flawless wisdom do not eat the flesh of an animal.’

keeṭum perukkamum il alla. (115)

‘Adversity and prosperity are not uncommon.’

uRuppu ottal makkkaḷ oppu anRaal. (993)

‘Resemblance of the limbs is not the resemblance of the people.’

2.2.4.4. Passive clauses are transforms of the transitive and the ditransitive clauses by the following rules.

$$\begin{array}{ccc} \pm S \pm O + \text{Ptr} & \Rightarrow & \pm S \pm \text{ag} + \text{Pr} - \text{paṭu} \\ (\text{avar}) \quad \text{avai} \quad \text{aRiyaar.} & & (713) \\ S \quad O \quad \text{Ptr} & & \end{array}$$

‘They don’t know the nature of the assembly.’

$$\begin{array}{ccc} \Rightarrow & \text{avai} \quad \text{avaraal} \quad \text{aRiyappaṭaatu.} \\ S & \text{a(gent)} \quad \text{Pr-paṭu} \end{array}$$

‘The nature of the assembly will not be known by them.’

$$\begin{aligned} \pm S \pm O \pm IO + \text{Ptr}_2 & \Rightarrow \pm S \pm \text{ag} \pm IO + \text{Pr} - \text{pa}\dot{\text{t}}u \\ & \Rightarrow \pm S \pm \text{ag} \pm \text{ref} + \text{Pr} - \text{pa}\dot{\text{t}}u \end{aligned}$$

$$\begin{array}{cccc} (\text{avar}) & \text{onRu} & \text{vaRiyaarkku} & \text{iivaar.} \\ S & O & IO & \text{Ptr}_2 \end{array}$$

‘They will give something to the poor.’

$$\Rightarrow \begin{array}{cccc} \text{onRu} & \text{avaraal} & \text{vaRiyaarkku} & \text{iiyappa}\dot{\text{t}}um. \\ S & \text{ag} & IO & \text{Pr-pa}\dot{\text{t}}u \end{array}$$

‘Something will be given to the poor by them.’

$$\Rightarrow \begin{array}{cccc} \text{vaRiyaar} & \text{avaraal} & \text{onRu} & \text{iiyappa}\dot{\text{t}}uvaar. \\ S & \text{ag} & \text{ref(erent)} & \text{Pr-pa}\dot{\text{t}}u \end{array}$$

‘The poor will be given something by them.’

$$(\text{vaRiyaarkku onRu iiva} \dots) \quad (221)$$

Phrase Level Syntagmemes

2.3.0. The phrase level is that level which is above the word level and below the clause level. A phrase is a functional unit composed potentially of two or more words. A phrase as defined by Longacre (1964) is "a class of syntagmemes of a hierarchical order ranking above such syntagmemes as the word and/or stem and below such syntagmemes as the clause and sentence." Hence strings comprised of a sequence of two or more words or of one word which is potentially expandable are discussed in this part.

2.3.0.1. Mostly syntagmemes of one structural level manifest tagmemes of the next higher level, e.g. phrases manifest clause level tagmemes. Therefore sequences bounded by borders of clause level tagmemes are phrases unless they have internal structure of some other higher or lower level.

2.3.0.2. On the basis of function as an element of the clause, phrases are grouped into two classes, viz. nominal and verbal. Nominal phrases manifest functions other than predicate tagmemes in which verb phrases occur in verbal clauses. In every manifestation phrases need not be complex. A mere obligatory tagmeme itself is a phrase if it is optionally expandable. Since phrase structure in Tamil is characterised by multiple nesting type of constructions, phrase within a phrase is quite common.

2.3.0.3. The following phrase types have been identified and are represented in the accompanying tagmemic notation paradigm.

CHART 4

**Tagmemic Notation Paradigm
of
Phrase Types**

<i>Nominal</i>	<i>Mod NP</i>	$\pm Mod_2 [+ H]$
	<i>Det NP</i>	$[+ Det + H]$
	<i>Des NP</i>	$[+ Des_2 + H]$
	<i>Ad HP</i>	$[+ Ad + H]$
	<i>Pos P</i>	$[+ Pos \pm P + I]$
	<i>Co NP</i>	$[+ H_1 \pm C_1 + H_2 \pm C_2 \pm (+ H \pm C)^n]$
	<i>Se P</i>	$[+ Se \pm Con + H]$
<i>Verbal</i>	<i>Adv P₁</i>	$+ Adv_2 [+ H]$
	<i>Adv P₂</i>	$+ Adv_2 [+ H]$
	<i>Adv P₃</i>	$+ Adv_2 [+ H]$
	<i>Adv P₄</i>	$+ Adv_2 [+ H]$

2.3.1. *Nominal Phrase Types.*

2.3.1.1.1. *Mod NP* = $\pm Mod_2 [+ H]$: Modifier Noun Phrase syntagmeme which consists of an optional modifier tagmeme and an obligatory head tagmeme. The subscript indicates that the particular tagmeme can occur twice.

Modifier tagmeme is manifested by any one of the noun uriccol (2.5.1) roots.

Head tagmeme may be manifested by common nouns or verbal noun₂ or descriptive verbal noun. E.g.

viyan ulakam (19)
 'the wide world'

mallal maa ñaalam (245)
 'the great flourishing earth'

kaḷi nalkuravu (657)
 'much poverty'

ati nuṭṭam (636)
 'more minuteness'

The head tagmeme may be manifested by a noun phrase in imbedded structure. E.g.

kaḷi perum kaarikai (571)
 'too much beauty'

2.3.1.1.2. *Det NP* = [*+Det+H*]: Determiner Noun Phrase syntagmeme which consists of an obligatory determiner tagmeme and an obligatory head tagmeme.

Determiner tagmeme is manifested by determiner syntagmeme and its allosyntagmas.

Head tagmeme may be manifested by common nouns or verbal noun₂ or descriptive verbal nouns. E.g.

ellaa+ poruḷ (746)
 'all things'

e poruḷ (423)
 'which thing'

a nalam (641)
 'that goodness'

ten pulattaar (43)
 'the pitaras'

oru naaḷ (1146)
 'one day'

2.3.1.1.3. *Des NP* = [$+Des_2+H$]: Descriptive Noun Phrase syntagmeme, which consists of an obligatory descriptive tagmeme and an obligatory head tagmeme.

Descriptive tagmeme is manifested by the subordinate relative participle clauses.

Head tagmeme is manifested by the same set of items of the determiner noun phrase (2.3.1.1.2). E.g.

paoku uu! (371)
'bad luck'

nuṇ poru! (424)
'minute thing'

nuṇṇiya nuul (373)
'scholarly treatises'

maṇṇ punai paavai (407)
'laudably decorated doll'

poy tiir oḷukkam (6)
'flawless behaviour'

The head tagmeme may be manifested by noun phrases in imbedded structure. E.g.

iruḷ ceer iru vinai (5)
'the twofold karma which is coupled with delusion'

kaṭan aRi kaaṭci avar (218)
'dutiful intellectuals'

naṇṇaarum uḷkum en piṭṭu (1088)
'my prowess which would be feared even by enemies'

2.3.1.1.4. *Ad Hp* = [$+Ad+H$]: The Adjunct Head Phrase syntagmeme, which consists of an obligatory adjunct tagmeme and an obligatory head tagmeme.

The adjunct and head tagmemes may be manifested by common nouns. The head tagmeme may also be manifested by pronoun₂. E.g.

<i>veel aal</i> 'warrior'	(500)
<i>poru! peṇṭir</i> 'prostitutes'	(913)
<i>naa nalam</i> 'the gift of the tongue'	(641)
<i>maṇi niir</i> 'crystal clear water'	(742)
<i>maṇal keeṇi</i> 'sand well'	(396)
<i>kaaṭci avar</i> 'the wise'	(199)

Both tagmemes may be manifested by noun phrases in imbedded structure. E.g.

<i>kaṭan aRi kaaṭci avar</i> 'dutiful intellectuals'	(218)
<i>iirm kaṇ maa ṇaalam</i> 'the wide world which consists of wet areas'	(1058)
<i>kaal val neṭum teer</i> 'strong wheeled sturdy chariot'	(496)
<i>maṇ maṇ punai paavai</i> 'laudably decorated doll which is made of plaster'	(407)

2.3.1.1.5. $Pos P = [+Pos \neq P + I]$ Possessive Phrase syntagmeme which consists of an obligatory possessor tagmeme, an optional possessive tagmeme and an obligatory item tagmeme.

Possessor tagmeme may be manifested by pronoun₁ or pronoun₂ or common nouns or verbal noun₂ or descriptive verbal nouns.

Possessive tagmeme is manifested by genitive case sign.

Item tagmeme is manifested by the same set that manifests possessor tagmeme, except the pronouns. E.g.

en piiṭu (1088)

'my greatness'

tan makan (69)

'one's son'

avar poruḷ (63)

'their wealth'

kiiḷkaḷatu aacaaram (1075)

'the behaviour of the low'

vinai vali (471)

'the strength of action'

Both the obligatory tagmemes may be manifested either by noun phrases or subordinate verbal noun clause or indicative clauses or possessive clauses in imbedded structure. E.g.

a poruḷ mey poruḷ (423)

'the truthful verity of the thing'

tam makkaḷ ciRu kai (64)

'their children's tiny hands'

pacum pul talai (16)

'the tip of the greenish grass'

vaal aRivan naḷ taaḷ (2)

'the good feet of the One of pure knowledge'

uukkam uṭaiyaan oṭukkam (486)

'the concealment of an energetic person'

malar micai eekinaan maan aṭi (3)

'the glorious feet of Him who has walked over flowers'

oṭukkattu niittaar perumai (21)

'the greatness of those who have renounced everything in their disciplined life'

eṇ kuṇattaan taal (9)
 'the feet of Him of eight traits'

nun maan nulai pulam illaan eḷil nalam (407)
 'the pride and beauty of the one devoid of piercing intellect'

2.3.1.1.6. $Co NP = [+ H_1 \pm C_1 + H_2 \pm C_2 \pm (+ H \pm C)^n]$:
 Coordinate Noun Phrase syntagmeme consists of at least two obligatory head tagmemes and two optional coordinator tagmemes and it can be expanded by the head and coordinator tagmemes of indefinite times.

The head tagmemes may be manifested either by pronoun₁ or pronoun₂ or common nouns or verbal noun₂ or descriptive verbal noun.

The coordinator tagmeme is manifested by the clitic /um...
 um.../ E.g.

*niiyum naanum**
 'you and I'

*avanum avaḷum**
 'he and she'

kuuḷum kuṭiyum (554)
 'the finance and the subjects'

keeṭum perukkamum (115)
 'destruction and abundance'

nalanum ciirum (499)
 'the goodness and the greatness'

The head tagmemes may be manifested by noun phrases or subordinate verbal noun clause or by indicative clauses in imbedded structure. E.g.

ciRai nalanum ciirum (499)
 'the fortification and greatness'

kaṭum moliyum kai ikamta taṇṭamum (567)
 'severe words and excessive punishment'

uRu paciyum oovaa+ piṇiyum (734)
 'excessive starvation and irremediable disease'

matiyum maṭamtai mukanum (1116)
 'the moon and the face of a woman'

iru manam peṇṇirum kaḷḷum kavaRu (920)
 'prostitutes, liquor and gambling'

onnaar+ teRaḷum uvamtaarai aakkalum (264)
 'destroying the enemies and lifting the friends'

uRuvatu ciirtuukkum naṭṭum peRuvatu koḷvaarum
kaḷvarum (813)
 'the prostitutes, the thieves and the friendship which
 will weigh the available profit'

2.3.1.1.7. *Se P* = [+ *Se* ± *Con* + *H*] Sequential Phrase syntagmeme, which consists of an obligatory sequence tagmeme, an optional conjunction tagmeme and an obligatory head tagmeme.

The sequence tagmeme is manifested by coordinate noun phrases.

The conjunction tagmeme may be manifested either by ■ gerund or an infinitive form of the verb *|en/* or the clitic *|ooṭu/*.

The head tagmeme is manifested by numeral nouns. E.g.

paṭai kuṭi kuḷ amaiccu naṭṭu araṇ aaRu (381)
 'military strength, populace, finance, counsel, alliance and fortification — thus the six'

taanam tavam iraṇṭu (19)
 'charity and penance — thus the two'

aaḷvinaiyum aanRa aRivum ena iraṇṭu (1022)
 'exertion and sound knowledge — thus the two'

The head tagmeme may be manifested by noun phrases in imbedded structure. E.g.

manam tuuymai cey vinai tuuymai iran̄tu (455)

‘purity of heart and purity of action — thus the two’

kaamam vekūi mayakkam ivai muunRu (360)

‘desire, anger and delusion — thus these three’

2.3.1.2. Verbal Phrase Types :

2.3.1.2.1. $Adv P_1 = \pm Adv_2 [+ H]$ Adverbial Phrase₁ syntagmeme, which consists of an optional adverb tagmeme and an obligatory head tagmeme.

Adverb tagmeme may be manifested either by verb uriccol or verb clitics or descriptive infinitive syntagmeme. Adverb tagmeme is common to all the verb phrase types.

Head tagmeme is manifested by descriptive indicative₁ verbs.
E.g.

tamcam eḷiyan (863)

‘very simple (he)’

uumku iniyatu (1065)

‘very sweet (it)’

nani nallar (403)

‘very good (they)’

2.3.1.2.2. $Adv P_2 = \pm Adv_2 [+ H]$ Adverbial Phrase₂ syntagmeme, which consists of an optional adverb tagmeme and an obligatory head tagmeme.

Head tagmeme is manifested by intransitive verbs. E.g.

uṭan maan̄tatu (632)

‘glorious also (it)’

*oruvamtam ollai + keṭṭatu**

‘ruined quickly and certainly (it)’

(*oruvamtam ollai + keṭum*) (563)

2.3.1.2.3. $Adv P_3 = \pm Adv_2 [+ H]$ Adverbial Phrase₃ syntagmeme, which consists of ■■ optional adverb tagmeme and an obligatory head tagmeme.

Head tagmeme is manifested by transitive verbs. E.g.

*val aRivaan**
'will know quickly (he)'
(*val aRital*) (582)

*mella eRimtaar**
'punished slowly (they)'
(*mella eRika*) (562)

2.3.1.2.4. $Adv P_4 = \pm Adv_2 [+ H]$ Adverbial Phrase₄ syntagmeme, which consists of an optional adverb tagmeme and an obligatory head tagmeme.

Head tagmeme is manifested by ditransitive verbs. E.g.

*mii + kuuRiyatu**
'said highly (it)'
(*mii + kuuRum*) (386)

2.3.2.0. Syntagmemic Distinctions.

The identifying - contrastive structural features which syntagmatically distinguish one phrase type from another are discussed.

2.3.2.1. Nominal Phrases.

2.3.2.1.1. Modifier Noun Phrase versus other phrase types :

The identifying - contrastive features which syntagmatically distinguish *Mod NP* from *Det NP* are: (1) a difference in the number of nuclear tagmemes, i.e. while *Mod NP* has only one nuclear tagmeme, the *Det NP* has two nuclear tagmemes, and (2) a difference in manifesting similar but distinct tagmemes, i.e. the manifesting set of items of the modifier tagmeme and determiner tagmeme are distinct.

By the same structural differences *Mod NP* is distinct from *Des NP* and *Ad HP*.

The identifying - contrastive feature which syntagmatically distinguishes *Mod NP* from *Pos P* is: (1) ■ difference of two in the number of nuclear tagmemes, i.e. one versus three.

By the same structural difference *Mod NP* is distinct from *Co NP* and *Se P*.

2.3.2.1.2. *Determiner Noun Phrase versus other phrase types:*
The identifying - contrastive features which syntagmatically distinguish *Det NP* from *Des NP* are: (1) ■ difference in manifesting similar but distinct tagmemes in terms of word types and (2) a difference in distinctive derivation, i.e. *Det NP* can be derived from nominal clause.

<i>a poru!</i>	$< =$	<i>atu poru!</i>	(423)
'that thing'		'That is a thing'	

<i>e poru!</i>	$< =$	<i>atu poru!</i>	(423)
'which thing'		'Which is the thing?'	

By the same structural differences *Det NP* is distinct from *Ad HP*.

The identifying - contrastive features which syntagmatically distinguish *Det NP* from *Pos P* are: (1) ■ difference in the number of nuclear tagmemes and (2) a difference in manifesting similar but distinct tagmemes in terms of word types.

By the same structural differences *Det NP* is distinct from all other nominal phrases.

2.3.2.1.3. *Descriptive Noun Phrase versus other phrase types:*
The identifying - contrastive features which syntagmatically distinguish *Des NP* from *Ad HP* are: (1) ■ difference in manifesting similar but distinct tagmemes in terms of word classes and (2) a difference in distinct transform potential, i.e. *Ad HP* can be transformed to *Co NP* by employing the coordinators, while *Des NP* has no such transform.

maṇi niir <= *niir maṇi poonRatu.* (742)
 'crystal clear water' 'The water resembles the sapphire.'

The structural feature that distinguishes *Ad HP* from *Co NP* and *Se P* is: (1) ■ difference of two in the number of nuclear tagmemes.

2.3.2.1.5. *Possessive Phrase versus other phrase types*: The identifying - contrastive feature which syntagmatically distinguishes the *Pos P* from *Co NP* is: (1) ■ difference of two in the number of nuclear tagmemes, i.e. in *Co NP* $\pm (+ H \pm C)^n$ should also be considered as nuclear tagmemes since the parallel $H_1 H_2 C_1 C_2$ are nuclear tagmemes in the phrase type.

By the same structural difference *Pos P* is distinct from *Se P*.

2.3.2.1.6. *Coordinate Noun Phrase versus Sequential phrase*: The identifying - contrastive features which syntagmatically distinguish *Co NP* from *Se P* are: (1) a difference in the number of nuclear tagmemes and (2) ■ difference in the absence versus presence of the peripheral conjunction tagmeme.

2.3.2.2.0. *Verbal Phrases.*

2.3.2.2.1. *Verbal versus nominal phrases*: The identifying - contrastive features which syntagmatically distinguish verbal phrases from nominal phrases are: (1) ■ difference in manifesting similar but distinct tagmemes in terms of word classes and (2) a difference in distinctive transform.

2.3.2.2.2. *Adverbial phrase₁ versus other verbal phrase types*: The identifying - contrastive features which syntagmatically distinguish *AdvP₁* from *AdvP₂* are: (1) a difference in manifesting similar but distinct tagmemes in terms of word types and (2) a difference in distinctive derivation, i.e. transitive verbs may be derived from intransitive verb while descriptive has no such derivation.

By the same structural differences all the other adverbial phrases can be differentiated from one another.

2.3.3.0. *Etic Variants.*

2.3.3.1.1. The appositional and figurative phrases are treated as allosyntagmemes of *Ad HP*.

Apposition:

aati pakavan (1)
‘Bhagavan, the foremost’

Figurative :

kaamam kaṇicci (1251)
‘love, the axe’

2.3.3.1.2. The quotative phrase is treated as an allosyntagma of the *Des NP*.

kuṇam ennum kunRu (29)
‘the hillock called virtue’

2.3.3.2.1. All the allosyntagmas of indicative verbs constitute allosyntagmas of verbal phrases. E.g.

uumku illai. (32)
‘nothing superior.’

vallai + keṭum. (480)
‘will vanish quickly.’

mella eRika. (562)
‘let (them) punish slowly.’

mii + kuuRum. (386)
‘will praise highly.’

Word Level Syntagmemes

2.4.0. In the grammatical hierarchy word level constitutes the lower level. Word, as defined by Longacre (1964), is "a class of syntagmemes of a comparatively low hierarchical order, ranking below such syntagmemes as the phrase and clause and above such syntagmemes as the stem (as well as above roots which have no internal structure and are therefore not syntagmemes)." This definition of word is so convenient and useful, even though there are problems in its application. Hence word level constructions consist, potentially, of two or more tagmemes having rigidly ordered linear components as their constituent tagmemes, i.e. words are typically stem-affix strings. Therefore forms which are capable of word level expansion (by affixation) are described.

2.4.0.1. In general, words manifest tagmemes in phrases. So every sequence of phonemes bounded by phrase level tagmemes is a word unless it has an internal tagmemic structure of some other level either higher or lower in the grammatical hierarchy.

2.4.0.2. Not only verbs, descriptive verbs and nouns constitute distinct emic classes but verbs also constitute in turn three distinct emic classes, viz. intransitive, transitive and ditransitive. The emic classes at the word level are set up on the basis of the internal structure, grades of transitivity, mood, voice, transform potential and the external distribution. Hence the subdivision of emic classes are not ad hoc but it is very useful in other parts of grammar also.

2.4.0.3. The following word types have been identified and graphically represented in the following chart. However the nonoccurrence of optative, imperative conditional gerund, gerund and verbal noun₂ in descriptive series remains ■ genuine lacunae.

CHART - 5

Word Types

		<i>Descrip- tive</i>	<i>Intransi- tive</i>	<i>Transi- tive</i>	<i>Ditransi- tive</i>
<i>Verbal</i>	Indicative ₁	+	+	+	+
	Indicative ₂	+	+	+	+
	Optative		+	+	+
	Imperative		+	+	+
	Infinitive	+	+	+	+
	C gerund		+	+	+
	R participle	+	+	+	+
	Gerund		+	+	+
	V Noun ₁		+	+	+
	V Noun ₂	+	+	+	+
	R participle base		+	+	+
<i>Non-verbal</i>	Pronoun ₁	+			
	Pronoun ₂	+			
	Possessive noun	+			
	Determiner	+			

2.4.1. Verb Syntagmemes

2.4.1.1.0.1. Intransitive Indicative₁ syntagmeme ($In\ Ind_1 = St + t \pm aug + P + nu$) consists of an obligatory stem tagmeme manifested by class *A* stems, an obligatory tense tagmeme manifested by any one of the tense morphemes, an optional augmentative tagmeme manifested by augmentative morpheme, an obligatory person tagmeme manifested by any one of the person morphemes and an obligatory number tagmeme manifested by any one of the number morphemes or number gender morphemes. E.g.

$va + mt + aa + n$ 'came : he' (530)

2.4.1.1.0.2. Transitive Indicative₁ syntagmeme ($Tr\ Ind_1 = St \pm tr + t \pm aug + p + nu$) consists of an obligatory stem tagmeme manifested either by class *B* stems or class *C* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by any one of the tense morphemes, an optional augmentative tagmeme manifested by augmentative morpheme, an obligatory person tagmeme manifested by any one of the person morphemes and an obligatory number tagmeme manifested by any one of the number morphemes or number-gender morphemes. E.g.

$uRu + t \pm an + a \pm \phi$ 'had : they' (1179)

2.4.1.1.0.3. Ditransitive Indicative₁ syntagmeme ($Di\ Ind_1 = St \pm tr + t \pm aug + p + nu$) consists of an obligatory stem tagmeme manifested either by class *D* stems or class *E* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by any one of the tense morphemes, an optional augmentative tagmeme manifested by augmentative morpheme, an obligatory person tagmeme manifested by any one of the person morphemes and an obligatory number tagmeme manifested by any one of the number morphemes or number-gender morphemes. E.g.

$urai + pp + aa + r$ 'will say : they' (682)

2.4.1.1.1.1. Intransitive Indicative₂ syntagmeme ($In\ Ind_2 = St + t$) consists of an obligatory stem tagmeme manifested by class *A* stems and an obligatory tense tagmeme manifested by tense morpheme. E.g.

varu + um 'will come' (264)

2.4.1.1.1.2. Transitive Indicative₂ syntagmeme ($Tr\ Ind_2 = St \pm tr + t$) consists of an obligatory stem tagmeme manifested either by class *B* stems or class *C* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory tense tagmeme manifested by tense morpheme. E.g.

cuṭu + um 'will torment' (293)

2.4.1.1.1.3. Ditransitive Indicative syntagmeme ($Di\ Ind_2 = St \pm tr + t$) consists of an obligatory stem tagmeme manifested either by class *D* stems or class *E* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory tense tagmeme manifested by tense morpheme. E.g.

cey + um 'will do' (79)

2.4.1.1.2.1. Intransitive Optative syntagmeme ($In\ Opt = St + opt$) consists of an obligatory stem tagmeme manifested by class *A* stems and an obligatory optative tagmeme manifested by optative morpheme. E.g.

varu + ka 'let (him) come' (1266)

2.4.1.1.2.2. Transitive Optative syntagmeme ($Tr\ Opt = St \pm tr + opt$) consists of an obligatory stem tagmeme manifested either by class *B* stems or class *C* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory optative tagmeme manifested by optative morpheme. E.g.

kol + ka 'let (one) kill' (879)

by tense morpheme and an obligatory infinitive tagmeme manifested by infinitive morpheme. E.g.

$avku + i + \phi$ 'having become acute' (175)

2.4.1.1.4.2. Transitive Infinitive syntagmeme ($Tr\ Inf = St \pm tr + t + inf$) consists of an obligatory stem tagmeme manifested either by class *B* stems or by class *C* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by tense morpheme and an obligatory infinitive tagmeme manifested by infinitive morpheme. E.g.

$uRu + t + u$ 'having had' (75)

2.4.1.1.4.3. Ditransitive Infinitive syntagmeme ($Di\ Inf = St \pm tr + t + inf$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by tense morpheme and an obligatory infinitive tagmeme manifested by infinitive morpheme. E.g.

$cey + t + u$ 'having done' (246)

2.4.1.1.5.1. Intransitive Conditional gerund syntagmeme ($In\ C\ gr = St + t + C\ gr$) consists of an obligatory stem tagmeme manifested by class *A* stems, an obligatory tense tagmeme manifested by tense morpheme and an obligatory conditional gerund tagmeme manifested by conditional gerund morpheme. E.g.

$var + \phi + in$ 'if (it) come(s)' (970)

2.4.1.1.5.2. Transitive Conditional gerund syntagmeme ($Tr\ C\ gr = St \pm tr + t + c\ gr$) consists of an obligatory stem tagmeme manifested by either class *B* stems or by class *C* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by tense morpheme and an obligatory conditional gerund tagmeme manifested by conditional gerund morpheme. E.g.

$uRu + t + aal$ 'if (we) love' (1245)

2.4.1.1.5.3. Ditransitive Conditional gerund syntagmeme ($Di\ C\ gr = St \pm tr + t + c\ gr$) consists of an obligatory stem tagmeme manifested by either class *D* stems or by class *E* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by tense morpheme and an obligatory conditional gerund tagmeme manifested by conditional gerund morpheme. E.g.

$cey + \phi + in$ 'if (one) do(es)' (116)

2.4.1.1.6.1. Intransitive Relative participle syntagmeme ($In\ R\ p = St + t + r\ p$) consists of an obligatory stem tagmeme manifested by class *A* stems, an obligatory tense tagmeme manifested by any one of the tense morphemes and an obligatory relative participle tagmeme manifested by relative participle morpheme. E.g.

$va + mt + a$ '(which) came' (754)

2.4.1.1.6.2. Transitive Relative participle syntagmeme ($Tr\ R\ p = St \pm tr + t + r\ p$) consists of an obligatory stem tagmeme manifested by either class *B* stems or by class *C* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by any one of the tense morphemes and an obligatory relative participle tagmeme manifested by relative participle morpheme. E.g.

$cu\ pu + t + a$ '(which) was burnt' (129)

2.4.1.1.6.3. Ditransitive Relative participle syntagmeme ($Di\ R\ p = St \pm tr + t + r\ p$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems, an optional transitive tagmeme manifested by transitive morpheme, an obligatory tense tagmeme manifested by any one of the tense morphemes and an obligatory relative participle tagmeme manifested by relative participle morpheme. E.g.

$cey + t + a$ '(which) was done' (103)

2.4.1.1.7.1. Intransitive Gerund syntagmeme ($In\ Gr = St + gr$) consists of an obligatory stem tagmeme manifested by

class *A* stems and an obligatory gerund tagmeme manifested by gerund morpheme. E.g.

aļu + a 'to weep' (659)

2.4.1.1.7.2. Transitive Gerund syntagmeme ($Tr\ Gr = St \pm tr + gr$) consists of an obligatory stem tagmeme manifested either by class *B* stems or by class *C* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory gerund tagmeme manifested by gerund morpheme. E.g.

cuļu + a 'to burn' (267)

2.4.1.1.7.3. Ditransitive Gerund syntagmeme ($Di\ Gr = St \pm tr + gr$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory gerund tagmeme manifested by gerund morpheme. E.g.

cey + a 'to do' (446)

2.4.1.1.8.1. Intransitive Verbal noun₁ syntagmeme ($In\ V\ n_1 = St + v\ n$) consists of an obligatory stem tagmeme manifested by class *A* stems and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

varu + al 'the act of coming' (1205)

2.4.1.1.8.2. Transitive Verbal noun₁ syntagmeme ($Tr\ V\ n_1 = St \pm tr + v\ n$) consists of an obligatory stem tagmeme manifested either by class *B* stems or by class *C* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

uRu + tal 'the act of having' (628)

2.4.1.1.8.3. Ditransitive Verbal noun₁ syntagmeme ($Di\ V\ n_1 = St \pm tr + v\ n$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems, an optional transitive tagmeme manifested by transitive morpheme and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

cey + al 'the act of doing' (40)

2.4.1.1.9.1. Intransitive Verbal noun₂ syntagmeme ($In V n_2 = St + v n$) consists of an obligatory stem tagmeme manifested by class *A* stems and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

cel + avu 'going' (766)

2.4.1.1.9.2. Transitive Verbal noun₂ syntagmeme ($Tr V n_2 = St + v n$) consists of an obligatory stem tagmeme manifested either by class *B* stems or by class *C* stems and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

aRi + vu 'knowledge' (68)

2.4.1.1.9.3. Ditransitive Verbal noun₂ syntagmeme ($Di V n_2 = St + v n$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

koŋu + ai 'giving' (390)

2.4.1.1.10.1. Intransitive Relative participle base syntagmeme ($In R p b = St$) consists of an obligatory stem tagmeme manifested by class *A* stems. E.g.

varu 'coming' (737)

2.4.1.1.10.2. Transitive Relative participle base syntagmeme ($Tr R p b = St$) consists of an obligatory tagmeme manifested either by class *B* stems or by class *C* stems. E.g.

aRi 'knowing' (272)

2.4.1.1.10.3. Ditransitive Relative participle base syntagmeme ($Di R p b = St$) consists of an obligatory stem tagmeme manifested either by class *D* stems or by class *E* stems. E.g.

cey 'doing' (653)

2.4.1.2.0. **Syntagmemic Distinction:** The identifying - contrastive structural features which syntagmemically distinguish one word type from another are discussed in general for all the three emic classes of verbs.

2.4.1.2.1. *Indicative₁ versus other word types*: The criterion that syntagmatically distinguishes indicative₁ from indicative₂ is: a difference of two in their number of obligatory tagmeme, i.e. indicative₁ has four obligatory tagmemes while indicative₂ has only two obligatory tagmemes.

By the same structural difference, indicative₁ is distinct from optative, imperative, gerund, verbal noun₁, verbal noun₂ and relative participle base.

The criteria that syntagmatically distinguish indicative₁ from the infinitive are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes, i.e. obligatory infinitive tagmeme is peculiar to infinitive syntagmeme.

By the same structural differences, indicative₁ is distinct from conditional gerund and relative participle.

2.4.1.2.2. *Indicative₂ versus other word types*: The criteria that syntagmatically distinguish indicative₂ from optative are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation, i.e. negative optative may be derived from affirmative optative by employing the negative morpheme.

<i>cey + al + k̂a</i>	<=	<i>ceyka</i>
'let (not) one do'		'let (one) do'

By the same structural differences, indicative₂ is distinct from imperative, infinitive and relative participle.

The criteria that syntagmatically distinguish indicative₂ from conditional gerund are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in the selection of the coordinator /*um*/. Since these word types share no tagmemes either obligatory or optional, the number difference in the obligatory tagmemes correlates with a further difference in the optional selection.

By the same structural differences, *indicative*₂ is distinct from *gerund*, *verbal noun*₁ and *verbal noun*₂.

The criteria that syntagmatically distinguish *indicative*₂ from *relative participle base* are: (1) a difference in the number of obligatory tagmemes and (2) a difference in distinctive derivation, i.e. *causative indicative*₂ can be derived from the *indicative*₂ by employing the *causative morpheme*.

<i>uḷappikkum</i>	<=	<i>uḷakkum</i>
'will cause to suffer'		'will suffer' .

2.4.1.2.3. *Optative versus other word types*: The criteria that syntagmatically distinguish *optative* from *imperative* are: (1) a difference in manifesting similar but distinct tagmemes and (2) absence versus presence of the optional number tagmeme, i.e. *optative* has no optional number tagmeme whereas *imperative* has the number tagmeme.

The criteria that syntagmatically distinguish *optative* from *infinitive* are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

By the same structural differences, *optative* is distinct from *conditional gerund* and *relative participle*.

The criteria that syntagmatically distinguish *optative* from *gerund* are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinctive derivation, i.e. *negative derivation of the optative*.

By the same structural differences, *optative* is distinct from *verbal noun*₁ and *verbal noun*₂.

The criteria that syntagmatically distinguish *optative* from the *relative participle base* are: (1) a difference in the number of obligatory tagmemes and (2) a difference in distinctive derivation, i.e. *negative derivation of the optative*.

2.4.1.2.4. *Imperative versus other word types*: The criteria that syntagmemically distinguish imperative from infinitive are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

By the same structural differences, imperative is distinct from conditional gerund and relative participle.

The criteria that syntagmemically distinguish imperative from gerund are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinctive derivation, i.e. negative imperative can be derived from affirmative imperative syntagmeme by employing the negative morpheme.

<i>nil + al + min</i>	<=	<i>nilmin</i>
'stand not! (you pl)'		'stand! (you pl)'

By the same structural differences imperative is distinct from verbal noun₁ and verbal noun₂.

The criteria that syntagmemically distinguish imperative from relative participle base are: (1) a difference in the number of obligatory tagmemes and (2) a difference in distinct derivation, i.e. negative derivation of the imperative.

2.4.1.2.5. *Infinitive versus other word types*: The criteria that syntagmemically distinguish infinitive from conditional gerund are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation, i.e. negative infinitive can be derived from affirmative infinitive syntagmeme by employing the negative morpheme.

<i>cey + aat + u</i>	<=	<i>ceytu</i>
'without doing'		'having done'

By the same structural differences, infinitive is distinct from gerund, verbal noun₁ and verbal noun₂.

The criteria that syntagmemically distinguish infinitive from relative participle are: (1) a difference in manifesting similar but

distinct tagmemes and (2) ■ difference in the selection of optional coordinator /um/.

The criterion that syntagmemically distinguishes infinitive from relative participle base is: a difference of two in the number of obligatory tagmemes.

2.4.1.2.6. *Conditional gerund versus other word types*: The criteria that syntagmemically distinguish conditional gerund from gerund are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

By the same structural differences, conditional gerund is distinct from verbal noun₁ and verbal noun₂.

The criteria that syntagmemically distinguish conditional gerund from relative participle are: (1) ■ difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation, i.e. negative relative participle can be derived from affirmative relative participle syntagmeme by employing the negative morpheme.

<i>uṇar + φ + aa</i>	< =	<i>uṇarum</i>
'(which will) not consider'		'(which) will consider'

The criterion that syntagmemically distinguishes conditional gerund from relative participle base is: a difference of two in the number of obligatory tagmemes.

2.4.1.2.7. *Gerund versus other word types*: The criteria that syntagmemically distinguish gerund from relative participle are: (1) a difference in the number of obligatory tagmemes and (2) ■ difference in manifesting similar but distinct tagmemes.

The criteria that syntagmemically distinguish gerund from verbal noun₁ are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in the selection of optional case signs, i.e. verbal noun₁ can take the case signs whereas gerund will never take the case signs.

By the same structural differences gerund is distinct from verbal noun₂.

The criteria that syntagmemically distinguish gerund from relative participle base are: (1) a difference in the number of obligatory tagmemes and (2) a difference in the selection of coordinator /um/, i.e. gerund can take coordinator /um/ whereas it is not possible with relative participle base.

2.4.1.2.8. *Relative participle versus other word types*: The criteria that syntagmemically distinguish relative participle from verbal noun₁ are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

By the same structural difference relative participle is distinct from verbal noun₂.

The criterion that syntagmemically distinguishes relative participle from relative participle base is: a difference of two in their number of obligatory tagmemes.

2.4.1.2.9. *Verbal noun₁ versus other word types*: The criteria that syntagmemically distinguish verbal noun₁ from verbal noun₂ are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation, i.e. causative verbal noun₁ can be derived from verbal noun₁ syntagmeme by employing the causative morpheme.

<i>kaaṇ + pi + tal</i>	<=	<i>kaaṇtal</i>
'the act of causing to see'		'the act of seeing'

Further the transitive and ditransitive verbal nouns can be transformed to passive by employing the auxiliary /paṭu/.

<i>en + a + paṭu + tal</i>	<=	<i>enRal</i>
'the act of being said'		'the act of saying'

The criteria that syntagmemically distinguish verbal noun₁ from relative participle base are: (1) a difference in the number of obligatory tagmemes and (2) a difference in the selection of case signs.

By the same structural differences verbal noun₂ is distinct from relative participle base.

2.4.1.3.0. Constituent tagmemes of verb class

The stem tagmeme occurs as an obligatory element in all the construction types which is manifested by verb stems. All the other constituent tagmemes which follow the stem tagmeme are manifested by affixal morphemes. Verb stems may be simple (*tin* 'eat') or complex (*paruvaru* 'suffer'). Stems may be intransitive (*aļu* 'weep') or transitive (*uļu* 'plough') or ditransitive (*cey* 'do'). Grades of transitivity from intransitive to transitive and transitive to ditransitive are in partial transformational relationship. In other words, some intransitive verbs may be transformed to transitive verbs by employing transitive morpheme (*aļamku* 'be subdued' : *aļakku* 'subdue'); some transitive verbs may be transformed to ditransitive by the same process (*poruntu* 'join' : *poruttu* 'unite'). Besides these classes of verbs, there are verb stems which are inherently intransitive (*kunRu* 'diminish'); others are inherently transitive (*taļuvu* 'embrace'); and still others are inherently ditransitive (*naluku* 'give'). However all verb stems can be causativized by employing the causative morpheme /-vi-/. E.g.

<i>aļu</i> : <i>aļuvi</i>	'cause to weep'
(<i>aļamku</i> :) <i>aļakku</i> : <i>aļakkuvi</i>	'cause to subdue'
<i>uļu</i> : <i>uļuvi</i>	'cause to plough'
(<i>poruntu</i> :) <i>poruttu</i> : <i>poruttuvi</i>	'cause to unite'
<i>nalku</i> : <i>nalkuvi</i>	'cause to give'

And all the verbs in general are further subdivided on the basis of the past tense morpheme into four major sets with some minor subsets. Only a few representative examples are given below for each category. However all the verb stems are listed in the glossary.

A. Inherently intransitive verb stems

Set	I	(x)	<i>aļu</i>	'weep'
			<i>iRu</i>	'end'

	(y)	<i>caal</i>	'fill'
		<i>nil</i>	'stand'
	(z)	<i>maan</i>	'be glorious'
		<i>tool</i>	'fail'
Set II	(x)	<i>paca</i>	'become pallor'
		<i>piRa</i>	'be born'
	(y)	<i>kani</i>	'grow ripe'
		<i>coor</i>	'forget'
Set III		<i>kaal</i>	'grow'
		<i>kuḷi</i>	'bathe'
		<i>paḷu</i>	'grow ripe'
Set IV		<i>eeku</i>	'go'
		<i>tummu</i>	'sneeze'
		<i>naaRu</i>	'smell'

B. *Inherently intransitive verb stems which can be transformed into transitive*

Set I	(x)	<i>toku</i>	'collect'
		<i>keṭu</i>	'be ruined'
		<i>iruḷ</i>	'become dark'
		<i>uruḷ</i>	'roll'
	(y)	<i>cuḷal</i>	'whirl'
		<i>tuyil</i>	'sleep'
Set II	(x)	<i>kiṭa</i>	'lie'
		<i>naṭa</i>	'walk'
	(y)	<i>kaviḷ</i>	'turn upside down'
		<i>vaḷar</i>	'grow'
	(z)	<i>taḷar</i>	'stumble'
		<i>nekiḷ</i>	'be flaccid'

Set IV	<i>aṭamku</i>	'be subdued'
	<i>toonRu</i>	'appear'
	<i>niiṭtu</i>	'extend'
	<i>vaaṭa</i>	'fade'

C. *Inherently transitive verb stems*

Set I	(x)	<i>uḷu</i>	'plough'
		<i>toḷu</i>	'worship'
		<i>aaḷ</i>	'keep'
		<i>koḷ</i>	'have'
	(y)	<i>kol</i>	'kill'
		<i>veḷ</i>	'conquer'
	(z)	<i>keeḷ</i>	'hear'
		<i>veeḷ</i>	'desire'
Set II		<i>aḷa</i>	'measure'
		<i>kala</i>	'mix'
		<i>aRi</i>	'know'
		<i>ikaḷ</i>	'revile'
Set III		<i>tuy</i>	'enjoy'
		<i>paḷi</i>	'blame'
		<i>poRu</i>	'bear'
Set IV		<i>eytu</i>	'attain'
		<i>tuuRRu</i>	'reproach'
		<i>paruku</i>	'drink'

D. *Inherently transitive verb stems which can be transformed into ditransitive*

Set I	(x)	<i>teruḷ</i>	'be clear'
	(y)	<i>akal</i>	'leave'
		<i>payil</i>	'be acquainted'

	(z)	<i>kaaṇ</i>	'see'
		<i>puuṇ</i>	'wear'
Set II	(x)	<i>kiḷa</i>	'utter'
		<i>cuma</i>	'bear'
	(y)	<i>uṇar</i>	'perceive'
		<i>puṇar</i>	'embrace'
Set IV		<i>arumtu</i>	'eat'
		<i>kūuṭu</i>	'join'
		<i>porumtu</i>	'unite'

E. *Inherently ditransitive verb stems*

Set I	(x)	<i>cey</i>	'do'
		<i>pey</i>	'place'
	(y)	<i>navil</i>	'say'
Set II	(x)	<i>paya</i>	'yield'
		<i>aṇi</i>	'wear'
	(y)	<i>moḷi</i>	'say'
Set III		<i>aḷi</i>	'destroy'
		<i>urai</i>	'say'
		<i>koṭu</i>	'give'
Set IV		<i>aruḷ</i>	'bestow'
		<i>eḷutu</i>	'write'
		<i>kūuRu</i>	'tell'

2.4.1.3.1. The transitive tagmeme occurs in the first order postposed to the stem tagmeme. Following the transitive, the causative occurs in the second order. The tense tagmeme, gerund tagmeme, verbal noun₁ tagmeme, verbal noun₂ tagmeme, the negative and agentive occur in the third order. Tense tagmeme includes past and future. The augmentative tagmeme,

infinitive tagmeme, conditional gerund tagmeme, relative participle tagmeme, optative tagmeme and imperative tagmeme occur in the fourth order. The person tagmeme which comprises of first, second and third person occurs in the fifth order. The number tagmeme occurs in the final order. It includes singular, plural, masculine singular, feminine singular, gender plural and non-gender singular and plural. The following chart will represent the distributional order of the constituted tagmemes of verb class.

CHART 6

	I	II	III	IV	V	VI
<i>S</i>	<i>Tr</i>	<i>Cau</i>	<i>Pa te</i>	<i>Aug</i>	<i>I P</i>	<i>Sg</i>
<i>T</i>			<i>Fu te</i>	<i>Inf</i>	<i>II P</i>	<i>Pl</i>
<i>E</i>				<i>Con Gr</i>	<i>III P</i>	<i>Ma Sg</i>
<i>M</i>			<i>Gr</i>	<i>R P</i>		<i>Fe Sg</i>
			<i>V N₁</i>	<i>Opt</i>		<i>Ge Pl</i>
			<i>V N₂</i>	<i>Imp</i>		<i>N Ge Sg</i>
			<i>Neg</i>			<i>N Ge Pl</i>
			<i>Ag</i>			

2.4.1.4.0 Allosyntagmas

As the agentive, periphrastic conditional gerund, causative, negative and passive are not having the two-fold minimal contrast, they are treated as etic variants of emic construction types, i.e. allosyntagmas.

Agentive noun is an etic variant of verbal noun₂. E.g.

kolli

‘killer’

(306)

The Periphrastic conditional gerund (a combination of relative participle and noun) is treated as an allosyntagma of the conditional gerund. E.g.

kaaṇaakkaal 'if (I) do not see' (1286)

The causative is an allosyntagma of transitive. E.g.

aRivippa 'will announce : they' (1233)

The negative constructions derived from affirmatives by employing the negative morpheme are treated as allosyntagmas of the corresponding affirmative constructions. E.g.

kaaṇaar 'see not : they' (1220)

collaRka 'let not (one) say' (200)

nillanmin 'stand not (you pl)' (771)

ponRaatu 'without perishing' (233)

kaaṇaata '(who will) not see' (1219)

Passive constructions are derived from transitive and ditransitive verbs by employing the auxiliary */paṭu/*. Hence they are treated as etic variants of the corresponding emic constructions. E.g.

koḷappaṭṭeem 'have been trusted : we' (699)

ceyyappaṭum 'must be done' (335)

Since the two tenses, three persons and seven numbers constitute one tense tagmeme, one person tagmeme and one number tagmeme respectively any difference either in tense or person or number constitutes etic variants. The latter two are applicable to the descriptive verb class also.

Besides these variants the occurrence of the optional augmentative morpheme and any difference in the manifestation of the constituent tagmemes by the morphemic representation constitute allosyntagmas. The latter is applicable to all the other word classes.

2.4.1.5.0. **Morphophonemics**

The variant phonemic shapes of morphemes ■■ alternating phonemically or morphemically or fluctuating freely are described in this section. Phonemically alternate forms are symbolized with \sim . Morphemically alternate forms are symbolized with ∞ . Forms which vary freely with other forms are specifically stated.

2.4.1.5.1.1. Transitivizer = $\{-t-\} / \infty-t- \infty-tt- \infty-kk- \infty-p- \infty CC /$

$\infty -t-$ occurs after the stems of sets B I and B II (y). E.g.

<i>paku + t + t + u</i>	'having shared'	(322)
<i>tuyil + t + i + ϕ</i>	'having caused to sleep'	(1168)
<i>avi + t + t + aa + n</i>	'repressed : he'	(25)

$\infty -tt-$ occurs after the stems of sets B II (xy), D II (xy) and D III. E.g.

<i>cuma + tt + in + aa + r*</i>	'made to bear : they'	
<i>na\dot{t}a + tt + in + aa + r</i>	'made to walk : they'	
<i>puku + tt + i + ϕ</i>	'having thrust'	(616)
<i>u\dot{n}ar + tt + um</i>	'(which) will convince'	(1246)

$\infty -kk-$ occurs after the stems of the sets B II (y) and D II (z). E.g.

<i>a\dot{l}i + kk + um</i>	'(which) will destroy'	(934)
<i>a\dot{l}i + kk + al</i>	'the act of destroying'	(421)
<i>ceer + kk + um*</i>	'will unite'	

$\infty -p-$ occurs after the stems of sets B II (y) and before future $/-p- /$. E.g.

<i>a\dot{l}i + p + p + a + tu</i>	'will destroy : it'	(744)
--	---------------------	-------

∞CC occurs with the stems of sets B IV and D IV in this form.

(C)V...(N) S *u* → (C) V...SS *u*

(N)asal = *m*, *n*, and *ŋ*

(S)top = *k*, *p*, *t*, *R* and *ʔ*

E.g. *peruku* → *perukku*

Perukku + *i* + ϕ 'having extended' (512)

maaRu → *maaRRu*

maaRRu + *v* + *aa* + *r* 'will change : they' (225)

vaaʔu → *vaaʔʔu*

vaaʔʔu + *v* + *aa* + *r** 'will cause to fade : they'

naʔumku → *naʔukku*

naʔukku + ϕ 'perturbance' (654)

kuumpu → *kuuppu*

kuuppu + *i* + ϕ 'having worshipped' (260)

aʔumtu → *aʔuttu*

aʔuttu + *i* + ϕ * 'having pressed'

toonRu → *tooRRu*

tooRRu + *am* 'appearance' (272)

iiŋʔu → *iiʔʔu*

iiʔʔu + *i* + *a* '(which) was acquired' (1009)

2.4.1.5.2.1. Causative = { -*vi*- } / ∞ -*vi*- ∞ -*pi*- /

∞ -*vi*- occurs with stems of sets I (y) and IV in morphemic juncture and freely varies with / -*pi*- / with stems of sets I (x) and II (yz). E.g.

aRi + *vi* + *pp* + *a* + ϕ 'will announce : they' (1233)

∞ -*pi*- occurs elsewhere. E.g.

naya + *pi* + *tt* + *aa* + *r* 'convinced : they' (1189)

2.4.1.5.3.1. Past tense = { -*t*- } / ∞ -*t*- ∞ -*tt*- ∞ -*mt*- ∞ - ϕ -
∞ -*i*- ∞ -*in*- /.

∞ -*t*- occurs after the stems of set I or after transitive / -*t*- / and before relative participle / -*a* / or augmentative / -*an*- / or any one of the person markers in the form of V or VV or infinitive / -*u* / or conditional gerund / -*aal* /. E.g.

<i>cey + t + a</i>	'(which) was done'	(1175)
<i>cey + t + aa + r</i>	'did : they'	(158)
<i>cey + t + a + tu</i>	'did : it'	(1240)
<i>cey + t + u</i>	'having done'	(118)
<i>uRu + t + a</i>	'(which) happened'	(261)
<i>uRu + t + an + a + ϕ</i>	'had : they'	(1179)
<i>taRu + t + u</i>	'having begirded'	(1023)
<i>uRu + t + aal</i>	'if (we) love'	(1245)
<i>cu\dot{t}u + t + a</i>	'(which) was burned'	(129)
<i>ke\dot{t}u + t + aa + n</i>	'vanished : he'	(967)
<i>vi\dot{t}u + t + ee + m</i>	'abandoned : we'	(1036)
<i>taku + t + a</i>	'(which) was deserved'	(580)
<i>taku + t + aa + r</i>	'deserved : they'	(897)
<i>toku + t + u</i>	'having gathered'	(545)
<i>u\dot{n} + t + a</i>	'(which) ate'	(930)
<i>u\dot{n} + t + aa + r</i>	'ate : they'	(259)
<i>u\dot{n} + t + u</i>	'having eaten'	(580)
<i>kal + t + ■</i>	'(which) was learned'	(398)
<i>kal + t + aa + r</i>	'learned : they'	(395)
<i>kal + t + u</i>	'having learned'	(399)
<i>vee\dot{t} + t + a</i>	'(which) was desired'	(1105)
<i>na\dot{t} + t + aa + r</i>	'befriended : they'	(808)
<i>pe\dot{t} + t + u</i>	'having desired'	(141)

<i>iin + t + a</i>	'(when) delivered'	(69)
<i>iin + t + aa + !</i>	'delivered : she'	(923)
<i>iin + t + u</i>	'having given'	(97)
<i>maRai + t + t + i + r</i>	'hid : you'	(1318)

∞ -*tt*- occurs after the stems of set III and before relative participle /-a/ or augmentative /-an-/ or any one of the person markers in the form of V or VV or infinitive /-u/. E.g.

<i>maṭu + tt + a</i>	'(which) turned'	(624)
<i>amar + tt + an + a + φ</i>	'fought : they'	(1084)
<i>kuḷi + tt + aa + ■</i>	'bathed : he'	(929)
<i>tani + tt + u</i>	'having singled'	(338)

∞ -*mt*- occurs after the stems of set II and before relative participle /-a/ or augmentative /-an-/ or any one of the person markers in the form of V or VV or infinitive /-u/ or conditional gerund /-aal/. E.g.

<i>iḷa + mt + a</i>	'(who) was lost'	(788)
<i>tiir + mt + an + φ + tu</i>	'left : it'	(612)
<i>iḷa + mt + ee + m</i>	'lost : we'	(593)
<i>iḷa + mt + u</i>	'having lost'	(1144)
<i>muṭi + mt + aal</i>	'if (it) end(s)'	(658)
<i>aRi + mt + a</i>	'(which) was known'	(1143)
<i>aRi + mt + aa + r</i>	'knew : they'	(399)
<i>aRi + mt + a + tu</i>	'knew : it'	(1226)
<i>aRi + mt + ee + n</i>	'knew : I'	(1083)
<i>aRi + mt + ■</i>	'having known'	(477)

∞ - ϕ - occurs between (C)VVy ending stems and before relative participle /-a/ or person markers in the form of V or

VV or infinitive $/-\phi/$ and $/-aa/$. E.g.

<i>aay + ϕ + a</i>	‘(which) became’	(1286)
<i>aay + ϕ + a + tu</i>	‘became : it	(12)
<i>aay + ϕ + aa + r</i>	‘became : they’	(106)
<i>aay + ϕ + ϕ</i>	‘having become’	(446)
<i>oor + ϕ + aa</i>	‘having considered’	(548)

∞ -i- occurs after the stems of set IV or after transitive $/-tt-/$ or $/-t-/$ and before relative participle $/-a/$ or person markers in the form of V or VV and infinitive $/-\phi/$. It freely varies with $/-in-/$ before person markers. E.g.

<i>toonRu + i + a</i>	‘(which) has appeared’	(1328)
<i>teeRu + i + aa + r</i>	‘convinced : they’	(1154)
<i>eṇṇu + i + a + ϕ</i>	‘considered : they’	(941)
<i>kuuRu + i + ϕ</i>	‘having said’	(183)
<i>naaṇu + in + a + ϕ</i>	‘ashamed : they’	(1231)
<i>eeRu + in + aa + r</i>	‘climbed : they’	(476)
<i>uṇar + tt + in + aa + r*</i>	‘convinced : they’	
<i>tuyil + t + i + ϕ</i>	‘having made to sleep’	(1168)
<i>niiḷ + t + i + ϕ</i>	‘having stretched’	(796)

∞ -in- occurs elsewhere. E.g.

<i>cuuṇu + in + ii + r</i>	‘wore : you’	(1313)
<i>uḷḷu + in + ee + n</i>	‘thought : I’	(1316)
<i>eytu + in + ϕ + tu</i>	‘attained : it’	(1240)
<i>uukku + ϕ + in</i>	‘if (they) energise’	(858)

2.4.1.5.3.2. Future tense = $\{-v-\}$ $/\infty-\phi-$ $\infty-um$ $\infty-m$ $\infty-un-$ $\infty-p-$ $\infty-pp-$ $\infty-v-$.

∞ - ϕ - occurs before first person /-ku-/, /-tu-/ and second person /-ti-/, /-aa-/. E.g.

urai + ϕ + *ku* + ϕ 'will say : I' (1181)

vaal + ϕ + *tu* + *m* 'will live : we' (971)

peRu + ϕ + *ti* + ϕ 'will get : you (sg)' (1237)

pootu + ϕ + *aa* + *y* 'will go : you (sg)' (1123)

∞ -*um*- occurs before relative participle /- ϕ / or word juncture and varies freely with /-*m*/. E.g.

varu + *um* + ϕ '(when) will come' (1223)

varu + *um* 'will come' (319)

caa + *m* + ϕ '(when) will die' (397)

poo + *m* 'will go' (659)

∞ -*un*- occurs after vowel and / \underline{l} / ending stems and before the third person /-*a*-/ where it freely varies with /-*v*-/. E.g.

ka \dot{a} ai + *un* + *a* + *r* 'removers' (897)

vaal + *un* + *a* + *m* 'will live : we' (1193)

ka \dot{a} ai + *v* + *a* + *tu* 'will remove : it' (788)

∞ -*p*- occurs after stems of sets I (z) or transitive /-*p*-/ and before relative participle /-*a*/ or the person markers in the form of V or VV. E.g.

kaan + *p* + *a* '(who) will see' (379)

un + *p* + *aa* + *r* 'will eat : they' (926)

paku + *p* + *p* + *a* + *r** 'will divide : they'

nool + *p* + *aa* + *r* 'will endure : they' (160)

∞ -*pp*- occurs after the stems of sets II (x) and III before relative participle /-*a*/ or the person markers in the form of

V or VV. E.g.

<i>urai + pp + a</i>	‘(which) will be said’	(232)
<i>urai + pp + a + tu</i>	‘will say : it’	(1184)
<i>urai + pp + aa + r</i>	‘will say : they’	(232)

∞ -v- occurs after the stems of sets I (xy), II (yz) and IV and before relative participle /-a/ or any one of the person markers in the form of V or VV. E.g.

<i>cey + v + a</i>	‘(which) will do’	(541)
<i>u<u>l</u>u + v + aa + r</i>	‘will plough : they’	(1032)
<i>uRu + v + aa + r*</i>	‘will have : they’	
<i>ko<u>l</u> + v + a + r</i>	‘will consider : they’	(680)
<i>ko<u>l</u> + v + aa + r</i>	‘will have : they’	(813)
<i>ko<u>l</u> + v + ee + m</i>	‘will have : we’	(976)
<i>cel + v + aa + r</i>	‘will go : they’	(1185)
<i>maay + v + a + r</i>	‘will perish : they’	(898)
<i>nalku + v + a + r</i>	‘will favour : they’	(1150)

2.4.1.5.3.3. Negative = {-aat-} / ∞ -aa- ∞ -aat- ∞ -φ- ∞ -a/- /.

∞ -aa- occurs before the infinitive /-mal/. E.g.

<i>cey + aa + mal</i>	‘without doing’	(313)
-----------------------	-----------------	-------

∞ -aat- occurs before infinitive /-u/ or relative participle /-a/ or third person markers in the form of VV. E.g.

<i>akal + aat + u</i>	‘without leaving’	(691)
<i>kal + aat + ■</i>	‘(which will) not learn’	(397)
<i>urai + aat + aa + r</i>	‘say not : they’	(650)

$\infty -\phi-$ occurs before relative participle $/-aa/$ or infinitive $/-aa/$ or person markers in the form of VV except $/-oo-/$. Eg.

uṇ + φ + aa ' (when will) not drink' (930)

kara + φ + aa 'without hiding' (527)

uṇar + φ + aa + y 'know not : you (sg)' (1246)

eḷutu + φ + ee + m 'draw not : we' (1127)

$\infty -al-$ occurs elsewhere. E.g.

niimku + al + a + r 'leave not : they' (1216)

cey + al + ka 'let not (one) do' (206)

en + al + φ 'let not (one) say' (196)

nil + al + min 'stand not (you. pl.)' (771)

2.4.1.5.3.4. Gerund = $\{-a\}$ $/\infty -a \infty -iya \infty -paakku \infty -\phi/$.
All are in free variation. E.g.

atir + ■ 'to tremble' (429)

kaaṭṭu + iya 'to show' (1313)

en + paakku 'to say' (1312)

en + a 'to say' (55)

aa + φ 'to become' (122)

pool + φ 'to resemble' (155)

aaku + a 'to become' (155)

pool + a 'to resemble' (151)

kaaṭṭu + a 'to show' (1171)

2.4.1.5.3.5. Verbal noun₁ = $\{tal\}$ $/\infty -aal \infty -ttal \infty -tal \infty -al/$.

$\infty -aal$ occurs after the stem *or-*. E.g.

or + aal 'the act of eschewing' (153)

∞ -*ttal* occurs after the stems of the sets ACE II (x) and III.
E.g.

<i>kaḷi + ttal</i>	‘the act of carousing’	(1282)
<i>kaa + ttal</i>	‘the act of protecting’	(632)
<i>urai + ttal</i>	‘the act of saying’	(1162)
<i>piRa + ttal</i>	‘the act of being born’	(681)
<i>aṇṇaa + ttal</i>	‘the act of opening’	(255)
<i>paya + ttal</i>	‘the act of yielding’	(202)

∞ -*tal* occurs after the stems of the sets I (z) or after transitive /-t-/ and it freely varies with /-al/ after the stems of the sets I (xy), II (yz) and IV. E.g.

<i>nool + tal</i>	‘the act of doing penance’	(269)
<i>maRai + t + tal</i>	‘the act of hiding’	(846)
<i>piri + t + tal</i>	‘the act of parting’	(633)
<i>aaku + tal</i>	‘the act of becoming’	(823)
<i>aaku + al</i>	‘the act of becoming’	(372)
<i>keṭu + tal</i>	‘the act of vanishing’	(208)
<i>keṭu + al</i>	‘the act of vanishing’	(612)
<i>uRu + tal</i>	‘the act of having’	(628)
<i>uRu + al</i>	‘the act of having’	(378)

2.4.1.5.3.6. Verbal noun₂ = {-vi} / ∞-i ∞-y ∞-val ∞-paari
∞-pai ∞-il ∞-uḷ ∞-alai ∞-kaaṭu ∞-ai ∞-avu ∞-ti ∞ D ∞ VL
∞-vu ∞-vi ∞-kai ∞-ci ∞-am ∞-ϕ ∞-puḷ.

∞ -*i* occurs after the stem *vekuḷ*. E.g.

<i>vekuḷ + i</i>	‘anger’	(526)
------------------	---------	-------

∞ -*y* occurs after the stem *noo*. E.g.

<i>noo + y</i>	‘distress’	(315)
----------------	------------	-------

∞ -*val* occurs after the stem *paar*. E.g.

paar + *val* 'look' (1152)

∞ -*paari* occurs after the stem *o* and varies freely with /-*pu*/. E.g.

o + *paari* 'resemblance' (1071)

o + *pu* 'resemblance' (800)

∞ -*pai* occurs after the stem *etir*. E.g.

etir + *pai* 'recompense' (221)

∞ -*il* occurs after the stems *miccu* and *eḷu*. E.g.

miccu + *il* 'remnant' (85)

eḷu + *il* 'rise' (407)

∞ -*uḷ* occurs after the stem *vikku* and varies freely with /-*vu*/ after the stem *viḷai*. E.g.

vikku + *uḷ* 'hiccup' (335)

viḷai + *uḷ* 'yield' (545)

viḷai + *vu* 'yield' (738)

∞ -*alai* occurs after the stem *toḷu* and varies freely with /-*pu*/ after the stem *paca*. E.g.

toḷu + *alai* 'wreath' (1135)

paca + *alai* 'pallor' (1183)

paca + *pu* 'pallor' (1184)

∞ -*kaaṭu* occurs after the stem *caa*. E.g.

caa + *kaaṭu* 'death' (780)

∞ -*ai* occurs after the stems *vil* and *kol* and the stems in the form of (C)VCu. It varies freely with /-*ti*/ after the stems *miku*, *paku*, and *taku*, with /-*kai*/ after the stem *uṭu*, with /-*avu*/ after

the stems *paku*, *taku* and with /-am/ after the stem *paku*. E.g.

<i>vil + ai</i>	'price'	(256)
<i>kol + ai</i>	'killing'	(325)
<i>naku + ai</i>	'smile'	(182)
<i>miku + ai</i>	'excess'	(504)
<i>miku + ti</i>	'evil'	(158)
<i>paku + ai</i>	'enmity'	(146)
<i>paku + ti</i>	'group'	(111)
<i>taku + ai</i>	'propriety'	(56)
<i>taku + ti</i>	'propriety'	(111)
<i>uŋu + ai</i>	'cloth'	(939)
<i>uŋu + kai</i>	'cloth'	(788)
<i>paku + ai</i>	'enmity'	(146)
<i>paku + avu</i>	'division'	(889)
<i>taku + ai</i>	'propriety'	(56)
<i>taku + avu</i>	'propriety'	(114)
<i>paaku + am</i>	'division'	(1092)

∞ -*avu* occurs after the stem *nalkuur*, *cel* and the stems in the form of (C)VCu. It is in free variation with /-ti/ and /VL/ after the stem *uŋ*, with /-pu/ after the stem *ira* and with /-am/ after the stem *ka*. E.g.

<i>nalkuur + avu</i>	'poverty'	(657)
<i>cel + avu</i>	'going'	(766)
<i>uŋu + avu</i>	'ploughing'	(1031)
<i>uŋ + avu</i>	'food'	(412)
<i>uun</i>	'food'	(939)
<i>nŋ + ti</i>	'food'	(945)

<i>ira + avu</i>	'begging'	(1064)
<i>ira + pu</i>	'begging'	(1053)
<i>ka! + avu</i>	'theft'	(287)
<i>ka! + am</i>	'deception'	(1184)

∞ -*ti* occurs after the stems in the form of (C)V*Cu* and the stems *vel* and *uŋ*. E.g.

<i>uRu + ti</i>	'counsel'	(796)
<i>ven + ti</i>	'victory'	(546)
<i>uŋ + ti</i>	'food'	(945)

∞ D (doubling) occurs with the stem *e!utu*. E.g.

<i>e!utu</i>	→ <i>e!uttu</i>	'letter'	(1)
--------------	-----------------	----------	-----

∞ VL (vowel length) occurs with following stems and it varies freely with /- ϕ / with the stem *ke!u* and with /- ϕ -, /-*vu*/ and /-*kai*/ after the stem *ko!*. E.g.

<i>ke!u</i>	→ <i>kee!u</i>	'destruction'	(165)
	<i>ke!u + ϕ</i>	'destruction'	(117)
<i>vi!u</i>	→ <i>vii!u</i>	'abandonment'	(791)
<i>no</i>	→ <i>noo</i>	'distress'	(157)
<i>peRu</i>	→ <i>peeRu</i>	'obtention'	(60)
<i>a!ukkaRu</i>	→ <i>a!ukkaaRu</i>	'envy'	(165)
<i>ko!</i>	→ <i>koo!</i>	'tenet'	(646)
	<i>ko! + vu</i>	'the act of having'	(1187)
	<i>ko! + kai</i>	'tenet'	(1019)

∞ -*vu* occurs after the stems in the form of (C)V*Ci* (except *kuRi*), (C)V*CVV* (except *iyai*) and after *y*, *r*, *l* and *!* ending stems. It is in free variation with /-*ci*/ after the stems *uŋar*,

puṇar and *taal*, with /-kai/ after the stem *vaal* and with /-φ/ after the stem *aRi*. E.g.

<i>muṭi + vu</i>	'end'	(640)
<i>citai + vu</i>	'destruction'	(597)
<i>aRi + vu</i>	'knowledge'	(140)
<i>aRi + φ</i>	'knowledge'	(638)
<i>ulai + vu</i>	'languishment'	(620)
<i>tooy + vu</i>	'touch'	(308)
<i>uy + vu</i>	'escape'	(896)
<i>caar + vu</i>	'prop'	(15)
<i>vaal + vu</i>	'life'	(50)
<i>vaal + kai</i>	'life'	(45)
<i>uṇar + vu</i>	'feeling'	(354)
<i>uṇar + ci</i>	'feeling'	(453)
<i>puṇar + vu</i>	'association'	
<i>puṇar + ci</i>	'association'	
<i>taal + vu</i>	'descent'	(117)
<i>taal + ci</i>	'delay'	(671)

∞ -vi occurs after the stem *kal* and the stems in the form of *CVVC* and *(C)VCa*. It freely varies with /-pu/ after the stems *piRa* and *maRa*. E.g.

<i>keel + vi</i>	'listening'	(413)
<i>kal + vi</i>	'learning'	(383)
<i>piRa³ + vi</i>	'birth'	(10)
<i>piRa + pu</i>	'birth'	(345)
<i>maRa + vi</i>	'forgetfulness'	(605)
<i>maRa + pu</i>	'forgetfulness'	(1125)

∞ -*kai* occurs after the following stems and varies freely with /- ϕ / after the stem *cey* and with /-*pu*/ after the stem *iyal*. Eg.

<i>iru + kai</i>	'seat'	(789)
<i>cey + kai</i>	'action'	(631)
<i>cey + ϕ</i>	'action'	(653)
<i>iyal + kai</i>	'nature'	(374)
<i>iyal + pu</i>	'nature'	(382)
<i>ii + kai</i>	'giving'	(221)

∞ -*ci* occurs after the stems ending in *r*, *l*, *!*, *!* and *n*. It is in free variation with /- ϕ / after the stem *maki!* and with /-*pu*/ after the stems *maan* and *kaan*. Eg.

<i>teer + ci</i>	'examination'	(635)
<i>muyal + ci</i>	'exertion'	(619)
<i>aa! + ci</i>	'rule'	(252)
<i>maki! + ci</i>	'rejoice'	(531)
<i>maki! + ϕ</i>	'rejoice'	(1090)
<i>kaan + ci</i>	'sight'	(386)
<i>kaan + pu</i>	'sight'	(16)
<i>maan + ci</i>	'loftiness'	(60)
<i>maan + pu</i>	'loftiness'	(53)

∞ -*am* occurs after the following stems and varies freely with /- ϕ / after the transitive /CC/. Eg.

<i>akal + am</i>	'width'	(743)
<i>u! + am</i>	'heart'	(438)
<i>uukku + 'am</i>	'energy'	(482)

<i>taṇṭu + am</i>	'punishment'	(567)
<i>eṇ + am</i>	'thought'	(494)
<i>cina + am</i>	'anger'	(305)
<i>eccu + am</i>	'remnant'	(238)
<i>kaṇṇooṇu + am</i>	'sympathy'	(571)
<i>tuukku + am</i>	'delay'	(668)
<i>accu + am</i>	'fear'	(146)
<i>aRu + am</i>	'end'	(421)
<i>iḷukku + am</i>	'blemish'	(133)
<i>varuttu + am</i>	'labour'	(468)
<i>tooRRu + am</i>	'appearance'	(124)
<i>viḷakku + am</i>	'lamp'	(601)
<i>viḷakku + φ</i>	'lamp'	(299)
<i>oḷukku + am</i>	'behaviour'	(131)
<i>oḷukku + φ</i>	'behaviour'	(148)

∞ -φ occurs after the following stems. E.g.

<i>alai + φ</i>	'affliction'	(551)
<i>aḷavaḷaavu + φ</i>	'intimacy'	(523)
<i>ikal + φ</i>	'hostility'	(851)
<i>iḷi + φ</i>	'infamy'	(970)
<i>tami + φ</i>	'loneliness'	(229)
<i>maaRu + φ</i>	'hostility'	(861)
<i>vaḷakku + φ</i>	'nature'	(992)
<i>aruppu + φ</i>	'sprouting'	(522)

∞ -*pu* occurs elsewhere. E.g.

o + pu 'resemblance' (800)

iyai + pu 'unison' (573)

kuRi + pu 'intention' (696)

2.4.1.5.3.7. Agentive = {-*i*} / ∞ -*i*/.

∞ -*i* occurs after the stem *kol*. E.g.

kol + i 'killer' (306)

2.4.1.5.4.1. Augmentative = {-*an-*} / ∞ -*an-*/.

∞ -*an-* occurs before person markers in the form of /*V*/ or /- ϕ -/. E.g.

kol + t + an + a + l 'had : she' (1315)

tiir + mt + an + ϕ + tu 'left : it' (612)

2.4.1.5.4.2. Infinitive = {-*u*} / ∞ - ϕ ∞ -*aa* ∞ -*mal* ∞ -*u*/.

∞ - ϕ occurs after past tense /-*i*-/ and freely varies with /-*aa*/ after past tense /- ϕ -/. E.g.

en + i + ϕ 'having thought' (467)

pooy + ϕ + ϕ 'having gone' (46)

oor + ϕ + aa 'having considered' (548)

∞ -*aa* occurs after negative /- ϕ -/ or past /- ϕ -/. E.g.

kara + ϕ + aa 'without hiding' (527)

oor + ϕ + aa 'having considered' (548)

\square -*mal* occurs after negative /-*aa*-/. E.g.

cey + aa + mal 'without doing' (313)

∞ -u occurs elsewhere. E.g.

karai + mt + u 'having cried' (527)

akal + aat + u 'without leaving' (691)

iin + t + u 'having given' (97)

2.4.1.5.4.3. Conditional gerund = {-aal} | ∞ -in ∞ - ϕ ∞ -il ∞ -aal|.

∞ -in occurs after past | ϕ -| and freely varies with | ϕ | and |il|. E.g.

un + ϕ + in 'if (one) eats' (945)

aan + ϕ + ϕ 'if (it) becomes' (128)

un + ϕ + il 'if (they) eat' (922)

∞ -aal occurs elsewhere. E.g.

mu ϕ i + mt + aal 'if (it) ends' (658)

2.4.1.5.4.4. Relative participle = {-a} | ∞ aa ∞ - ϕ ∞ -a|.

∞ -aa occurs after the negative | ϕ -|. E.g.

un + ϕ + aa '(when will) not drink' (930)

∞ - ϕ occurs after future |um| and freely varies with |a| after past |i-|. E.g.

varu + um + ϕ '(when) will come' (621)

keliii + ϕ + ϕ '(which) was closed' (816)

en + i + a '(which) was considered' (753)

∞ -a occurs elsewhere. E.g.

amar + mt + a '(which) was suited' (75)

akal + aat + a '(when will) not leave' (1226)

2.4.1.5.4.5. Optative = {-ka} | ∞ -i ∞ -iya ∞ - ϕ ∞ -ka|.

∞ -i occurs after the stem *vaa* and freely varies with /-iya/ and /-ka/. E.g.

<i>vaa</i> + <i>i</i>	'let (you) live'	(1118)
<i>vaa</i> + <i>iya</i>	'let (you) live'	(1200)
<i>vaa</i> + <i>ka</i>	'let (you) live'	(1312)

∞ - ϕ occurs after negative /-al-/ and freely varies with -ka/. E.g.

<i>ko</i> + <i>al</i> + ϕ	'let not (one) have'	(677)
<i>ko</i> + <i>al</i> + <i>ka</i>	'let not (one) have'	(798)

∞ -al occurs with all stems except *vaa* and it is in free variation with /-ka/. E.g.

<i>ko</i> + <i>al</i>	'let (one) have'	(677)
<i>ko</i> + <i>ka</i>	'let (one) have'	(875)

2.4.1.5.4.6. Imperative = {- ϕ } / ∞ - ϕ /.

∞ - ϕ occurs after the verb stems only in second person. E.g.

<i>urai</i> + ϕ	'say (you sg)'	(1151)
----------------------	----------------	--------

2.4.1.5.5.1. First person = {-ee-} / ∞ -ku- ∞ -tu- ∞ -aa- ∞ -a- ∞ -ee-/. E.g.

∞ -ku- occurs between future /- ϕ -/ and singular /- ϕ -/. E.g.

<i>urai</i> + ϕ + <i>ku</i> + ϕ	'will say : I'	(1181)
---	----------------	--------

∞ -tu- occurs between future /- ϕ -/ and plural /-m/ where it is in free variation with /-a-/. E.g.

<i>vaa</i> + ϕ + <i>tu</i> + <i>m</i>	'will live : we'	(956)
<i>ayarku</i> + ϕ + <i>a</i> + <i>m</i>	'will enjoy : we'	(1268)

∞ -aa- occurs between future /-v-/ and number markers where it is in free variation with /-a-/ and /-ee-/. E.g.

<i>tiir</i> + v + aa + m	'will remove : we'	(1063)
<i>peRuku</i> + v + a + m	'will get : we'	(1328)
<i>cey</i> + v + ee + n	'will do : I'	(1211)

∞ -a- occurs between future tense and number markers /-l/, /-n/ and /-m/. E.g.

<i>noo</i> + v + a + l	'will dislike : I'	(1236)
<i>ira</i> + pp + a + n	'will beg : I'	(1067)
<i>eṇṇu</i> + v + a + m	'will think : we'	(467)

∞ -ee- occurs elsewhere. E.g.

<i>iḷa</i> + mt + ee + m	'lost : we'	(593)
<i>eḷutu</i> + ϕ + ee + m	'draw not : we'	(1127)

2.4.1.5.5.2. Second person = {-ii-} / ∞ -ti- ∞ -ii- ∞ -i- ∞ -aa-/. E.g.

∞ -ti- occurs between future /- ϕ -/ and number markers /- ϕ / and /-r/. E.g.

<i>peRu</i> + ϕ + ti + ϕ	'will get : you (sg)'	(1237)
<i>aaku</i> + ϕ + ti + r	'will become : you (pl)'	(1319)

∞ -ii- occurs between past tense and plural /-r/ where it freely varies with /-i/. E.g.

<i>maRa</i> + mt + ii + r	'forgot : you (pl)'	(1316)
<i>maRai</i> + t + t + i + r	'hid : you (pl)'	(1318)

∞ -aa- occurs elsewhere. E.g.

<i>cel</i> + v + aa + y	'go : you (sg)'	(1248)
<i>pootu</i> + ϕ + aa + y	'go : you (sg)'	(1123)
<i>uṇar</i> + ϕ + aa + y	'know not : you' (sg)'	(1246)

2.4.1.5.5.3. Third person = {-aa-} /∞ -φ- ∞ -oo- ∞ -a- ∞ -aa/.

∞ -φ- occurs between augmentative /-an-/ or past /-in/ and non-gender singular /-tu/. E.g.

tiir + mt + an + φ + tu 'left : it' (612)

eytu + in + φ + tu 'attained : it' (1240)

∞ -oo- occurs between tense and gender number markers where it is in free variation with /-aa-/. E.g.

caan + t + oo + r 'the great' (656)

en + p + oo + r 'will say : they' (30)

en + p + aa + r 'will say : they' (365)

∞ -a- occurs between augmentative /-an-/ and number markers except non-gender /-tu/ and between tense or negative /-al-/ and number markers. E.g.

koṇ + t + an + a + ! 'had : she' (1315)

uRu + t + an + a + φ 'had : they' (1179)

amai + v + a + r 'will remain : they' (580)

niimku + al + a + r 'leave not : they' (1216)

iru + mt + a + tu 'remained : it' (1296)

aṭu + p + a + φ 'will conquer : they' (493)

∞ -aa- occurs elsewhere. E.g.

kaṇ + t + aa + n 'knew : he' (849)

kalamku + in + aa + ! 'wavered : she' (290)

aRi + v + aa + r 'will know : they' (427)

kaaṇ + aat + aa + n 'knows not : he' (849)

kaaṇ + φ + aa + n 'sees not : he' (859)

2.4.1.5.6.1. Singular = {-n} /∞ -l ∞ -y ∞ -φ ∞ -n/.

∞ -*l* occurs after first person /-*a*-/ preceded by future /-*v*-/ or /-*pp*-/. It is in free variation with /-*n*/ after /-*pp*-/. E.g.

noo + *v* + *a* + *l* 'will dislike : I' (1236)

pula + *pp* + *a* + *l* 'will sulk : I' (1259)

ira + *pp* + *a* + *n* 'will beg : I' (1067)

∞ -*y* occurs after second person /-*aa*-/. E.g.

cel + *v* + *aa* + *y* 'go : you (sg)' (1248)

unar + ϕ + *aa* + *y* 'know not : you (sg)' (1246)

∞ - ϕ occurs after first person /-*ku*-/ and second person /-*ti*-/. E.g.

urai + ϕ + *ku* + ϕ 'will say : I' (1181)

peRu + ϕ + *ti* + ϕ 'will get : you (sg)' (1237)

∞ -*n* occurs elsewhere. E.g.

kaan + ϕ + *ee* + *n* 'see not : I' (1286)

aRi + ϕ + *ee* + *n* 'know not : I' (1125)

2.4.1.5.6.2. Plural = {-*r*} / ∞ -*m* ∞ -*r* ∞ -*min*/

∞ -*m* occurs after first person markers except /-*ku*-/. E.g.

tiir + *v* + *aa* + *m* 'will remove : we' (1063)

vaal + ϕ + *tu* + *m* 'will live : we' (956)

peRuku + *v* + *a* + *m* 'will get : we' (1328)

nil + *p* + *ee* + *m* 'will remain : we' (1260)

∞ -*r* occurs after second person markers except /-*aa*-/. E.g.

maRa + *mt* + *ii* + *r* 'forgot : you (pl)' (1316)

maRai + *t* + *t* + *i* + *r* 'hid : you (pl)' (1318)

∞ -*min* occurs only in the imperative. E.g.

nil + al + min 'stand not (you.pl)' (771)

2.4.1.5.6.3. Masculine singular = {-*n*} / ∞ -*n*/.

∞ -*n* occurs after third person markers except /- ϕ -/. E.g.

kaa + pp + aa + n 'will protect : he' (301)

2.4.1.5.6.4. Feminine singular = {-*!*} / ∞ -*!*/.

∞ -*!* occurs after third person markers except /- ϕ -/. E.g.

a!u + t + aa + ! 'wept : she' (1317)

2.4.1.5.6.5. Gender plural = {-*r*} / ∞ - ϕ ∞ -*r*/.

∞ - ϕ occurs in free variation with /-*r*/ after third person /-*a*-/ preceded by future /-*p*-/. E.g.

en + p + a + ϕ 'will say : they' (75)

en + p + a + r 'will say : they' (88)

∞ -*r* occurs elsewhere. E.g.

i!i + pp + aa + r 'will admonish : they' (448)

i!a + pp + a + r 'will lose : they' (494)

2.4.1.5.6.6. Non-gender singular = {-*tu*} / ∞ -*tu*/.

∞ -*tu* occurs after third person /- ϕ -/ and /-*a*-/. E.g.

tiir + mt + an + ϕ + tu 'left : it' (612)

piRamku + in + ϕ + tu 'became excellent : it' (23)

ii + mt + a + tu 'gave : it' (1142)

2.4.1.5.6.7. Non-gender plural = {- ϕ } / ∞ - ϕ /.

∞ - ϕ occurs after third person /-*a*-/ and /-*aa*-/. E.g.

uRu + t + an + a + ϕ 'had : they' (1179)

ceer + ϕ + *aa* + ϕ 'unite not : they' (5)

varu + *p* + *a* + ϕ 'will come : they' (961)

kunRu + *v* + *a* + ϕ 'will diminish : they' (954)

2.4.1.5.7. Verb Stem Alternation

The stems of set I (x) ending in */Ru/*, */tu/* and */ku/* are having the following alternation before past */-t-/*. (cf. Subrahmanyam, P.S. 1971.)

$$(C)V \begin{Bmatrix} Ru \\ tu \\ ku \end{Bmatrix} + t \rightarrow (C)V \begin{Bmatrix} RR \\ tt \\ kk \end{Bmatrix}$$

E.g.

uRu + *t* + *u* \rightarrow *uR* + *R* + *u* 'having had' (75)

paṭu + *t* + *u* \rightarrow *paṭ* + *t* + *u* 'having happened' (555)

paku + *t* + *u* \rightarrow *pak* + *k* + *u* 'having split' (1068)

The stems of set I (yz) ending in */l/* and */ll/* are having the following alternation before past */-t-/*.

$$\{ l \} + t \rightarrow \begin{Bmatrix} nt \\ lt \end{Bmatrix}$$

$$\{ ll \} + t \rightarrow \{ nR \}$$

E.g. *kol* + *t* + *aa* + *r* \rightarrow *koṇṭaar* 'had : they' (253)

nal + *t* + *aa* + *r* \rightarrow *naṭṭaar* 'befrended : they' (805)

cel + *t* + *aa* + *r* \rightarrow *cenRar* 'went : they' (1278)

The stems of sets II (x) and III are having the following alternations before gerund */-a/* and conditional gerund */-in/*.

$$\text{Stem} \rightarrow \text{Stem} + \begin{Bmatrix} ppu \\ ku \end{Bmatrix}$$

E.g. *uyir* \rightarrow *uyirppu* + *a* 'to breathe' (763)

imai \rightarrow *imaippu* + *in* 'if (I) wink' (1126)

ira \rightarrow *irappu* + *a* 'to beg' (1212)

ira \rightarrow *irappu* + *in* 'if (one) begs' (1066)

iru \rightarrow *irukku* + \blacksquare 'to remain' (403)

uy → *uykku + in* 'if (one) enjoys' (440)

The stems of the same sets II (x) and III are having the following alternation before future */-um-/*.

Stem	→	Stem + <i>kku</i> .	E.g.
<i>uva</i>	→	<i>uvakku + um</i>	'will please' (69)
<i>alai</i>	→	<i>alaikku + um</i>	'(which) will vex' (735)

$\{(C)Vmcu\} / \infty (C)Vccu- \infty (C)Vmcu/$.

$\infty (C)Vccu-$ occurs before verbal noun */-am/* and */-il/*.

$\infty (C)Vmcu$ occurs elsewhere. E.g.

accu + am 'fear' (534)

amcu + ka 'let (one) fear' (882)

miccu + il 'remnant' (85)

$\{(C)VCVmpu\} / \infty (C)VCVppu \infty (C)VCVmpu/$.

$\infty (C)VCVppu$ occurs before verbal noun */-phi/*.

$\infty (C)VCVmpu$ occurs elsewhere. E.g.

viruppu + phi 'affection' (522)

*virumpu + in + aa + r** 'desired : they'

$\{amai\} / \infty amaiku- \infty amai/$.

$\infty amaiku-$ occurs before gerund */-a/*.

$\infty amai$ occurs elsewhere. E.g.

amaiku + a 'to set' (219)

amai + mt + u 'having set' (474)

$\{aRi\} / \infty aRiku- \infty aRi/$.

$\infty aRiku-$ occurs before gerund */-a/*.

∞aRi occurs elsewhere. E.g.

aRiku + a 'to know' (427)

aRi + vu 'knowledge' (123)

{*ii*} /∞ *iiku-* ∞ *ii*/.

∞ *iiku-* occurs before negative /-*al-*/.

∞ *ii* occurs elsewhere. E.g.

iiku + al + aa + n 'gives not : he' (863)

ii + tal 'the act of giving' (230)

{*oruvu*} /∞ *or-* ∞ *oruvu*'.

∞ *or-* occurs before verbal noun /-*aal*/.

∞ *oruvu* occurs elsewhere. E.g.

or + aal 'the act of eschewing' (153)

oruvu + tal 'the act of eschewing' (652)

{*kaatali-*} /∞ *kaatal* ∞ *kaatali-*/.

∞ *kaatal* occurs before verbal noun /-*φ*/.

∞ *kaatali-* occurs elsewhere. E.g.

kaatal + φ 'desire' (284)

kaatali + kkum '(which) will be loved' (940)

{*caa-*} /∞ *ce-* ∞ *caa* '.

∞ *ce-* occurs before past tense.

∞ *caa-* occurs elsewhere. E.g.

ce + tt + aa + r 'died : they' (926)

caa + tal 'the act of dying' (183)

{*cey*} /∞ *ceyku-* ∞ *cey*/.

∞ *ceyku-* occurs before gerund /-*a*/.

∞ *cey* occurs elsewhere. E.g.

ceyku + a 'to do' (26)

cey + t + aa + r 'did : they' (320)

{ *cel* } /∞ *ceel-* ∞ *cel*/.

∞ *ceel-* occurs before verbal noun /-*tal*/ and second person /-*ti-*/.

∞ *cel* occurs elsewhere. E.g.

ceel + tal 'the act of going' (1256)

ceel + φ + ti + φ 'go : you (sg)' (1244)

cel + v + aa + r 'will go : they' (1185)

{*ta-*} /∞ *ta-* ∞ *taru-*/.

∞ *ta-* occurs before past tense.

∞ *taru-* occurs elsewhere. E.g.

ta + mt + aa + ! 'gave : she' (1135)

taru + v + aa + r 'will give : they' (256)

{*tani-*} /∞ *tani-* ∞ *tami-*/.

∞ *tani-* occurs before past tense.

∞ *tami-* occurs elsewhere. E.g.

tani + tt + u 'having singled' (338)

tami + a + r 'of lonely : they' (229)

{*nalkuur*} /∞ *nalkur-* ∞ *nalkuur*/.

∞ *nalkur-* occurs before verbal noun /-*avu*/.

∞ *nalkuur* occurs elsewhere. E.g.

nalkur + avu 'poverty' (657)

nalkuur + mt + aa + r 'became poor : they' (1046)

{*no-*} /∞ *no-* ∞ *noo*/.

∞ *no-* occurs before past tense.

∞ *noo* occurs elsewhere. E.g.

no + mt + aa + r 'distressed : they' (1308)

noo + v + aa + r 'will suffer : they' (237)

{*paku*} /∞ *paaku-* ∞ *paku*/.

∞ *paaku-* occurs before verbal noun /-*am*/.

∞ *paku* occurs elsewhere. E.g.

paaku + am 'division' (1092)

paku + ti 'group' (111)

{*peRu*} /∞ *peRuku-* ∞ *peRu*/.

∞ *peRuku-* occurs before future /-*v-*/ followed by first person /-*a-*/.

∞ *peRu* occurs elsewhere. E.g.

peRuku + v + a + m 'will get : we' (1328)

peRu + φ + ti + φ 'will get : you (sg)' (1237)

{*muRuvali-*} /∞ *muRuval* ∞ *muRuvali-*/.

∞ *muRuval* occurs before verbal noun /-*φ*/.

∞ *muRuvali-* occurs elsewhere. E.g.

muRuval + φ 'tooth' (1113)

*muRuvali + tt + aa + !** 'smiled : she'

{*kaŋ*} /∞ *kaŋ* ∞ *kaaŋku-* ∞ *kaaŋ*/.

∞ *kaṇ* occurs before verbal noun / *φ*/ and past /-*t*-/.

∞ *kaaṇku*- occurs before future /-*φ*-/.

∞ *kaaṇ* occurs elsewhere. E.g.

kaṇ + *φ* 'eye' (1127)

kaṇ + *t* + *u* 'having seen' (580)

kaaṇku + *φ* + *a* + *m* 'will see : we' (1301)

kaaṇ + *a* 'to see' (1140)

{*varu*-} /∞ *va*- ∞ *vaar*- ∞ *varu*-/.

∞ *va*- occurs before past /-*mt*-/.

∞ *vaar*- occurs before negative.

∞ *varu*- occurs elsewhere. E.g.

va + *mt* + *aa* + *n* 'came : he' (530)

vaar + *φ* + *aa* '(which will) not come' (755)

varu + *tal* 'the act of coming' (642)

{*aa*} /∞ *aan* ∞ *aay* ∞ *aa* ∞ *aaku*/.

∞ *aan* occurs before past /-*φ*-/ in conditional gerund.

∞ *aay* occurs before past /-*φ*-/ in infinitive.

∞ *aa* occurs before gerund /-*a*/ and future /-*v*-/ and /-*φ*-/.
It freely varies with *aaku* before verbal noun /-*tal*/.

∞ *aaku* occurs elsewhere. E.g.

aan + *φ* + *aal* 'if (it) becomes' (53)

aan + *φ* + *φ* 'if (it) ecomes' (128)

aay + *φ* + *a* + *tu* 'become : it' (12)

aa + *φ* 'to become' (122)

aa + *v* + *a* + *r* 'will become : they' (1165)

<i>aaa + φ + tu + m</i>	'will become : we'	(653)
<i>aa + tal</i>	'the act of becoming'	(285)
<i>aaku + tal</i>	'the act of becoming'	(683)
<i>aaku + i + aa + r</i>	'became : they'	(1319)

{*poo*} /∞ *poo* ∞ *pooy* ∞ *pootu-* ∞ *pooku*/.

∞ *poo* occurs before future /-*m*/.

∞ *pooy* occurs before past /-*φ*-/.

∞ *pootu-* occurs before future /-*φ*-/.

∞ *pooku* occurs elsewhere. E.g.

<i>pooo + m</i>	'(when) will go'	(846)
<i>pooyo + φ + φ</i>	'having gone'	(46)
<i>pootu + φ + aa + y</i>	'go : you (sg)'	(1123)
<i>pooku + a</i>	'to go'	(831)
<i>pooku + φ + aa + r</i>	'-go not : they'	(1126)

2.4.2.1. Descriptive Verb Syntagmemes

2.4.2.1.1. Descriptive Indicative₁ syntagmeme (*D Ind*₁ = *St + p + nu*) consists of an obligatory stem tagmeme manifested by descriptive stems, an obligatory person tagmeme manifested by any one of the person morphemes and a number tagmeme manifested by any one of the number morphemes or number-gender morphemes. E.g.

<i>nal + a + r</i>	'good : they'	(403)
--------------------	---------------	-------

2.4.2.1.2. Descriptive Indicative₂ syntagmeme (*D Ind*₂ = *St*) consists of an obligatory stem tagmeme manifested by descriptive stem. E.g.

<i>illai</i>	'no'	(32)
<i>il</i>	'no'	(170)

2.4.2.1.3. Descriptive Infinitive syntagmeme ($DInf = St + inf$) consists of an obligatory stem tagmeme manifested by descriptive verb stems and an obligatory infinitive tagmeme manifested by infinitive morpheme. E.g.

ini + a 'sweetly' (824)

2.4.2.1.4. Descriptive Relative participle syntagmeme ($DRp = St + rp$) consists of an obligatory stem tagmeme manifested by descriptive stems and an obligatory relative participle tagmeme manifested by relative participle morpheme. E.g.

nal + *a* 'good' (1115)

2.4.2.1.5. Descriptive Verbal noun syntagmeme (*D V n* = *St + v n*) consists of an obligatory stem tagmeme manifested by descriptive stems and an obligatory verbal noun tagmeme manifested by verbal noun morpheme. E.g.

nal + am 'goodness' (458)

2.4.2.2.0. Syntagmemic Distinction

2.4.2.2.1. Descriptive indicative₁ versus other word types :

The criteria that syntagmatically distinguish indicative₁ from all other word types are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmeme.

2.4.2.2.2. Descriptive indicative₂ versus other word types:

The criteria that syntagmemically distinguish indicative₂ from descriptive infinitive are: (1) a difference in the number of obligatory tagmemes and (2) a difference in the optional selection.

By the same structural differences indicative₂ is distinct from descriptive verbal noun.

The criteria that syntagmemically distinguish indicative, from relative participle are: (1) ■ difference in the number of obligatory tagmemes and (2) ■ difference in distinct derivation.

2.4.2.2.3. *Descriptive infinitive versus other word types:*

The criteria that syntagmemically distinguish infinitive from relative participle are: (1) ■ difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation, i.e. negative relative participle may be derived from relative participle syntagmeme by employing negative morpheme. E.g.

<i>in + aat + a</i>	←	<i>ini + a</i>
'unpleasant (=bitter)'		'pleasant'

By the same structural differences relative participle and verbal noun can also be differentiated.

The criteria that syntagmemically distinguish infinitive from verbal noun are: (1) a difference in manifesting similar but distinct tagmemes and (2) ■ difference in the optional selection, i.e. verbal noun can take the case signs.

2.4.2.3.0. **Constituent Tagmemes of Descriptive Verbs**

2.4.2.3.1. The stem tagmeme occurs as an obligatory element in all construction types and are manifested by descriptive verb stems. All the other tagmemes which follow the stems are manifested by affixal morphemes. The descriptive verb stems can be classified on the basis of their potentiality of taking the objective case. But this distinction neither simplifies the morphophonemics nor constitutes emic classes of the descriptive verbs. Moreover the descriptive verb class is not a productive one. However a complete list of the descriptive verb stems is given in the glossary.

The verbal noun tagmeme and negative occur in the first order. The infinitive tagmeme and relative participle tagmeme occur in the second order. The person tagmeme which comprises of first, second and third person occurs in the third order. The number tagmeme occurs in the final order. It includes all the seven numbers which have been described in the verb class.

(Cf. 2.4.1.3.1). The following chart will present the distributional order of the constituent tagmemes of the descriptive verb class.

CHART - 7

	I	II	III	IV
<i>S</i>	<i>V N</i>	<i>Inf</i>	<i>I P</i>	<i>Sg</i>
<i>T</i>	<i>Neg</i>	<i>R P</i>	<i>II P</i>	<i>Pl</i>
<i>E</i>			<i>III P</i>	<i>Ma Sg</i>
<i>M</i>				<i>Fe Sg</i>
				<i>Ge Pl</i>
				<i>N Ge Sg</i>
				<i>N Ge Pl</i>

2.4.2.4.0. Allosyntagmas

2.4.2.4.1. The negative form of indicative₁ and relative participle are allosyntagmas of the corresponding affirmative forms. They are derived by employing the negative morpheme. E.g.

<i>in + φ + aa + tu</i>	←	<i>ini + φ + tu</i>
‘bitter : it’		‘sweet : it’
<i>in + φ + aa</i>	←	<i>ini + a</i>
‘bitter’		‘sweet’

The relative participle base (cf. 2.2.2.9.2.) is treated as an allosyntagma of the relative participle construction.

2.4.2.5.0. Morphophonemics

2.4.2.5.1.1. Verbal noun = {-am} | ∞ -am ∞ -an ∞ -ti
 ∞ -ku ∞ -pam ∞ -pu ∞ -ai ∞ -φ |

∞ -*am* occurs after the stem *nal* where it is in free variation with /-*an*/, /-*ti*/ and /-*ku*/. E.g.

nal + *am* 'goodness' (457)

nal + *an* 'goodness' (641)

nal + *ti* 'goodness' (67)

nal + *ku* 'goodness' (534)

∞ -*pam* occurs after the stems ending in /*n*/ and /*ṇ*/ and it is in free variation with /-*pu*/ after the stem *in*. E.g.

in + *pam* 'pleasure' (39)

in + *pu* 'pleasure' (75)

nun + *pam* 'minuteness' (636)

on + *pam* 'intelligence' (425)

∞ -*ai* occurs after the stem *tol*. E.g.

tol + *ai* 'oldness' (806)

∞ - ϕ occurs elsewhere. E.g.

ciir + ϕ 'valour' (778)

2.4.2.5.1.2. Negative = {-*aat*-} / ∞ - ϕ - ∞ -*aat*-/

∞ - ϕ - occurs before relative participle /-*aa*/ and varies freely with /-*aat*-/ before third person /-*aa*-/. E.g.

in + ϕ + *aa* 'bitter' (159)

in + ϕ + *aa* + *tu* 'bitter: it' (229)

il + *aat* + *aa* + *n* 'unpossessed : he' (614)

∞ -*aat*- occurs elsewhere. E.g.

il + *aat* + *n* 'unpossessed' (412)

2.4.2.5.2.1. Infinitive = $\{-a\}$ $/\infty -aal \infty -atu \infty -ti \infty -ku \infty -a/$.

$\infty -aal$ occurs after the stem $/al-/$ and varies freely with $/-atu/$ and $/-ti/$. E.g.

$al + aal$ 'without' (235)

$al + atu$ 'without' (231)

$al + ti$ 'besides' (437)

$\infty -ku$ occurs after the stem nal . E.g.

$nal + ku$ 'well' (513)

$\infty -a$ occurs elsewhere. E.g.

$mel + a$ 'gently' (562)

$ini + a$ 'sweetly' (824)

2.4.2.5.2.2 Relative participle = $\{-a\}$ $/\infty -aa \infty -a/$.

$\infty -aa$ occurs after negative $/-\phi-/$. E.g.

$in + \phi + aa$ 'bitter' (159)

$\infty -a$ occurs elsewhere. E.g.

$ciRi + a$ 'small' (963)

2.4.2.5.3.1. First person = $\{-ee\}$ $/\infty -ee- \infty -a-/$.

Both are in free variation before the number morphemes $/-n/$ and $/-m/$. E.g.

$u\dot{t}ai + ee + n$ 'possessed : I' (1133)

$u\dot{t}ai + ee + m$ 'possessed : we' (1250)

$u\dot{t}ai + a + m$ 'possessed : we' (844)

$il + a + n$ 'unpossessed : I' (223)

2.4.2.5.3.2. Second person = $\{-a-\}$ $/\infty -a-/$.

∞ -a- occurs before number singular /-i/. E.g.

val + a + i 'strong : you (sg)' (1118)

2.4.2.5.3.3. Third person = {-a-} / ∞ - ϕ - ∞ -a- ∞ -aa-
 ∞ -oo-/.

∞ - ϕ - occurs before non-gender singular /-tu/ where it is in free variation with /-a-/ and /-aa-/. E.g.

ari + ϕ + tu 'rare : it' (7)

ari + a + tu 'rare : it' (747)

in + ϕ + aa + tu 'bitter : it' (229)

The remainders freely vary before all number-gender morphemes except the non-gender plural. E.g.

uṭai + a + r 'possessed : they' (159)

uṭai + aa + r 'possessed : they' (430)

il + oo + r 'unpossessed : they' (59)

2.4.2.5.4.1. Singular = {-n} / ∞ -i ∞ -n'/.

∞ -i occurs after second person. Eg.

val + a + i 'strong : you (sg)' (1118)

∞ -n occurs after first person. E.g.

il + a + n 'unpossessed : I' (223)

uṭai + ee + n 'possessed : I' (1133)

2.4.2.5.4.2. Plural (cf. 2.4.1.5.6.2.) E.g.

uḷ + ee + m 'are : we' (1204)

2.4.2.5.4.3. Masculine singular (cf. 2.4.1.5.6.3.). E.g.

val + a + n 'strong : he' (647)

2.4.2.5.4.4. Feminine singular (cf. 2.4.1.5.6.4.) E.g.

uṭai + aa + ḷ 'possessed : she' (1089)

2.4.2.5.4.5. Gender plural (cf. 2.4.1.5.6.5.). E.g.

val + aa + r 'strong : they' (648)

2.4.2.5.4.6. Non-gender singular (cf. 2.4.1.5.6.6.). E.g.

ari + φ + tu 'rare : it' (7)

2.4.2.5.4.7. Non-gender plural (cf. 2.4.1.5.6.7.). E.g.

u! + a + φ 'are : they' (223)

2.4.2.5.5.0. Stem Alternation of the Descriptive Verbs

{*al*} /∞ *an-* ∞ *al*/.

∞ *an-* occurs before infinitive /-*ti*/ and third person /-*φ-*/.

∞ *al* occurs elsewhere. E.g.

an + ti 'besides' (437)

an + φ + tu 'not : it' (105)

al + a + r 'not : they' (880)

{*in*} /∞ *ini-* ∞ *in*/.

∞ *ini-* occurs before relative participle /-*a'*, infinitive /-*a*/ and varies with ∞ *in* before person markers. E.g.

ini + a 'sweet' (1065)

ini + ■ 'sweetly' (824)

ini + φ + tu 'sweet : it' (64)

ini + aa + r 'sweet : they' (1158)

∞ *in* occurs elsewhere. E.g.

in + φ + aa + tu 'bitter : it' (229)

{*u!*} /∞ *uη-* ∞ *u!*/.

∞ *uη-* occurs before third person /-*φ-*/.

$\infty u\downarrow$ occurs elsewhere. E.g.

$u\downarrow + \phi + tu$ 'is : it' (54)

$u\downarrow + a + \phi$ 'are : they' (223)

$\{e\downarrow i-\}$ / $\infty e\downarrow i-$ $\infty e\eta/$.

$\infty e\downarrow i-$ occurs before morphemic juncture.

$\infty e\eta$ occurs elsewhere. E.g.

$e\downarrow i + \phi + tu$ 'simple : it' (145)

$e\eta$ 'simple' (424)

$\{CVCi-\}$ / $\infty CVCi-$ $\infty CVCum/$.

$\infty CVCi$ occurs before morphemic juncture.

$\infty CVCum$ occurs before word juncture. E.g.

$ka\downarrow i + \phi + tu$ 'severe : it' (562)

$ka\downarrow um$ 'severe' (386)

$ko\downarrow i + \phi + \text{tu}$ 'cruel : it' (551)

$ko\downarrow um$ 'cruel' (1086)

$ne\downarrow i + \phi + tu$ 'extend : it' (943)

$ne\downarrow um$ 'vast' (566)

$\{ciRi\}$ / $\infty ciRi-$ $\infty ciRu$ '.

$\infty ciRi-$ occurs before morphemic juncture.

$\infty ciRu$ occurs before word juncture. E.g.

$ciRi + \phi + tu$ 'small : it' (102)

$ciRu$ 'small' (498)

$\{nal\}$ / ∞nan $\infty nal/$.

∞nan occurs before word juncture followed by stops.

∞ *nal* occurs elsewhere. E.g.

nan poru! 'good thing' (171)

nal + a + r 'good : they' (403)

{*nuŋ*} / ∞ *nuŋŋi-* ∞ *nuŋ*/.

∞ *nuŋŋi-* occurs before morphemic juncture.

∞ *nuŋ* occurs elsewhere. E.g.

nuŋŋi + ŋ + m 'minute : we' (710)

nuŋ 'minute' (407)

{*pacum*} / ∞ *pacum* ∞ *paim*/.

Both are in free variation before word juncture. E.g.

pacum 'greenish' (16)

paim 'greenish' (550)

{*piRi-*} / ∞ *piRi-* ∞ *piR-*/.

∞ *piRi-* occurs before third person /- ϕ /.

∞ *piR-* occurs elsewhere. E.g.

piRi + ϕ + tu 'other : it' (315)

piR + a 'other' (34)

{*pul*} / \sim *pul* \sim *pun*/.

\sim *pul* occurs before *V* and /*n*/ in word juncture.

\sim *pun* occurs elsewhere. E.g.

pul aRivu 'mean knowledge' (331)

pul nalam 'mean pleasure' (915)

pun keeŋmai 'mean friendship' (815)

{*vaRi-*} / ∞ *vaRi-* ∞ *vaRu*/.

∞ *vaRi-* occurs before morphemic juncture.

∞ *vaRu* occurs elsewhere. E.g.

vaRi + *aa* + *r* 'poor : they' (221)

vaRu + *mai* 'poverty' (934)

{*vaal*} / \sim *vaan* \sim *vaal*/.

\sim *vaan* occurs before stops in word juncture.

\sim *vaal* occurs elsewhere. E.g.

vaan 'whitish' (714)

vaal 'pure' (1121)

{*vili*} / ∞ *vilumi-* ∞ *vili*/.

∞ *vilumi-* occurs before morphemic juncture.

∞ *vili* occurs elsewhere. E.g.

vilumi + *aa* + *r* 'excellence : they' (201)

vili 'excellent' (162)

{*vey*} / ∞ *vey-* ∞ *vem*/.

∞ *vey-* occurs before third person /- ϕ -/.

∞ *vem* occurs elsewhere. E.g.

vey + ϕ + *tu* 'hot : it' (1128)

vem 'cruel' (563)

{*veli-*} / ∞ *veli-* ∞ *veli*/.

∞ *veli-* occurs before third person marker /-*aa*-/.

∞ *ve!* occurs elsewhere. E.g.

ve|i + aa + r 'ignorants' (714)

ve!mai 'whiteness' (844)

$(C)V Ci- \} / \sim (C)VVC \infty (C)V Ci- \sim (C)V Cum$
 $\sim (C)V Cu/.$

$\sim (C)VVC$ occurs before *V* in word juncture.

$\infty (C)V Ci-$ occurs before morphemic juncture.

$\sim (C)V Cum$ occurs before *C* in word juncture and it is in free variation with $\sim (C)V Cu$. E.g.

aar 'rare' (73)

kaar 'black' (287)

peer 'big' (148)

ari + ϕ + tu 'rare : it' (16)

kari + aa + r 'black : they' (277)

peri + aa + r 'the great' (896)

arum 'rare' (198)

perum 'big' (10)

ciRu poru! 'small wealth' (870)

$\{il\} / \infty in- \sim il \sim illai/.$

$\infty in-$ occurs before morphemic juncture.

$\sim il$ occurs before word juncture where it is in free variation with $\sim illai$. E.g.

in + ti 'without' (112)

il 'no' (170)

illai 'no' (61)

{*o!*} /∞ *o!i-* ~ *o!* ~ *oŋ*/.

∞ *o!i-* occurs before morphemic juncture.

~ *oŋ* occurs before stops in word juncture.

— *o!* occurs elsewhere. E.g.

o!i + a + r 'bright : they' (714)

oŋ toŋi 'bright bracelet' (1101)

o! vaal 'bright sword' (727)

{*kuuri-*} /∞ *kuuri-* ~ *kuurm* ~ *kuur*/.

∞ *kuuri-* occurs before morphemic juncture.

~ *kuurm* occurs before word juncture.

— *kuur* occurs elsewhere. Eg.

kuuri + a + tu 'sharp : it' (759)

kuurm 'sharp' (599)

kuur + mai 'sharpness' (997)

{*cem*} /∞ *cevvi-* ~ *cee* ~ *cem*/.

∞ *cevvi-* occurs before morphemic juncture.

~ *cee* occurs before *V* in word juncture.

~ *cem* occurs elsewhere. E.g.

cevvi + φ + tu 'upright : it' (279)

cee 'reddish' (1110)

cem 'perfect' (91)

{*mel*} /∞ *meli-* ~ *men* ~ *mel*/.

∞ *meli-* occurs before third person.

— *men* occurs before stops in word juncture.

~ *mel* occurs elsewhere. E.g.

meli + aa + r 'weak : they' (250)

men too! 'soft shoulder' (1103)

mel + a 'slowly' (562)

{*val*} / \sim *van* ∞ *vali-* \sim *val*/.

\sim *van* occurs before stops in word juncture.

∞ *vali-* occurs in morphemic juncture where it is in free variation with *val*.

\sim *val* occurs elsewhere. E.g.

van col 'harsh word' (99)

vali + aa + r 'strong : they' (861)

val + aa + r 'strong : they' (795)

val uruwam 'strong form' (273)

2.4.3.1. Noun Syntagmemes

2.4.3.1.1. Pronoun₁ ($Pn_1 = St + nu$) consists of an obligatory stem tagmeme manifested by stems of pronoun₁ and an obligatory number tagmeme manifested by any one of the number morphemes. E.g.

*naa + n** 'I' (1195)

naa + m 'we' (1123)

nii + ϕ 'you (sg)' (1320)

nii + r 'you (pl)' (82)

taa + n 'oneself' (158)

taa + m 'them'

2.4.3.1.2. Pronoun₂ syntagmeme ($Pn_2 = St + p + nu \pm d pl$) consists of an obligatory stem tagmeme manifested by stems of demonstrative, interrogative and collective pronouns, an obligatory person tagmeme manifested by third person morpheme, an obligatory number tagmeme manifested by any one of the

number-gender morphemes and an optional double plural tagmeme manifested by double plural morpheme. E.g.

<i>av + a + n</i>	'that : he'	(518)
<i>av + a + l</i>	'that : she'	(1279)
<i>av + φ + tu</i>	'that : it'	(38)
<i>av + a + i</i>	'that : they'	(658)
<i>iv + a + n</i>	'this : he'	(517)
<i>iv + a + l</i>	'this : she'	(1104)
<i>iv + a + r</i>	'this : they'	(790)
<i>i + φ + tu</i>	'this : it'	(37)
<i>iv + a + i</i>	'this : they'	(360)
<i>yaa + φ + r</i>	'who'	(256)
<i>yaa + φ + tu</i>	'which'	(178)
<i>el + aa + r</i>	'all : they'	(125)
<i>av + a + r + kał</i>	'that : they'	(263)

2.3.3.1.3. Determiner syntagmeme (*Det = St + det*) consists of an obligatory stem tagmeme manifested by stems of pronoun₂ and nouns and an obligatory determiner tagmeme manifested by determiner morpheme. E.g.

<i>el + aa</i>	'all'	(260)
----------------	-------	-------

2.4.3.1.4. Possessive noun syntagmeme (*Pos n = Co ± aug + p + nu*) consists of an obligatory core tagmeme manifested either by any one of the nouns except pronoun₂ or by verbal nouns, an optional augmentative tagmeme manifested by augmentative morpheme, an obligatory person tagmeme manifested by person morphemes and an obligatory number tagmeme manifested by any one of the number morphemes or number-gender morphemes E.g.

<i>tam + a + φ</i>	'of them : they'	(120)
--------------------	------------------	-------

<i>veel + aa + r</i>	'of lance : they'	(683)
<i>mutal + φ + tu</i>	'of the origin : it'	(1)
<i>keepu + a + n</i>	'of destruction : he'	(210)
<i>nalattu + aa + r</i>	'of goodness : they'	(915)
<i>taamarai + in + aa + !</i>	'of lotus : she'	(617)

2.4.3.2.0. Syntagmemic distinction

2.4.3.2.1. *Pronoun₁ versus other word types :*

The criteria that syntagmatically distinguish pronoun₁ from pronoun₂ are: (1) a difference in the number of obligatory tagmemes and (2) a difference in distinct derivation, i.e. possessive noun can be derived from pronoun₁.

<i>tama</i>	<=	<i>tam</i>
'of them : they'		'them'

The criteria that syntagmatically distinguish pronoun₁ from possessive noun are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

The criteria that syntagmatically distinguish pronoun₁ from determiner are: (1) a difference in the number of obligatory tagmemes and a difference in the selection of case signs.

2.4.3.2.2. *Pronoun₂ versus other word types :*

The criteria that syntagmatically distinguish pronoun₂ from possessive noun are: (1) a difference in manifesting similar but distinct tagmemes and (2) a difference in distinct derivation.

The criteria that syntagmatically distinguish pronoun₂ from determiner are: (1) a difference in the number of obligatory tagmemes and (2) a difference in manifesting similar but distinct tagmemes.

2.4.3.2.3. *Possessive noun versus determiner :*

The criterion that syntagmatically distinguishes possessive noun from determiner is: a difference of two in the number of obligatory tagmemes.

2.4.3.3.0. *Constituent tagmemes of nouns*

2.4.3.3.1. The stem tagmeme occurs as an obligatory element for all syntagmemes and it is manifested by noun stems. All the other tagmemes are manifested by affixal morphemes. The determiner tagmeme and person tagmeme occur in the first order. The number tagmeme occurs in the second order. It includes all the seven numbers which have been described in the verb class (cf 2.4.1.3.1). The double plural tagmeme occurs in the third order. The augmentative tagmeme occurs in the fourth order. The case signs postposed to the nouns, occur in the final order. They are Accusative, Instrumental, Sociative, Dative, Ablative, Comparative, Genitive, Locative and Vocative. The accompanying chart will present the distributional order of the constituent tagmemes of the noun class.

CHART - 8

	I	II	III	IV	V
<i>S</i>	<i>Det</i>	<i>Sg</i>	<i>D pl</i>	<i>Aug</i>	<i>Acc</i>
<i>T</i>	<i>III P</i>	<i>Pl</i>			<i>Ins</i>
<i>E</i>		<i>Ma Sg</i>			<i>Soc</i>
<i>M</i>		<i>Fe Sg</i>			<i>Dat</i>
		<i>Ge Pl</i>			<i>Abl</i>
		<i>N Ge Sg</i>			<i>Com</i>
		<i>N Ge Pl</i>			<i>Gen</i>
					<i>Loc</i>
					<i>Voc</i>

2.4.3.4.0. Allosyntagmas

2.4.3.4.1. The stems of the directional nouns (e.g.) *ten* 'south' (43), numeral nouns (e.g.) *oru* 'one' (156), demonstrative nouns (e.g.) *a* 'that' (225) and interrogative nouns (e.g.) *e* 'which' (30) are treated as allosyntagmas of determiner syntagmeme. They function as modifiers in the noun phrases. Appellative nouns (e.g.) *paarppaan* 'brahmin' (134) are treated as allosyntagmas of possessive noun. These appellative nouns are formed from the neuter nouns by employing the number markers. The neuter nouns may either be bound forms or potentially free forms. E.g.

<i>imtir + an</i>	→	<i>imtiran</i>	'Indra'	(25)
<i>cevil + i</i>	→	<i>cevili</i>	'foster mother'	(757)
<i>keel + ir</i>	→	<i>keelir</i>	'kindred'	(187)
<i>keel</i>			'friend'	(808)
<i>puttee! + ir</i>	→	<i>puttee!ir</i>	'celestials'	(58)
<i>puttee!</i>			'celestials'	(213)

The qualitative nouns (e.g.) *tanmai* 'nature' (511), *nanmai* 'goodness' (103), *poyymmai* 'the quality of lying' (292), *poyyaamai* 'the quality of not lying' (296) are treated as allosyntagmas of verbal noun₁. All the other nouns are treated as allosyntagmas of pronoun₁. They can be classified (cf. Shanmugam, S. V., 1971) into ten major classes with some minor subclasses. They do not however constitute emic classes. Anyhow a complete list of nouns is included in the glossary. Some representative examples are as follows:

I. Animate nouns

(a) Human nouns	<i>tamtai</i>	'father'	(70)
	<i>taay</i>	'mother'	(69)
	<i>makan</i>	'son'	(69)
(b) non-human nouns	<i>nari</i>	'fox'	(500)
	<i>kokku</i>	'heron'	(490)

II	Inanimate nouns	<i>maram</i>	'tree'	(78)
		<i>malai</i>	'mountain'	(124)
		<i>maḷai</i>	'rain'	(15)
III	Count nouns	<i>kaṇ</i>	'eye'	(71)
		<i>kal</i>	'stone'	(38)
IV	Mass nouns	<i>kuuḷ</i>	'gruel'	(64)
		<i>teen</i>	'honey'	(1121)
V	Collective nouns	<i>avai</i>	'assembly'	(719)
		<i>kuRumpu</i>	'anarchy'	(735)
VI	Numeral nouns	<i>onRu</i>	'one'	(87)
		<i>iraṇṇu</i>	'two'	(19)
VII	Directional nouns	<i>teRku*</i>	'south'	
VIII	Locational nouns	<i>il</i>	'house'	(81)
		<i>naaṭu</i>	'country'	(732)
IX	Temporal nouns	<i>naaḷ</i>	'day'	(38)
		<i>pakal</i>	'day'	(319)
X	Abstract nouns	<i>anpu</i>	'affection'	(45)
		<i>aarvam</i>	'desire'	(74)

2.4.3.5.0. Morphophonemics

2.4.3.5.1.1. Determiner = {-a} /∞ -aa ∞ -a/.

∞ -aa occurs after the noun stem *el*. E.g.

el + aa 'all' (260)

∞ -a occurs elsewhere. E.g.

mukattu + a 'faced' (500)

2.4.3.5.1.2. Third person = {-a-} /∞ -φ- ∞ -aa- ∞ -a-/.

$\infty -\phi-$ occurs before non-gender singular $/-tu-/$. E.g.

av + ϕ + *tu* 'that : it' (38)

iv + ϕ + *tu* 'this : it' (1161)

yaa + ϕ + *tu* 'which' (178)

$\infty -aa-$ occurs after the collective pronoun stem *el*. E.g.

el + *aa* + *r* 'all : they' (125)

$\infty -a-$ occurs elsewhere. E.g.

av + *a* + *n* 'that : he' (518)

av + *a* + *!* 'that : she' (1279)

av + *a* + *r* 'that : they' (65)

av + *a* + *i* 'that : they' (658)

2.4.3.5.2.1. Singular = $\{n\}$ $/\infty -\phi \infty -n/$.

$\infty -\phi$ occurs after the stem *nii*. E.g.

nii + ϕ 'you (sg)' (1123)

$\infty -n$ occurs elsewhere. E.g.

yaa + *n* 'I' (116)

e + *n* 'my' (771)

ni + ■ 'you (sg)' (1151)

taa + *n* 'oneself' (82)

ta + *n* 'oneself' (51)

2.4.3.5.2.2. Plural = $\{-m\}$ $/\infty -r \infty -m/$.

$\infty -r$ occurs after the stem *nii*. E.g.

nii + *r* 'you (pl)' (1320)

$\infty -m$ occurs elsewhere. E.g.

yaa + *m* 'we' (300)

<i>e + m</i>	'our'	(1126)
<i>naa + m</i>	'we'	(1195)
<i>na + m</i>	'our'	(1220)
<i>taa + m</i>	'they'	(158)
<i>ta + m</i>	'them'	(120)

2.4.3.5.2.3. Masculine singular = {-an} /∞ -aan ∞ -maan
∞ -van ∞ -n ∞ -an/.

∞ -aan occurs after the stem *paarpp-*. E.g.

<i>paarpp + aan</i>	'brahmin'	(134)
---------------------	-----------	-------

∞ -maan occurs after the stem *koo-*. E.g.

<i>koo + maan</i>	'king'	(25)
-------------------	--------	------

∞ -van occurs after /ai/ ending stems. E.g.

<i>iRai + van</i>	'God'	(778)
-------------------	-------	-------

∞ -n occurs after third person /-a-/. E.g.

<i>av + a + n</i>	'that : he'	(518)
-------------------	-------------	-------

<i>iv + ■ + n</i>	'this : he'	(517)
-------------------	-------------	-------

∞ -an occurs elsewhere. E.g.

<i>mak + an</i>	'man'	(196)
-----------------	-------	-------

<i>veemtu + an</i>	'king'	(389)
--------------------	--------	-------

2.4.3.5.2.4. Feminine singular = {-a!} /∞ -i ∞ -! ∞ -a!/.

∞ -i occurs after the stems *tool-* and *orutt-*. E.g.

<i>tool + i</i>	'confidente'	(1284)
-----------------	--------------	--------

<i>orutt + i</i>	'one : she'	(1313)
------------------	-------------	--------

∞ -! occurs after third person /-a-'. E.g.

<i>av + a + !</i>	'that : she'	(1217)
-------------------	--------------	--------

<i>iv + a + !</i>	'that : she'	(1104)
-------------------	--------------	--------

$\infty -a!$ occurs elsewhere. E.g.

*mak + a!** 'woman'

2.4.3.5.2.5. Gender plural = $\{-ar\}$ $/\infty -ka! \infty -ir \infty -r \infty -ar/$

$\infty -ka!$ occurs after the stems *mak-* and *maak-*. E.g.

mak + ka! 'people' (60)

maak + ka! 'people' (329)

$\infty -ir$ occurs after $/l/$ ending stems and freely varies with $/-ar/$ after $/u/$ ending stems. E.g.

puttee! + ir 'celestials' (58)

peṇṭu + ir 'women' (58)

aracu + ar 'kings' (381)

$\infty -r$ occurs after third person. E.g.

av + a + r 'that : they' (65)

iv + a + r 'this : they' (790)

yaa + ϕ + r 'who' (256)

el + aa + r 'all : they' (125)

$\infty -ar$ occurs elsewhere. E.g.

amtan + ar 'brahmins' (543)

amar + ar 'immortals' (121)

2.4.3.5.2.6. Non-gender singular = $\{-tu\}$ $/\infty -tu/$.

$\infty -tu$ occurs after third person $/-\phi-/$. E.g.

av + ϕ + tu 'that : it' (38)

a + ϕ + tu 'that : it' (36)

2.4.3.5.2.7. Non-gender plural = $\{-ka\}$ $/\infty -i \infty -ka!/$.

$\infty -i$ occurs after third person $/-a-/$. E.g.

av + a + i 'that : they' (360)

∞ -*ka!* occurs elsewhere. E.g.

puutam + ka! 'elements' (271)

2.4.3.5.3.1. Double plural = {-*ka!*} / ∞ -*ka!*/

∞ -*ka!* occurs after gender plural. E.g.

av + a + r + ka! 'that : they' (263)

2.4.3.5.4.1. Augmentative = {-*in-*} / ∞ -*ttu-* ∞ -*aRRu-*
 ∞ -*an-* ∞ -*in-*/.

∞ -*ttu-* occurs after nouns ending in -*m*. E.g.

nila + ttu 'earth' (28)

ku!aaa + ttu 'gathering' (840)

∞ -*aRRu-* occurs after demonstrative plural pronouns. E.g.

av + aRRu + u! (504)

∞ -*an-* occurs after singular demonstrative and interrogative pronouns and it freely varies with -*in-* after numeral nouns. E.g.

atu + an + aal 'that : it, by' (642)

itu + an + aal 'this : it, by' (517)

yaatu + an + in 'which : it, from' (341)

aimtu + an 'five' (343)

aimtu + in 'five' (27)

∞ -*in-* occurs elsewhere. E.g.

nucuppu + in + ku 'waist, for' (1115)

col + in + aal 'word, by' (825)

naa!tu + in + ku 'country, for' (737)

mana + ttu + in 'heart, by' (825)

av + aRRu + in 'them, from' (875)

2.4.3.5.5.0. *Case signs*

All the case signs except the vocative may occur after nouns or verbal nouns with or without the presence of the augmentative. But the vocative case sign is added directly to those nouns which can take the vocative case without the optional augmentative.

2.4.3.5.5.1. Accusative case = {-ai} /-ai/. E.g.

iRappu + in + ai 'transgression (Acc)' (152)

avan + ai 'that : he (Acc)' (518)

2.4.3.5.5.2. Instrumental case = {-aan} /∞ -aan ∞ -aal
∞ -u|i/

All are in free variation. E.g.

atu + an + aan 'that : it, by' (303)

atu + an + aal 'that : it, by' (642)

iyalpu + u|i 'nature, by' (545)

2.4.3.5.5.3. Sociative case = {-ooṭu} / ∞ -ooṭu ∞ -oṭu/.

Both are in free variation. Eg.

uṭampu + ooṭu 'body, with' (338)

uṭampu + oṭu 'body, with' (1122)

2.4.3.5.5.4. Dative case = {-ku} /∞ -akku ~ -ukku ~ -ku
~ -poruṭṭu/.

∞ -akku occurs after the oblique bases of all pronouns₁ (cf. 2.4.3.1.1.) E.g.

tan + akku 'oneself, for' (847)

en + akku 'me, for' (1151)

nam + akku 'us, to' (1195)

~ -ukku occurs after all consonants except /y, r/ and varies freely with /-ku/ and /-poruṭṭu/. E.g.

kanavin + ukku 'dream, to' (1211)

uṭal + ku 'body, for' (65)

tinal + poruṭṭu 'eating, for' (256)

— *-ku* occurs elsewhere.

2.4.3.5.5.5. Ablative case = {-*in*} /∞ -*in*/

nilai + in 'form, from' (124)

2.4.3.5.5.6. Comparative case = {-*in*} /∞ -*in* ∞ -*il*/.

Both are in free variation. E.g.

atan + in 'that : it, than' (152)

ampin + il 'arrow, than' (772)

2.4.3.5.5.7. Genitive case = {-*atu*} /∞ -*atu*/. E.g.

kiiḷkaḷ + atu 'the low, of' (1075)

2.4.3.5.5.8. Locative case = {-*il*} /∞ -*il* ∞ -*kaṇ* ∞ -*uḷ*

∞ -*maaṭṭu*/.

All are in free variation. E.g.

maṇi + il 'sapphire, at' (1273)

kuuṭal + kaṇ 'the act of embracing, at' (1284)

orumai + uḷ 'oneness, in' (126)

avar + maaṭṭu 'that : they, at' (1199)

2.4.3.5.5.9. Vocative case = {-*ee*} /∞ -*an* → *a* ∞ -*ai* → *aay* ∞ -*ee* ∞ -*ḷ*/.

∞ -*an* → ■ occurs with /-*an*/ ending noun stems except pronouns. E.g.

parattan → *paratta* 'O, debauchee' (1311)

∞ -*ai* → *aay* occurs with /-*ai*/ ending nouns. E.g.

paavai → *paavaay* 'O, woman' (1123)

∞ -ee occurs elsewhere in free variation with / ϕ /. E.g.

nemcu + *ee* 'O, heart' (1112)

nemcu + ϕ 'O, heart' (1200)

2.4.3.5.6.0. *possessive noun*

2.4.3.5.6.1.1. First person = {-a-} / ∞ -a- ∞ -ee-/.

∞ -a- occurs before number marker /-m/, where it is in free variation with /-ee-/. E.g.

kaatal + *a* + *m* 'of love : we' (1314)

naa! + *ee* + *m* 'of day : we' (1278)

2.4.3.5.6.1.2. Second person = {-a-} / ∞ -a- ∞ -i-/.

∞ -a- occurs before singular /-i'/. E.g.

niir + *a* + *i* 'of the nature : you (sg)' (1111)

∞ i- occurs before gender plural /-r/. E.g.

tev + *i* + *r* 'enemies' (771)

2.4.3.5.6.1.3. Third person = {-a } / ∞ - ϕ - ∞ -a- ∞ -aa- ∞ -oo-/.

∞ ϕ - occurs before non-gender singular, /*tu*/ where it is in free variation with /-a-/. E.g.

tiimai + ϕ + *tu* 'of evil : it' (450)

vankaṇ + *a* + *tu* 'of stubbornness : it' (764)

The remainders are in free variation before number-gender markers. E.g.

nuul + *aa* + *r* 'of treatise : they' (684)

nuul + *oo* + *r* 'of treatise : they' (94)

2.4.3.5.6.2.1. *Number markers*

As the distribution of the number markers of the possessive nouns are the same as the number markers in verb class (cf. 2.4.1.5.6.1. — 2.4.1.5.6.7.). Examples alone are given here. E.g.

<i>niir + a + i</i>	'of the nature : you (sg.)'	(1111)
<i>kaatal + a + m</i>	'of love : we'	(1314)
<i>kaṇ + aa + n</i>	'of eye : He'	(1103)
<i>niir + a + !</i>	'of the nature : she'	(1111)
<i>nuul + aa + r</i>	'of treatise : they'	(683)
<i>mutal + φ + tu</i>	'of the beginning : it'	(1)
<i>mutal + a + φ</i>	'of the beginning : they,	(1)

2.4.3.5.7.0. *Stem alternation of noun class*

The stems of the Pronoun₁ have the following alternation.

CVV occurs in the nominative base.

(C)V occurs in the oblique base.

First person :

Inclusive

<i>naa + m</i>	'we'	(1195)
<i>na + m</i>	'our'	(1220)

Exclusive

<i>yaa + n</i>	'I'	(116)
<i>yaa + m</i>	'I'	(300)
<i>e + n</i>	'my'	(771)
<i>e + m</i>	'our'	(1126)

Second person :

<i>nii + φ</i>	'you (sg.)'	(1123)
<i>nii + r</i>	'you (pl.)'	(1320)

<i>ni + n</i>	'your (sg)'	(1151)
<i>nu + m*</i>	'your (pl)'	

Reflexive :

<i>taa + n</i>	'oneself'	(82)
<i>taa + m</i>	'them'	(158)
<i>ta + n</i>	'oneself'	(51)
<i>ta + m</i>	'them'	(120)

The stems of the pronoun_s have the following alternation.

∞ *VC* occurs before third person.

∞ *VVC* occurs before word juncture followed by vowels.

∞ *V* occurs elsewhere. E.g.

<i>av + a + n</i>	'that : he'	(518)
<i>av + a + !</i>	'that : she'	(1279)
<i>av + a + r</i>	'that : they'	(65)
<i>av + φ + tu</i>	'that : it'	(38)
<i>av + a + i</i>	'that : they'	(658)
<i>iv + a + n</i>	'this : he'	(517)
<i>iv + a + !</i>	'this : she'	(1104)
<i>iv + a + r</i>	'this : they'	(790)
<i>iv + φ + tu</i>	'this : it'	(1161)
<i>iv + a + i</i>	'this : they'	(360)
<i>el + aa + r</i>	'all : they'	(125)
<i>aay</i>	'that'	(1179)
■	'that'	(225)
<i>i</i>	'this'	(247)

<i>u</i>	'back'	(620)
<i>e</i>	'which'	(30)

Numerals occur as nominative bases. Numeral bases occur as modifiers in noun phrases and appellative bases in morphemic juncture. Numeral bases have the following pattern of alternation.

VCVCC occurs before the number marker /-i/

CVCV occurs after numeral bases.

VV occurs before vowels in word juncture where it freely varies with *VVC*.

CVV occurs before morphemic juncture where it freely varies with *VCV*.

VVC occurs before consonants in word juncture where it varies freely with *VC*, *VCV* and *CVVC*. E.g.

<i>orutt + i</i>	'one : she'	(1313)
<i>eḷupatu</i>	'seventy'	(639)
<i>ai uṇarvu</i>	'five feelings'	(354)
<i>oor aaRu</i>	'one way'	(465)
<i>muu + ar</i>	'three : they'	(589)
<i>oru + ar</i>	'one : he'	(1004)
<i>iru + ar</i>	'two : they'	(1108)
<i>aim pulattu</i>	'five places'	(43)
<i>eṇ kuṇattaan</i>	'of eight characters : he'	(9)
<i>oru naaḷ</i>	'one day'	(1269)
<i>oor nooy</i>	'one disease'	(848)
<i>naal kuuRRu</i>	'four divisions'	(950)

(C)V*V*ṭu and (C)V*V*Ru ending stems have the following alternation in the oblique base of all cases except the vocative.

Nominative $(C)V\dot{V}\left\{\begin{smallmatrix} \dot{t} \\ R \end{smallmatrix}\right\}u \rightarrow (C)V\dot{V}\left\{\begin{smallmatrix} \dot{t} & \dot{t} \\ R & R \end{smallmatrix}\right\}u$ in oblique. E.g.

naaṭu 'country' (732)

naaṭṭin 'country, among' (736)

aaRu 'way' (161)

aaRRin 'way' (123)

-m ending nouns have the following alternation:

- (1) $(C)V\dot{C}V\dot{m}$ occurs as nominative base where it varies freely with $(C)V\dot{C}V\dot{n}$.

$(C)V\dot{C}V$ occurs in the oblique base. E.g.

aRam 'virtue' (23)

aRan 'virtue' (40)

kuṇam 'character' (9)

kuṇan 'character' (793)

mana + ttu 'heart' (34)

nila + ku 'earth, for' (570)

- (2) $(V)(V)\dot{C} \dots V\dot{m}$ occurs as the nominative base.

$(V)(V)\dot{C} \dots V$ occurs elsewhere.

aacaaram 'behaviour' (1075)

mamkalam 'goodness' (60)

puruvam 'eyebrows' (1086)

paakkiya + ttu 'good luck' (1141)

The following nouns are irregular in alternation.

aarval (74) *aarvam* 'desire' (71)

kaal (36) *kaalai* 'time' (937)

<i>kauvai</i>	(1143)	<i>kavvai</i>	'gossip'	(1144)
<i>naa!</i>	(326)	<i>naa!ai</i>	'day'	(156)
<i>nerunal</i>	(1048)	<i>nerunaRRu</i>	'yesterday'	(1278)
<i>peṇ</i>	(1083)	<i>peṇtu</i>	'woman'	(920)
<i>poḷutu</i>	(337)	<i>pooltu</i>	'time'	(412)

Roots

2.5.0. Roots are the minimum units (i.e. uninflected forms) which display neither internal grammatical structure nor contrastive types. Hence forms which are not expandable into word structure are discussed in this section. They are called *uriccol* and *iṭaiccol* (clitics) in the traditional grammars. They are broadly classified on the basis of their external distribution in higher levels.

2.5.1.1. The following *uriccols* manifest modifier tagmemes in the noun phrases.

<i>ati</i>	'much'	(636)
<i>am</i>	'beautiful'	(1107)
<i>uRu</i>	'much'	(498)
<i>kurai</i>	'expletive'	(1045)
<i>mallal</i>	'fertility'	(245)
<i>maa</i>	'big'	(245)
<i>viyan</i>	'wide'	(19)

2.5.1.2. The following *uriccols* manifest modifier tagmemes in verb phrases.

<i>ini</i>	'hereafter'	(1294)
<i>innum</i>	'furthermore'	(1263)
<i>kaḷi</i>	'very'	(866)
<i>tañcam</i>	'very'	(863)
<i>nani</i>	'very'	(403)
<i>mii</i>	'highly'	(386)

<i>val</i>	'quickly'	(582)
<i>katum</i>	'onomatopoeic'	(1173)
<i>tav</i>	„	(1144)
<i>puRku</i>	„	(1261)
<i>po!</i>	„	(487)

2.5.2.1. The following clitics manifest modifier tagmeme in verb phrases.

<i>u'an</i>	'entirely'	(309)
<i>uuumku</i>	'better'	(31)
<i>orumku</i>	'together'	(343)
<i>oruvamtam</i>	'definitely'	(563)
<i>ollai</i>	'quickly'	(563)
<i>vallai</i>	„	

2.5.2.2. The clitic *um* (coordinator) and the case signs (cf. 2.4.3.5.5.1-9) function as identifiers of the higher level tagmemes. The following clitics occur as closing particles in clause level.

<i>aal</i>	'expletive'	(91)
<i>ee</i>	'only, alone'	(25)
<i>oo</i>	'dubious'	(71)
<i>oorum</i>	'expletive'	(366)
<i>kol</i>	„	(85)
<i>maRRu</i>	„	(30)
<i>man</i>	„	(819)
<i>manRa</i>	'certainly'	(143)

2.5.2.3. The clitics *ooo* and *maRRu* manifest peripheral tagmemes in sentence level.

Phonemics

3.1.0. This section deals with the description of the phonemic structure of Tamil as represented in TirukkuRaI. The inventory of segmental and suprasegmental phonemes, their distribution and the syllable structure are discussed here. The basic unit of this analysis is a phonemic word bounded by any one of the junctures and the terminals. In stating the allophonic variations alone phonetic brackets [] have been used to denote the phonetic writing of the examples. All the other examples are given only in phonemic writing and hence they are unmarked.¹³

3.1.1. Twenty six segmental phonemes and four suprasegmental phonemes have been identified. Among segmental phonemes there are sixteen consonants and ten vowels. The consonants are as follows: six voiceless stops, four nasals, three laterals, one flap and two semivowels. The vowels are classified into high, mid and low. They are represented in the following diagram.

CHART 9

		Labial	Labio-dental	Dental	Alveo-palatal	Retro-flex	Palatal	Velar
Consonants	stops	<i>p</i>		<i>t</i>	<i>R</i>	<i>ʈ</i>	<i>c</i>	<i>k</i>
	Nasals	<i>m</i>			<i>n</i>	<i>ɳ</i>	<i>ɲ</i>	
	Laterals				<i>l</i>	<i>ɭ</i>	<i>ʎ</i>	
	Flap					<i>r</i>		
	Semivowels		<i>v</i>				<i>y</i>	
Vowels		Front		Central		Back		
	High	<i>i ii</i>				<i>u uu</i>		
	Mid	<i>e ee</i>				<i>o oo</i>		
	Low			<i>a aa</i>				

3.1.2. The bilabial nasal /*m*/, the alveopalatal nasal /*n*/ and the semivowel /*v*/ have more than one allophone and they are discussed below. All the other phonemes have only one allophone each.

/*m*/ [ɿ ɱ n m]

[*n*] Back dental voiced nasal occurs medially before the homorganic stop /*t*/, E.g.

[*kantʉ*] *kamtʉ* 'prop' (507)

[*ɲ*] Mid palatal voiced nasal occurs medially before the homorganic stop /*c*/, E.g.

[*neɽcu*] *nemcu* 'heart' (293)

[n] Velar voiced nasal occurs medially before the homorganic stop /k/. E.g.

[aṭanka] aṭamka 'to submit' (123)

[m] Bilabial voiced nasal occurs in all positions. E.g.

maṇi 'sapphire' (742)

kompar 'branch' (476)

akam 'heart' (277)

/n/ [n n]

[n] Back dental voiced nasal occurs initially and medially.
E.g.

[niṇam] niṇam 'fat' (1260)

[koḷunan] koḷunan 'husband' (55)

[ɳ] Alveopalatal voiced nasal occurs medially and finally.
E.g.

anpu 'affection' (77)

makan 'son' (70)

/v/ [°° v]

[°°] Labiodental slightly voiced continuant occurs medially only. E.g.

[e°°ku] evku 'weapon' (759)

[ka°°cu] kavcu 'quarter of an ounce' (1037)

[v] Labiodental voiced continuant occurs in all positions. E.g.

vilai 'price' (256)

avir 'shining' (1117)

tev 'enemies' (639)

3.1.3. The diphthongs [ai] and [au] are treated as clusters of two vowels, viz., /a/ /i/ and /a/ /u/ respectively.

3.1.4. The four suprasegmental phonemes are as follows: two junctures and two terminals. Open juncture is marked with space and the close juncture is marked with a plus sign. E.g.

kaRka kacaṭaRa (391)

‘Let one learn without faults’

kaRka kacaṭaRa+ kaRpavai (391)

‘Let one learn that are worth learning without faults’

Simple terminal and falling terminal are marked by /./ /./ respectively. E.g.

iRamtamaimta caarpuṭaiyar, aayinum (900)

‘Even if they have endless supports’

kayavar tiruvuṭaiyar. (1072)

‘The mean people are lucky’

caarpuṭaiyar, (900)

‘Those who have support’

tiruvuṭaiyar. (1072)

‘Those who possess goodness’

3.2.0.0. Consonantal Distribution

Among the consonants /p t c k m n ñ v y/ are found to occur in the initial position. There is no restriction as far as the medial position, is concerned, i. e. all consonants have medial distribution. The consonants /m n ñ l ʃ ʈ r v y/ occur in the final position. In other words the phonemes /p t c k ñ/ alone occur both initially and medially. The phonemes /ñ l ʃ ʈ r/ occur medially and finally. The phonemes /m n v y/ occur in all positions. But the phonemes /R ʈ/ occur only medially. Altogether there are fifty five double consonant clusters and sixteen triple consonant clusters. Except

the cluster /rm/ which occurs medially and finally, all other clusters either double or triple occur medially only in inter-vocalic positions. All these distributional features are represented in the accompanying charts at the end of this section.

3.2.1.1. *Initial Distribution:*

/p/ occurs before all vowels in the initial position. E.g.

<i>pirivu</i>	'parting'	(1152)
<i>peṇ</i>	'woman'	(56)
<i>paṇ</i>	'melody'	(573)
<i>poRai</i>	'patience'	(153)
<i>puṇai</i>	'float'	(1134)
<i>pīḷu</i>	'greatness'	(968)
<i>peetai</i>	'simpleton'	(816)
<i>paal</i>	'milk'	(1000)
<i>pootu</i>	'bud'	(1227)
<i>puucal</i>	'clamour'	(1237)

/t/ occurs before all vowels in the initial position. E.g.

<i>timkaḷ</i>	'moon'	(1146)
<i>teyvam</i>	'God'	(55)
<i>takar</i>	'ram'	(486)
<i>toṭi</i>	'bracelet'	(1234)
<i>tukil</i>	'cloth'	(1087)
<i>tiitu</i>	'evil : it'	(754)
<i>teeRal</i>	'the act of clearing'	(825)
<i>taamarai</i>	'lotus'	(1103)
<i>tooḷ</i>	'shoulder'	(1105)
<i>tuutu</i>	'message'	(681)

/c/ occurs initially before all vowels. E.g.

<i>citaivu</i>	'ruin'	(112)
<i>cettaan</i>	'died : he'	(1001)
<i>caman</i>	'evenness'	(118)
<i>col</i>	'word'	(66)
<i>cutai</i>	'plaster'	(714)
<i>ciir</i>	'fame'	(962)
<i>ceen</i>	'distance'	(1231)
<i>caayal</i>	'beauty'	(1183)
<i>coorvu</i>	'forgetfulness'	(531)
<i>cuutu</i>	'gambling'	(938)

/k/ occurs initially before all vowels. E.g.

<i>kiḷavan</i>	'possessor'	(1039)
<i>keṭu</i>	'adversity'	(117)
<i>kaṇam</i>	'minute'	(29)
<i>koRRam</i>	'victory'	(583)
<i>kuRRam</i>	'blemish'	(190)
<i>kiiḷ</i>	'low'	(973)
<i>keeṭu</i>	'destruction'	(32)
<i>kaatal</i>	'desire'	(284)
<i>kooṭu</i>	'branch'	(1264)
<i>kuuRRam</i>	'the god of death'	(269)

/m/ occurs before all vowels in the initial position. E.g.

<i>mikum</i>	'will exceed'	(373)
<i>mey</i>	'truth'	(300)
<i>maṇi</i>	'sapphire'	(742)

<i>moḷi</i>	‘word’	(28)
<i>mukam</i>	‘face’	(706)
<i>miin</i>	‘fish’	(931)
<i>meeni</i>	‘colour’	(1113)
<i>maaṭu</i>	‘wealth’	(400)
<i>mooppa</i>	‘to smell’	(90)
<i>muunRu</i>	‘three’	(682)

/n/ occurs before all vowels in the initial position. E.g.

<i>niṇam</i>	‘fat’	(1260)
<i>ney</i>	‘ghee’	(1148)
<i>nari</i>	‘fox’	(500)
<i>nomtu</i>	‘having suffered’	(157)
<i>nucuppu</i>	‘waist’	(1115)
<i>niikki</i>	‘having removed’	(384)
<i>neer</i>	‘equal’	(550)
<i>naakam</i>	‘cobra’	(763)
<i>nooy</i>	‘distress’	(359)
<i>nuuRu</i>	‘hundred’	(932)

/ṇ/ occurs initially before the long vowel *aa* only. E.g.

<i>ṇaalam</i>	‘world’	(484)
---------------	---------	-------

/v/ occurs before the short vowels /i e a/ and the long vowels /ii ee aa/. E.g.

<i>vilai</i>	‘price’	(256)
<i>veṇmai</i>	‘ignorance’	(844)
<i>vaḷam</i>	‘fertility’	(736)
<i>viiṭu</i>	‘abandonment’	(791)

<i>veel</i>	'lance'	(546)
-------------	---------	-------

<i>vaal</i>	'sword'	(614)
-------------	---------	-------

/y/ occurs initially before the long vowel */aa/* only. E.g.

<i>yaa</i>	'lute'	(66)
------------	--------	------

3.2.1.2. Medial Distribution :

/p/ occurs medially after the vowels */i u/* and all consonants except */t c k ñ v/*. E.g.

<i>iyai pu</i>	'unison'	(572)
----------------	----------	-------

<i>varupa</i>	'come : they'	(961)
---------------	---------------	-------

<i>oppu</i>	'resemblance'	(800)
-------------	---------------	-------

<i>kaRpinum</i>	'if (one) learn(s), even'	(373)
-----------------	---------------------------	-------

<i>naṭpu</i>	'friendship'	(106)
--------------	--------------	-------

<i>ampin</i>	'arrow, than'	(597)
--------------	---------------	-------

<i>anpu</i>	'affection'	(72)
-------------	-------------	------

<i>naṇpu</i>	'friendship'	(74)
--------------	--------------	------

<i>caalpu</i>	'nobility'	(956)
---------------	------------	-------

<i>aalpa</i>	'(who) will govern'	(1017)
--------------	---------------------	--------

<i>vaalpa</i>	'(who) will live'	(50)
---------------	-------------------	------

<i>caarpu</i>	'prop'	(900)
---------------	--------	-------

<i>caaypa</i>	'(who) will languish'	(927)
---------------	-----------------------	-------

/t/ occurs medially after all vowels and the consonants */t m l r v y/*. E.g.

<i>citaivu</i>	'ruin'	(112)
----------------	--------	-------

<i>etir</i>	'opposition'	(858)
-------------	--------------	-------

<i>atar</i>	'route'	(594)
-------------	---------	-------

<i>potu</i>	'general'	(528)
-------------	-----------	-------

<i>utavi</i>	'help'	(103)
<i>tiitu</i>	'evil : it'	(754)
<i>eetam</i>	'fault'	(136)
<i>aati</i>	'the antique'	(1)
<i>ooti</i>	'having learned'	(834)
<i>tuutu</i>	'message'	(681)
<i>pottu</i>	'defect'	(468)
<i>kamtu</i>	'prop'	(507)
<i>vaal_ltal</i>	'the act of living'	(1062)
<i>uur_ltal</i>	'the act of mounting'	(1136)
<i>avtu</i>	'that : it	(80)
<i>eytal</i>	'the act of attaining'	(540)

/R/ occurs medially after all vowels and the consonants /R n/. E.g.

<i>viR_l</i>	'the act of winning'	(180)
<i>teR_l</i>	'the act of destroying'	(264)
<i>aRu</i>	'six'	(560)
<i>poR_li</i>	'patience'	(154)
<i>uRu_li</i>	'counsel'	(638)
<i>viiRu</i>	'excellence'	(665)
<i>teeR_l</i>	'the act of clearing'	(825)
<i>aaRu_m</i>	'six, all'	(381)
<i>tooRu</i>	'time'	(1110)
<i>kuuRa_n</i>	'says not : he'	(181)
<i>kuRR_la_m</i>	'blemish'	(190)
<i>kunRa_m</i>	'hillock'	(898)

/ʈ/ occurs medially after all vowels and the consonants /ʈ ɳ/. E.g.

<i>iʈam</i>	‘place’	(821)
<i>keʈu</i>	‘adversity’	(117)
<i>aʈupa</i>	‘will conquer : they’	(493)
<i>koʈu</i>	‘having had’	(1264)
<i>uʈai</i>	‘cloth’	(939)
<i>pīiʈu</i>	‘greatness’	(968)
<i>keeʈu</i>	‘destruction’	(478)
<i>aaʈavar</i>	‘men’	(1003)
<i>kooʈu</i>	‘branch’	(1264)
<i>uuʈaʈ</i>	‘sulk’	(1326)
<i>īiʈʈam</i>	‘acquirement’	(1003)
<i>uṇʈu</i>	‘having eaten’	(322)

/c/ occurs medially after the short vowels /i a u/, the long vowels /aa oo uu/ and the consonants /R ʈ c m v/. E.g.

<i>īcai</i>	‘fame’	(231)
<i>acai</i>	‘flexing’	(1098)
<i>nucuppu</i>	‘waist’	(1115)
<i>aacu</i>	‘blemish’	(503)
<i>oocai</i>	‘sound’	(27)
<i>puucal</i>	‘clamour’	(1237)
<i>muyaRci</i>	‘exertion’	(611)
<i>maaʈci</i>	‘loftiness’	(750)
<i>accam</i>	‘fear’	(146)
<i>nemcu</i>	‘heart’	(293)
<i>kavcu</i>	‘quarter of an ounce’	(1037)

/k/ occurs medially after all vowels and consonants except /p t c ñ/. E.g.

<i>ikal</i>	'hostility'	(851)
<i>cekuttu</i>	'having killed'	(259)
<i>akam</i>	'heart'	(277)
<i>tokai</i>	'totality'	(711)
<i>ukaaamai</i>	'the quality of not revealing'	(585)
<i>iikai</i>	'giving'	(953)
<i>eekinaan</i>	'walked : He'	(3)
<i>aakal</i>	'the act of becoming'	(372)
<i>pookaar</i>	'go not : they'	(1126)
<i>kuukaiyai</i>	'owl'	(481)
<i>oRkattin</i>	'weariness'	(414)
<i>koṭka</i>	'to reveal'	(663)
<i>aakkam</i>	'wealth'	(31)
<i>aṭamka</i>	'to submit'	(123)
<i>enka</i>	'let (one) say'	(581)
<i>koṇkan</i>	'husband'	(1186)
<i>kolka</i>	'let (one) kill'	(879)
<i>koḷka</i>	'let (one) have'	(161)
<i>vaalḷka</i>	'let (you) live'	(1312)
<i>ayarkam</i>	'will enjoy : we'	(1268)
<i>evku</i>	'weapon'	(759)
<i>ceyka</i>	'let (one) do'	(759)

/m/ occurs medially after all vowels and the consonants /m n ṇ l r y/.

E.g.	<i>imaiyaar</i>	'wink not : they'	(906)
	<i>nemcu</i>	'heart'	(293)
	<i>ampinil</i>	'arrow, than'	(772)
	<i>kompar</i>	'branch'	(476)
	<i>numar</i>	'of you : they'	(1318)
	<i>tiimai</i>	'evil'	(143)
	<i>eemam</i>	'safety'	(766)
	<i>aamai</i>	'turtle'	(126)
	<i>oompu</i>	'avoid (you)!'	(1149)
	<i>kuumpal</i>	'the act of closing'	(425)
	<i>tummal</i>	'sneeze'	(1203)
	<i>inmai</i>	'nothingness'	(89)
	<i>onmai</i>	'intelligence'	(844)
	<i>cuulmtu</i>	'having deliberated'	(461)
	<i>niirmai</i>	'innocence'	(1272)
	<i>moympin</i>	'strength'	(492)

/n/ occurs medially after all vowels and after the consonant */n/* in gemination. E.g.

<i>inpu</i>	'pleasure'	(75)
<i>enpu</i>	'bone'	(77)
<i>anpu</i>	'affection'	(77)
<i>onRu</i>	'one'	(221)
<i>kunRu</i>	'hillock'	(758)
<i>iinRaal</i>	'delivered : she'	(656)
<i>meenmai</i>	'loftiness'	(137)
<i>aanRaar</i>	'full : they'	(413)
<i>toonRal</i>	'let (not) you appear'	(1119)

<i>uunRum</i>	'will establish'	(597)
<i>onnaar</i>	'join not : they'	(630)

/ŋ/ occurs medially after all vowels and after the consonant */ŋ/* in gemination. E.g.

<i>iŋar</i>	'bunch'	(650)
<i>veŋmai</i>	'ignorance'	(844)
<i>kaŋtaan</i>	'knew : he'	(849)
<i>koŋkan</i>	'husband'	(1186)
<i>kuŋam</i>	'trait'	(9)
<i>iinŋu</i>	'here'	(18)
<i>keŋi</i>	'well'	(396)
<i>kaaŋpaan</i>	'will see : he'	(99)
<i>tooŋi</i>	'boat'	(1068)
<i>tnuŋŋil</i>	'fish hook'	(931)
<i>eŋŋi</i>	'having considered'	(462)

/ñ/ occurs medially after the short vowels */i a u/*. E.g.

<i>ki aiñar</i>	'kindred'	(796)
<i>añar</i>	'grief'	(1086)
<i>uñarRRupa</i>	'(who) will exert'	(1024)

/l/ occurs medially after all vowels and after */l/* in gemination. E.g.

<i>cilar</i>	'few : they'	(270)
<i>celvam</i>	'wealth'	(241)
<i>kalam</i>	'vessel'	(1000)
<i>tolaivu</i>	'vanishment'	(806)
<i>pulam</i>	'field'	(85)

<i>piili</i>	'peacock's feather'	(475)
<i>veeloḻu</i>	'lance, with'	(552)
<i>kaalam</i>	'time'	(484)
<i>poolvar</i>	'will resemble : they'	(997)
<i>nuuloor</i>	'of treatise : they'	(941)
<i>allal</i>	'vexation'	(245)

/l/ occurs medially after all vowels except /uu/ and after /l/ in gemination. E.g.

<i>viḻakku</i>	'lamp'	(299)
<i>teḻivu</i>	'clarity'	(464)
<i>vaḻi</i>	'air'	(245)
<i>oḻi</i>	'light'	(27)
<i>poruḻaar</i>	'prostitutes'	(914)
<i>niiḻ</i>	'extending'	(234)
<i>keeḻir</i>	'lover'	(1267)
<i>aaḻka</i>	'let (one) keep'	(242)
<i>tooḻum</i>	'shoulder, and'	(1279)
<i>uḻam</i>	'heart'	(357)

/l/ occurs after all vowels in the medial position. E.g.

<i>nekiḻa</i>	'to be flaccid'	(1236)
<i>eḻili</i>	'cloud'	(17)
<i>aḻal</i>	'fire'	(1228)
<i>toḻuta</i>	'(which) was worshipped'	(828)
<i>uḻutu</i>	'having ploughed'	(1033)
<i>viiḻum</i>	'(who) will desire'	(1108)
<i>eeḻai</i>	'fool'	(873)

<i>vaal̥tal</i>	'the act of living'	(1158)
<i>tool̥i</i>	'O, confidante!'	(1284)
<i>uul̥ttum</i>	'having blossomed, even'	(650)

/r/ occurs medially after all vowels. E.g.

<i>iravu</i>	'begging'	(1064)
<i>eri</i>	'fire'	(435)
<i>aracarul̥</i>	'kings, among'	(381)
<i>oruvan</i>	'one : he'	(405)
<i>uram</i>	'strength'	(600)
<i>iiram</i>	'wet'	(91)
<i>ceerum</i>	'will reach'	(179)
<i>aarvam</i>	'desire'	(74)
<i>ooraar</i>	'consider not : they'	(695)
<i>uurum</i>	'will ride'	(1182)

/v/ occurs medially after all vowels except /o/ and the consonants /l ɭ ɭ̥ r v y/. E.g.

<i>ivar</i>	'this : they'	(790)
<i>evan</i>	'what'	(46)
<i>avir</i>	'shining'	(1117)
<i>uvakai</i>	'pleasure'	(531)
<i>viivar</i>	'will perish : they'	(289)
<i>eeval</i>	'command'	(515)
<i>aavan</i>	'will become : I'	(1207)
<i>oovaatu</i>	'without avoiding'	(933)
<i>tuuviyum</i>	'down, and'	(1120)
<i>celvam</i>	'wealth'	(241)

<i>keeṽi</i>	'listening'	(413)
<i>vaalvaar</i>	'will live : they'	(528)
<i>aarvam</i>	'desire'	(74)
<i>ovveem</i>	'resemble not : we'	(1114)
<i>teyvam</i>	'God'	(43)

/y/ occurs medially after all vowels and after /y/ in gemination. E.g.

<i>ariyar</i>	'rare : they'	(723)
<i>eytal</i>	'the act of attaining'	(540)
<i>kayal</i>	'fish'	(1212)
<i>poyttal</i>	'the act of lying'	(1287)
<i>uyir</i>	'life'	(940)
<i>iiyaatu</i>	'without giving'	(1002)
<i>teeyum</i>	'will dwindle'	(888)
<i>kaayvu</i>	'anger'	(1246)
<i>tooyvar</i>	'will embrace : they'	(917)
<i>tuuymai</i>	'purity'	(159)
<i>poyyaRka</i>	'let (him) not lie'	(293)

3.2.1.2.1. Triple consonant clusters are also found in the medial position. In the triple consonant clusters the phonemes /l r y/ occur always as first members. The second member is either the first member of any one of the following geminates /pp tt cc kk mm/ or /m/. The third member is either the second member of any one of the above mentioned geminates or /p/ or /t/. E.g.

<i>kaalppa</i>	'to grow'	(760)
<i>uuṽttum</i>	'having blossomed, even'	(650)
<i>ikaṽcci</i>	'revilement'	(995)

<i>vaalkkai</i>	'life'	(435)
<i>ikałmtu</i>	'having reviled'	(1057)
<i>uyirppa</i>	'to breathe'	(763)
<i>uyirttu</i>	'having smelt'	(1101)
<i>teercci</i>	'investigation'	(635)
<i>aarkkum</i>	'(which) will fasten'	(482)
<i>teermtu</i>	'having searched'	(541)
<i>vaayppa</i>	'to avail'	(948)
<i>uyttal</i>	'the act of directing'	(1287)
<i>teeykkum</i>	'(which) will file'	(567)
<i>poymmai</i>	'the quality of lying'	(913)
<i>moympu</i>	'strength'	(492)
<i>aaymtu</i>	'having examined'	(795)

3.2.1.3. *Final Distribution:*

/m/ occurs finally after all vowels except */ii uu/* and after the consonant */r/*. E.g.

<i>paim</i>	'greenish'	(550)
<i>em</i>	'our'	(1126)
<i>akam</i>	'heart'	(277)
<i>pooom</i>	'will go'	(1070)
<i>oořum</i>	'(which) will run'	(496)
<i>avaam</i>	'(which) will desire'	(215)
<i>eem</i>	'madness'	(873)
<i>poom</i>	'will go'	(659)
<i>iirm</i>	'wet'	(1058)

/n/ occurs finally after all vowels. E.g.

<i>kaanin</i>	'if (one) see(s)'	(488)
<i>ten</i>	'south'	(43)
<i>makan</i>	'man'	(196)
<i>pon</i>	'gold'	(155)
<i>pun</i>	'scanty'	(71)
<i>miin</i>	'fish'	(931)
<i>teen</i>	'honey'	(1121)
<i>taan</i>	'oneself'	(206)
<i>caanRoön</i>	'the great one'	(69)
<i>uun</i>	'flesh'	(251)

/ŋ/ occurs finally after all vowels except /ii oo/. E.g.

<i>viŋ</i>	'rain'	(13)
<i>eŋ</i>	'eight'	(9)
<i>paŋ</i>	'melody'	(573)
<i>oŋ</i>	'bright'	(760)
<i>puŋ</i>	'sore'	(129)
<i>ceēŋ</i>	'distance'	(1231)
<i>naaŋ</i>	'shyness'	(502)
<i>tuuŋ</i>	'pillar'	(983)

/l/ occurs finally after all vowels except /ii/. E.g.

<i>tuyil</i>	'sleep'	(605)
<i>cel</i>	'going'	(86)
<i>pakal</i>	'day'	(481)
<i>tol</i>	'old'	(762)
<i>pul</i>	'grass'	(16)

<i>veel</i>	'lance'	(546)
<i>kaal</i>	'leg'	(500)
<i>tool</i>	'skin'	(80)
<i>nuul</i>	'treatise'	(373)

/l/ occurs finally after the short vowels */e a o u/* and all long vowels except */uu/*. E.g.

<i>teḷ</i>	'clear'	(1065)
<i>niiraḷ</i>	'of the nature : she'	(1111)
<i>oḷ</i>	'bright'	(727)
<i>muḷ</i>	'thorn'	(879)
<i>niiḷ</i>	'extending'	(234)
<i>putteeḷ</i>	'celestials'	(966)
<i>taaḷ</i>	'foot'	(2)
<i>tooḷ</i>	'shoulder'	(149)

/l/ occurs finally after the short vowels */i a/* and the long vowels */ii aa uu/*. E.g.

<i>makiḷ</i>	'pleasure'	(1090)
<i>pukaḷ</i>	'fame'	(5)
<i>viiḷ</i>	'wasting'	(38)
<i>yaaḷ</i>	'lute'	(66)
<i>kuuḷ</i>	'wealth'	(381)

/r/ occurs finally after all vowels except */o u/*. E.g.

<i>uyir</i>	'life'	(940)
<i>eeer</i>	'beauty'	(1053)
<i>amar</i>	'fight'	(814)
<i>ciir</i>	'valour'	(778)

<i>teer</i>	'car'	(496)
<i>kaar</i>	'delusion'	(287)
<i>poor</i>	'fight'	(758)
<i>uur</i>	'village'	(1158)

/v/ occurs finally after the short vowels /i e a/. E.g.

<i>iv</i>	'this'	(392)
<i>tev</i>	'enemies'	(639)
<i>taʋ</i>	'onomatopoeic'	(1144)

/y/ occurs finally after the short vowels /e a o/ and the long vowels /ee aa oo/. E.g.

<i>cey</i>	'doing'	(110)
<i>ceRaaaay</i>	'will offend : you'	(1200)
<i>poy</i>	'lie'	(6)
<i>veey</i>	'bamboo'	(1113)
<i>kaay</i>	'unripe fruit'	(100)
<i>nooy</i>	'distress'	(359)

3.2.2.0. *Vowel Distribution :*

All the short and long vowels except /e/ which occurs only initially and medially occur in all positions. All long vowels are geminates. The central vowel /a/ clusters with /i/ and /u/. While the cluster /ai/ occurs in all positions, the cluster /au/ occurs only in the medial position. In the triple vowel clusters the first member is the first member of a long vowel or /a/. The second member is the second member of a long vowel or /i/. The third member is the duplication of the second member. Among the triple vowel clusters, the clusters /aaa ooo/ alone occur in all positions. The clusters /iii aii/ occur medially and finally. The clusters /eee uuu/ occur initially and medially.

A simple duplication of a long vowel forms a quadruple vowel cluster which occurs only in the medial position. All these features are represented in the charts at the end of this section.

3.2.2.1. *Initial Distribution:*

/i/ occurs initially before all consonants except /p ñ/. E.g.

<i>itu</i>	'this : it'	(37)
<i>iRal</i>	'the act of ending'	(885)
<i>iṭan</i>	'place'	(493)
<i>icai</i>	'fame'	(238)
<i>ikal</i>	'hostility'	(481)
<i>imaippin</i>	'if (they) wink'	(775)
<i>inaṃ</i>	'group'	(306)
<i>iṇar</i>	'bunch'	(650)
<i>ilar</i>	'unpossessed : they'	(365)
<i>iḷivu</i>	'infamy'	(464)
<i>iḷavu</i>	'loss'	(372)
<i>iravu</i>	'begging'	(1068)
<i>ivaḷ</i>	'this : she'	(1188)
<i>iyal</i>	'nature'	(572)

/ii/ occurs initially before the consonants /t ṭ k m n ṇ r v y/. E.g.

<i>iital</i>	'the act of giving'	(842)
<i>iiṭṭam</i>	'acquirement'	(1003)
<i>iikai</i>	'giving'	(221)
<i>iimtatu</i>	'gave : it'	(1142)
<i>iinRaal</i>	'delivered : she'	(656)
<i>iinṭu</i>	'here'	(213)

<i>iiram</i>	'affection'	(91)
<i>iivar</i>	'will give : they'	(1035)
<i>iiyum</i>	'(who) will give'	(1061)

/e/ occurs initially before all consonants except /p k ñ/. E.g.

<i>etir</i>	'opposition'	(855)
<i>eRika</i>	'let (them) punish'	(562)
<i>eṭuttu</i>	'having taken'	(776)
<i>eccam</i>	'remnant'	(238)
<i>em</i>	'our'	(1126)
<i>en</i>	'my'	(771)
<i>eṇ</i>	'eight'	(9)
<i>eli</i>	'rat'	(763)
<i>eḷitu</i>	'simple : it'	(145)
<i>eḷili</i>	'cloud'	(17)
<i>eru</i>	'manure'	(1037)
<i>evan</i>	'what'	(31)
<i>eytal</i>	'the act of attaining'	(540)

/ee/ occurs initially before the vowel /e/ and the consonants /t R k m n l ɭ r v/. E.g.

<i>eer</i>	'beauty'	(1098)
<i>eetam</i>	'fault'	(432)
<i>eeRu</i>	'ox'	(59)
<i>eekinaam</i>	'walked : He'	(3)
<i>eemam</i>	'safety'	(766)
<i>eenaiya</i>	'other'	(268)
<i>eel</i>	'if'	(368)

<i>eeḷai</i>	‘fool’	(873)
<i>eer</i>	‘plough’	(872)
<i>eeval</i>	‘command’	(515)

/a/ occurs initially before the vowel */i/* and all consonants except */p/*. E.g.

<i>aimtu</i>	‘five’	(6)
<i>atar</i>	‘route’	(594)
<i>aRam</i>	‘virtue’	(249)
<i>aṭal</i>	‘the act of suffering’	(206)
<i>acaivu</i>	‘weariness’	(371)
<i>akam</i>	‘heart’	(277)
<i>amar</i>	‘fight’	(814)
<i>anpu</i>	‘affection’	(513)
<i>aṇi</i>	‘beauty’	(738)
<i>añar</i>	‘grief’	(1086)
<i>alar</i>	‘scandal’	(1141)
<i>aḷaRu</i>	‘hell’	(835)
<i>aḷal</i>	‘fire’	(1228)
<i>aram</i>	‘rasp’	(567)
<i>avaḷ</i>	‘that : she’	(1093)
<i>ayarkam</i>	‘will enjoy : we’	(1268)

/aa/ occurs initially before the vowel */a/* and all consonants except */p ñ l/*. E.g.

<i>aaatum</i>	‘will become : we’	(653)
<i>aatal</i>	‘the act of becoming’	(219)
<i>aaRu</i>	‘nature’	(219)
<i>aaṭal</i>	‘the act of keeping’	(187)

<i>aacaaram</i>	'behaviour'	(1075)
<i>aakal</i>	'the act of becoming'	(372)
<i>aamai</i>	'turtle'	(126)
<i>aanRaar</i>	'full : they'	(413)
<i>aanmai</i>	'the quality of keeping'	(1026)
<i>aal</i>	'person'	(500)
<i>aali</i>	'embankment'	(989)
<i>aarvam</i>	'desire'	(74)
<i>aavar</i>	'will become : they'	(1165)
<i>aayam</i>	'profit'	(933)

/o/ occurs initially before all consonants except /c m ñ y/.

E.g.

<i>oppu</i>	'resemblance'	(800)
<i>ottal</i>	'the act of resembling'	(993)
<i>oRkattin</i>	'weariness'	(414)
<i>oḷukkam</i>	'concealment'	(486)
<i>okkal</i>	'kinsfolk'	(43)
<i>onRu</i>	'one'	(155)
<i>oṇmai</i>	'intelligent'	(844)
<i>olkaar</i>	'pine not : they'	(218)
<i>oḷi</i>	'light'	(27)
<i>oḷukkam</i>	'behaviour'	(131)
<i>oravan</i>	'one : he'	(161)
<i>ovveem</i>	'resemble not : we'	(1114)

/oo/ occurs initially before the vowel /o/ and the consonants /t ṭ c m r v/. E.g.

<i>ootal</i>	'the act of avoiding'	(653)
--------------	-----------------------	-------

<i>ooti</i>	'having learned'	(834)
<i>ooṭum</i>	'(which) will run'	(496)
<i>oocai</i>	'sound'	(27)
<i>oompu</i>	'avoid (you, sg)!'	(1149)
<i>ooraar</i>	'consider not : they'	(695)
<i>oovaatu</i>	'without avoiding'	(933)

/u/ occurs initially before all consonants except /p c m n/.

E.g.

<i>uppu</i>	'sweetness'	(802)
<i>utavi</i>	'help'	(105)
<i>uRal</i>	'the act of having'	(378)
<i>uṭal</i>	'body'	(253)
<i>ukaaamai</i>	'the quality of not revealing'	(585)
<i>uṇaral</i>	'the act of knowing'	(11)
<i>uṇaRRu</i>	'endeavour'	(604)
<i>ulaku</i>	'world'	(542)
<i>uḷar</i>	'be : they'	(880)
<i>uḷavu</i>	'ploughing'	(1031)
<i>uram</i>	'strength'	(888)
<i>uvakai</i>	'pleasure'	(304)
<i>uyir</i>	'life'	(255)

/uu/ occurs initially before the consonants /t R ṭ k n ṇ ḷ r/.

E.g.

<i>uutiyaṃ</i>	'benefit'	(231)
<i>uuRu</i>	'affliction'	(662)
<i>uuṭal</i>	'sulk'	(1310)

<i>uukkam</i>	‘energy’	(382)
<i>uunRum</i>	‘will establish’	(597)
<i>uun</i>	‘food’	(939)
<i>uul</i>	‘destiny’	(372)
<i>uur</i>	‘village’	(397)

3.2.2.2. Medial Distribution :

/i/ occurs medially after the short vowels */ia/*, the long vowel */ii/*, and all consonants except */ñ/*. E.g.

<i>nacaiiyaar</i>	‘desired : they’	(1199)
<i>aiyam</i>	‘doubt’	(845)
<i>taġiiiyatu</i>	‘observed : it’	(425)
<i>pirivu</i>	‘parting’	(1152)
<i>timkaġ</i>	‘moon’	(1146)
<i>aRivu</i>	‘knowledge’	(287)
<i>kaġital</i>	‘the act of eschewing’	(549)
<i>citaivu</i>	‘ruin’	(597)
<i>kiġavan</i>	‘possessor’	(1039)
<i>tamiyar</i>	‘lonely : they’	(229)
<i>initu</i>	‘sweet : it’	(811)
<i>paġital</i>	‘the act of obeying’	(125)
<i>valiyaar</i>	‘strong : they’	(250)
<i>aġiyar</i>	‘of pity : they’	(1138)
<i>aġivu</i>	‘destruction’	(764)
<i>pirivu</i>	‘parting’	(1152)
<i>avir</i>	‘shining’	(1117)
<i>uyir</i>	‘life’	(326)

/ii/ occurs medially after all consonants except /R ɽ ɳ ñ l y/.
E.g.

<i>pīiṭu</i>	‘greatness’	(59)
<i>tīitu</i>	‘evil : it’	(192)
<i>ciir</i>	‘fame’	(962)
<i>kīil</i>	‘low’	(973)
<i>miin</i>	‘fish’	(931)
<i>nīiḷ</i>	‘extending’	(234)
<i>meeRkoḷiii</i>	‘having made to undertake’	(938)
<i>keḷiii</i>	‘(which) was closed’	(816)
<i>iriīiya</i>	‘(which) was placed’	(660)
<i>vīiṭu</i>	‘abandonment’	(791)

/e/ occurs after the long vowel /ee/ and the consonants /p t c k m n v/. E.g.

<i>peeey</i>	‘devil’	(565)
<i>peṇṭir</i>	‘women’	(913)
<i>teRal</i>	‘the act of destroying’	(264)
<i>ceRivu</i>	‘subjugation’	(715)
<i>keḷal</i>	‘the act of vanishing’	(856)
<i>menmai</i>	‘weakness’	(877)
<i>nemcu</i>	‘heart’	(842)
<i>veḷḷattu</i>	‘water’	(622)

/ee/ occurs medially after all consonants except /ñ ɽ r/. E.g.

<i>peetai</i>	‘simpleton’	(816)
<i>teeRal</i>	‘the act of clearing’	(825)
<i>cenReen</i>	‘went : I’	(1259)
<i>ceeRal</i>	‘the act of going’	(1256)

<i>keepi</i>	'well'	(396)
<i>meelar</i>	'above : they'	(1218)
<i>neer</i>	'equal'	(813)
<i>kaaṇeen</i>	'see not : I'	(1167)
<i>ileen</i>	'unpossessed : I'	(1226)
<i>uḷeen</i>	'be : I'	(1167)
<i>kaḷveem</i>	'will steal : we'	(282)
<i>aRiyeen</i>	'know not : I'	(1125)

/a/ occurs medially after the long vowel /aa/ and all consonants. E.g.

<i>aatum</i>	'will become : we'	(653)
<i>uṇpar</i>	'will eat : they'	(1311)
<i>atanaal</i>	'that : it, by'	(642)
<i>aRam</i>	'virtue'	(249)
<i>aṭal</i>	'the act of suffering'	(206)
<i>acaivu</i>	'weariness'	(371)
<i>akam</i>	'heart'	(277)
<i>amar</i>	'fight'	(814)
<i>manam</i>	'heart'	(253)
<i>kaṇattar</i>	'of the group : they'	(720)
<i>aṇar</i>	'grief'	(1086)
<i>alar</i>	'scandal'	(1141)
<i>aḷaRu</i>	'hell'	(835)
<i>aḷal</i>	'fire'	(1228)
<i>aram</i>	'rasp'	(567)
<i>avaḷ</i>	'that : she'	(1093)
<i>ayarkam</i>	'will enjoy : we'	(1268)

/aa/ occurs medially after the long vowel /aa/ and all consonants. E.g.

<i>ceRaaaay</i>	'will offend : you (sg)'	(1200)
<i>paarppaan</i>	'brahmin'	(134)
<i>taanai</i>	'army'	(770)
<i>kuuRaana</i>	'says not : he'	(181)
<i>aaṣaar</i>	'keep not : they'	(818)
<i>amcaar</i>	'fear not : they'	(201)
<i>oḷukaan</i>	'behaves not : he'	(474)
<i>koomaan</i>	'king'	(25)
<i>paṇpinaarkan</i>	'of character : they, at'	(579)
<i>kaaṇaan</i>	'sees not : he'	(859)
<i>ṇaalam</i>	'world'	(999)
<i>pulaalai</i>	'flesh'	(260)
<i>keḷaar</i>	'hear not : they'	(643)
<i>cūḷaatu</i>	'without deliberating'	(465)
<i>vitiraar</i>	'sprinkle not : they'	(1077)
<i>kaavaan</i>	'protects not : he'	(560)
<i>kaayaar</i>	'(will) not be angry : they'	(1208)

/o/ occurs medially after the long vowel /oo/ and all consonants except /ʃ ṇ/. E.g.

<i>ootal</i>	'the act avoiding'	(653)
<i>potimtu</i>	'having covered'	(155)
<i>toḷil</i>	'business'	(833)
<i>kaṣiRRoṣu</i>	'tusker with'	(774)
<i>col</i>	'word'	(160)
<i>kol</i>	'killing'	(735)

<i>moḷi</i>	‘word’	(567)
<i>nomtu</i>	‘having suffered’	(1236)
<i>naaṇoṭu</i>	‘modesty, with’	(1134)
<i>veeloṭu</i>	‘lance, with’	(552)
<i>vaaḷoṭu</i>	‘sword, with’	(726)
<i>pukaḷoṭu</i>	‘fame, with’	(652)
<i>ciiroṭu</i>	‘fame, with’	(962)
<i>uruvoṭu</i>	‘form, with’	(585)
<i>knṭiyoṭu</i>	‘family, with’	(898)

/oo/ occurs medially after all consonants except */t̪ n l ʎ/*.

E.g.

<i>poor</i>	‘fight’	(758)
<i>toonRum</i>	‘will appear’	(371)
<i>caanRoor</i>	‘the great’	(657)
<i>coorvu</i>	‘forgetfulness’	(531)
<i>kool</i>	‘sceptre’	(543)
<i>mooppa</i>	‘to smell’	(90)
<i>nookku</i>	‘look’	(1100)
<i>kaṇṇooṭṭam</i>	‘sympathy’	(571)
<i>nuuloor</i>	‘of treatise : they’	(941)
<i>aanRaarooṭu</i>	‘full : they, with’	(413)
<i>aRavoor</i>	‘of virtue : they’	(30)
<i>aaṇvinaiyooṭu</i>	‘exertion, with’	(632)

/u/ occurs medially after the long vowel */uu/* and all consonants except */ṇ/*. E.g.

<i>keṭuppatuum</i>	‘will destroy : it, and’	(15)
<i>pukal</i>	‘the act of entering’	(840)

<i>tuyar</i>	'pang'	(1135)
<i>uRuti</i>	'counsel'	(638)
<i>oṭukkam</i>	'concealment'	(486)
<i>nucuppiRku</i>	'waist, for'	(1115)
<i>takuti</i>	'propriety'	(111)
<i>mukai</i>	'bud'	(1274)
<i>nutal</i>	'forehead'	(1328)
<i>aṇukaatu</i>	'without approaching'	(691)
<i>kaluḷum</i>	'(which) will cry'	(1173)
<i>aaḷum</i>	'will keep'	(1252)
<i>arumai</i>	'preciosity'	(1142)
<i>kuvuḷ</i>	'temple'	(678)
<i>kaayum</i>	'will be angry'	(1313)

/uu/ occurs medially after the consonants /p t c k m n/. E.g.

<i>puuṇum</i>	'will wear'	(836)
<i>tuutu</i>	'message'	(681)
<i>cuutu</i>	'gambling'	(936)
<i>kuuḷ</i>	'crop'	(550)
<i>muunRu</i>	'three'	(682)
<i>nuul</i>	'Vedas'	(560)

3.2.2.3. Final Distribution :

/i/ occurs finally after the short vowels /i a/, the long vowel /ii/ and all consonants except /m ñ y/. E.g.

<i>acaii</i>	'having become weary'	(1040)
<i>niRai</i>	'reservation'	(864)
<i>keḷiii</i>	'(which) was closed'	(816)

<i>kuuppi</i>	'having closed'	(260)
<i>eyti</i>	'having attained'	(665)
<i>kuuRi</i>	'having said'	(183)
<i>kuuṣi</i>	'having united'	(765)
<i>amci</i>	'having feared'	(325)
<i>kaṣuki</i>	'having decreased'	(564)
<i>kani</i>	'fruit'	(100)
<i>piṇi</i>	'sick'	(227)
<i>eḷili</i>	'cloud'	(17)
<i>vaḷi</i>	'air'	(245)
<i>vaḷi</i>	'posterity'	(44)
<i>eri</i>	'fire'	(435)
<i>avi</i>	'oblation'	(413)

/ii/ occurs finally after the consonants */t m n/*. E.g.

<i>tii</i>	'fire'	(674)
<i>mii</i>	'highly'	(386)
<i>nii</i>	'you(sg)'	(1123)

/ee/ occurs finally after all consonants except */ñ ḷ/*. E.g.

<i>paṇpee</i>	'character, only'	(579)
<i>aaRaatec</i>	'heals not : it'	(129)
<i>nanRee</i>	'good : it, alone'	(113)
<i>uṇṭee</i>	'be : it, only'	(1164)
<i>nemcee</i>	'O, heart!'	(1237)
<i>aamkee</i>	'there'	(179)
<i>kaayumee</i>	'will burn'	(77)
<i>imtiranee</i>	'Indra'	(25)

<i>peṇṇee</i>	'womanhood, only'	(907)
<i>iitalee</i>	'the act of giving'	(1054)
<i>makkaḷee</i>	'people, alone'	(1071)
<i>vaiyaaree</i>	'consider not : they'	(155)
<i>ilavee</i>	'nought'	(9)
<i>nilaiyee</i>	'nature, alone'	(967)

/a/ occurs finally after the long vowel */aa/* and all consonants except */c ṇ/*. E.g.

<i>iraaa</i>	'having undertaken'	(1301)
<i>varupa</i>	'will come : they'	(961)
<i>eyta</i>	'(which) was shot'	(772)
<i>uRa</i>	'to have'	(535)
<i>keṭa</i>	'to vanish'	(360)
<i>aṭamka</i>	'to submit'	(123)
<i>tama</i>	'of them : they'	(376)
<i>ena</i>	'thus'	(334)
<i>kaaṇa</i>	'to see'	(1140)
<i>cila</i>	'few : they'	(649)
<i>koḷa</i>	'to hold'	(583)
<i>aḷa</i>	'to weep'	(659)
<i>ira</i>	'to beg'	(1051)
<i>colluva</i>	'will say : they'	(1232)
<i>peya</i>	'to pour'	(580)

/aa/ occurs finally after all consonants except */ṇ/*. E.g.

<i>tappaa</i>	'(which will) not fail'	(217)
<i>taa</i>	'ruin'	(853)

<i>maaRaa</i>	‘(which will) not change’	(701)
<i>ooṭaa</i>	‘run not : they’	(496)
<i>amcaa</i>	‘without fearing’	(725)
<i>aṭamkaa</i>	‘(who will) not submit’	(834)
<i>maa</i>	‘large’	(544)
<i>tunnaa</i>	‘without closing’	(1250)
<i>maañaa</i>	‘(which) was not glorious’	(432)
<i>ilaa</i>	‘unpossessed’	(200)
<i>keeḷaa</i>	‘(which will) not hear’	(808)
<i>vaalḷaa</i>	‘(which will) not live’	(969)
<i>vaaraa</i>	‘(which will) not come’	(755)
<i>oovaa</i>	‘without ceasing’	(1205)
<i>viiyaa</i>	‘(which will) not perish’	(284)

/o/ occurs finally after the long vowel /oo/. E.g.

<i>ooo</i>	‘exclamation’	(1088)
------------	---------------	--------

/oo/ occurs finally after all consonants except /c ñ ḷ l/. E.g.

<i>pacappoo</i>	‘pallor’	(1240)
<i>marumtoo</i>	‘medicine’	(968)
<i>anRoo</i>	‘not : it’	(1258)
<i>uṇṭoo</i>	‘be : it’	(1260)
<i>uraikkoo</i>	‘let (me) say’	(1181)
<i>kuuRRamoo</i>	‘the god of death’	(1085)
<i>evanoo</i>	‘what’	(31)
<i>kaṇṇoo</i>	‘eye’	(1085)
<i>maRaittaloo</i>	‘the act of covering’	(846)
<i>uṭaiyaroo</i>	‘possessed : they’	(591)

<i>u!avoo</i>	'be : they'	(483)
<i>piṇaiyoo</i>	'doe'	(1085)

/u/ occurs finally after all consonants except */n ʌ l ! y/*. E.g.

<i>anpu</i>	'affection'	(285)
<i>atu</i>	'that : it'	(45)
<i>tuuRu</i>	'heap'	(435)
<i>pakaṭu</i>	'ox'	(624)
<i>maacu</i>	'blemish'	(278)
<i>tummu</i>	'sneeze'	(1318)
<i>nanku</i>	'well'	(458)
<i>naaṇu</i>	'abashment'	(902)
<i>ke!u</i>	'intimate'	(700)
<i>eru</i>	'manure'	(1038)
<i>iravu</i>	'begging'	(1064)

/uu/ occurs finally after the consonants */p t/*. E.g.

<i>puu</i>	'flower'	(1112)
<i>tuu</i>	'prop'	(455)

3.3.0. Syllabic Structure :

The phonemic word may consist of one or more syllables. The syllable consists of an optional onset (*O*), an obligatory nucleus (*N*) and an optional coda (*C*) as in the following formula :

$$Syl = \pm O + N \pm C$$

The *O* slot is manifested by any one of the word initial consonants; the *N* slot is manifested by a short or long vowel; the *C* slot is manifested by a single consonant or any one of the double or triple consonant clusters. Thus the structure of a syllable may be represented by the general formula :

$$\pm C + V \pm V \pm C \pm C \pm C$$

Altogether fifteen syllable patterns have been observed in the text. All syllable patterns occur in word initial position while eight and four syllable patterns alone occur in the medial and final positions respectively.

3.3.1. Initial Syllables :

<i>V</i>	<i>i</i>	'this'	(382)
<i>VC</i>	<i>in</i>	'sweet'	(91)
<i>VCC</i>	<i>acc-am</i>	'fear'	(534)
<i>VCCC</i>	<i>uytt-al</i>	'the act of directing'	(1287)
<i>CVC</i>	<i>kal</i>	'stone'	(771)
<i>CVCC</i>	<i>kann-aar</i>	'of eye : they'	(1180)
<i>CVCCC</i>	<i>poymm-a-i</i>	'the quality of lying'	(913)
<i>VV</i>	<i>aa</i>	'cow'	(560)
<i>CVV</i>	<i>kaa</i>	'balancing pole'	(1163)
<i>VVC</i>	<i>aar</i>	'rare'	(73)
<i>VVCC</i>	<i>aakk-am</i>	'wealth'	(177)
<i>VVCCC</i>	<i>aarkk-um</i>	'(which) will fasten'	(482)
<i>CVVC</i>	<i>kaal</i>	'time'	(710)
<i>CVVCC</i>	<i>kaakk-um</i>	'will protect'	(547)
<i>CVVCCC</i>	<i>meeymt-a</i>	'(which) grazed'	(273)

3.3.2. Medial Syllables :

<i>V</i>	<i>aR-i-vu</i>	'knowledge'	(427)
<i>VC</i>	<i>ak-al-am</i>	'width'	(743)
<i>VCC</i>	<i>ak-att-aar</i>	'of interior : they'	(745)
<i>VCCC</i>	<i>un-arcc-i</i>	'feeling'	(453)
<i>VV</i>	<i>al-ii-i</i>	'having spoiled'	(182)
<i>VVC</i>	<i>amc-aat-u</i>	'without fearing'	(585)

<i>VVCC</i>	<i>aṇṇ-aatt-al</i>	‘the act of opening’	(255)
<i>VVCCC</i>	<i>aar-aaymt-a</i>	‘(which) was examined’	(682)

3.3.3. *Final Syllables:*

<i>V</i>	<i>piṇ-i</i>	‘sick’	(227)
<i>VC</i>	<i>il-ar</i>	‘unpossessed : they’	(728)
<i>VV</i>	<i>ir-aa</i>	‘night’	(1168)
<i>VVC</i>	<i>il-aar</i>	‘unpossessed : they’	(800)

CHART 18

WORD FINAL VOWELS

[illegible]

Sandhi

4.0. The sandhi rules are classified into three :

Internal sandhi rules which are applicable for the phonemic alternations that occur within words.

External sandhi rules which are applicable for the phonemic alternations that occur between words.

Common rules are applicable either partially or completely to both sandhis.

4.1.0. Internal Sandhi Rules :

For metric demands vowels lengthen in two ways.

1. $VV \rightarrow VVV$
 $peey \rightarrow peeey$ (565)
 $VV \rightarrow VVVV$
 $ceRaay \rightarrow ceRaaaay$ (1200)
2. $(C)(V)V\text{St}(\text{op})u + V \rightarrow (C)(V)V(\text{St})\text{St}u + V$
 $keetu + um \rightarrow keetum$ (115)
 $keetu + inum \rightarrow keetinum$ (796)

4.2.0. External sandhi rules :

1. $u + y \rightarrow i + y$
 $koṭitu + yaal \rightarrow koṭitiyaal$ (65)
2. $(C)V...Vm + v \rightarrow (C)V...V(m) + v$
 $ollum + vaay \rightarrow ollumvaay$ (673)
 $iRum + varai \rightarrow iRuvurai$ (488)

3. $(C)V...V_m + \begin{Bmatrix} k \\ c \\ t \\ p \end{Bmatrix} \rightarrow C(V) ... V(m) + \begin{Bmatrix} k \\ c \\ t \\ p \end{Bmatrix}$
- inpam + kaṭal* → *inpamkaṭal* (1166)
- kaamam + kaṭal* → *kaamakkaṭal* (1164)
- manam + tuuymai* → *manamtuuymai* (445)
- * *manam + tiṭpam* → *manattiṭpam* (661)
4. $(C)V...V_{mt} + \begin{Bmatrix} m \\ n \\ \tilde{n} \end{Bmatrix} \rightarrow (C)V...V + \begin{Bmatrix} m \\ n \\ \tilde{n} \end{Bmatrix}$
- cuuḷmtum + muṭivu* → *cuuḷmtumuṭivu* (640)
- keṭum + niiraar* → *keṭuniiraar* (605)
- keṭkum + ñaalam* → *keṭkuñaalam* (648)
5. $(C)V_l + n \rightarrow (C)V_n + n$
- nal + niirai* → *nanniirai* (1111)
6. $(C)V_{\tilde{n}} + \text{close juncture} + n \rightarrow (C)V + n$
- kaṇ + close juncture + niir* → *kaṇniir* (71)
7. $(C)V_{\tilde{n}} + \begin{Bmatrix} l \\ n \end{Bmatrix} \rightarrow (C)V_n + n$
- uḷ + ninRu* → *uṇṇinRu* (13)
- kaṇ + niir* → *kaṇniir* (555)
8. $(C)V...V \begin{Bmatrix} l \\ n \end{Bmatrix} + n \rightarrow (C)V...V + n$
- eḷil + nalam* → *eḷinalam* (407)
- collin + naṭai* → *collinaṭai* (712)
9. $(C)V...V \begin{Bmatrix} l \\ n \end{Bmatrix} + n \rightarrow (C)V...V + n$
- tooḷ + nekiḷa* → *tooṇekiḷa* (1236)

$$a'avinkan + ninRu \rightarrow a'avinkaninRu \quad (286)$$

$$10. \quad (C)V...VVy + y \rightarrow (C)V...VVy$$

$$pootaay + yaam \rightarrow pootaayaam \quad (1123)$$

$$11. \quad V + \text{close juncture} + V \rightarrow \phi + \text{close juncture} + V$$

$$vaalka + enpaakku \rightarrow vaalkenpaakku \quad (1312)$$

4.3.0. Common rules :

1. Everywhere except after monosyllabic *CVC*, $u + V \rightarrow \phi V$

$$tuutu + o\dot{t}u \rightarrow tuuto\dot{t}u \quad (1211)$$

$$aamku + ee \rightarrow aamkee \quad (15)$$

$$koo\dot{t}u + inRi \rightarrow koo\dot{t}inRi \quad (523)$$

$$ta\dot{t}imtu + e\dot{l}ili \rightarrow ta\dot{t}inte\dot{l}ili \quad (17)$$

$$ii\dot{n}tu + aRam \rightarrow ii\dot{n}taRam \quad (23)$$

$$poyyaatu + o\dot{l}ukin \rightarrow poyyaato\dot{l}ukin \quad (294)$$

$$ninRu + u\dot{t}aRRum \rightarrow ninRu\dot{t}aRRum \quad (13)$$

Exception

$$vanka\dot{n}atu + ee \rightarrow vanka\dot{n}atuvee \quad (764)$$

2. All other $\begin{Bmatrix} u \\ a \\ o \end{Bmatrix} + V \rightarrow \begin{Bmatrix} \acute{u} \\ a \\ o \end{Bmatrix} + v + V$

$$oru + an \rightarrow oru\acute{a}n \quad (405)$$

$$piRa + aa\dot{l}i \rightarrow piiRavaa\dot{l}i \quad (8)$$

Exception

$$atu + an \rightarrow atan \quad (60)$$

$$purimta + il \rightarrow purimtil \quad (59)$$

3. $\begin{Bmatrix} i \\ ee \end{Bmatrix} + V \rightarrow \begin{Bmatrix} i \\ ee \end{Bmatrix} + y + V$

$$ini + aar \rightarrow iniyaar \quad (1158)$$

kaṇ + tu → *kaṭṭu* (1083)

oṇ + toṭi → *oṇṭoṭi* (1101)

takaimaikkaṇ + tamkiRRu → *takaimaikkaṭṭamkiRRu* (608)

8. $n + t$ → $\left\{ \begin{smallmatrix} n \\ R \end{smallmatrix} \right\} + R$

en + tal → *enRal* (181)

illaataan + taal → *illaataanRaal* (7)

tammin + tam → *tammiRRam* (68)

9. $l + t$ → $\left\{ \begin{smallmatrix} l \\ tt \end{smallmatrix} \right\}$

kool + tal → *kooṭal* (646)

peḷ + taar → *peṭṭaar* (1178)

taaḷ + toḷaaar → *taaṭoḷaaar* (2)

pakkattul + tev → *pakkattuṭṭev* (639)

10. $l + t$ → $\left\{ \begin{smallmatrix} R \\ RR \end{smallmatrix} \right\}$

akal + talin → *akaRalin* (1325)

vil + talku → *viRRaRku* (1080)

okkal + taan → *okkaRaana* (43)

pul + talai → *puRRalai* (16)

11. $n + \left\{ \begin{smallmatrix} k \\ c \\ p \end{smallmatrix} \right\}$ → $\left\{ \begin{smallmatrix} n \\ t \end{smallmatrix} \right\} + \left\{ \begin{smallmatrix} k \\ c \\ p \end{smallmatrix} \right\}$

maan + ci → *maaṭci* (750)

nuṇ + pam → *nuṭpam* (636)

naṇ + pu → *naṇpu* (998)

uṇ + kaṇ → *uṇkan* (1091)

kaḷavinkaṇ + kanRiya → *kaḷavinkaṭṭkanRiya* (286)

eṇ + ceermṭa → *eṇceermṭa* (910)

oRRinkaṇ + ceyyaRka → *oRRinkaṇceyyaRka* (590)

oṇ + poruḷ → *oṇporuḷ* (760)

nallaarkaṇ + paṭṭa → *nallaarkaṭpaṭṭa* (408)

$$12. \quad n + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix} \rightarrow \begin{Bmatrix} n \\ R \end{Bmatrix} + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix}$$

ilaan + kaṇ → *illaankaṇ* (135)

makan + ku → *makaRku* (67)

nan + kalam → *nankalam* (60)

kolaiyin + koṭiyaarai → *kolaiyiRkoṭiyaarai* (550)

van + col → *vancol* (99)

kaakkin + cinam → *kaakkiRcinam* (305)

nan + poruḷ → *nanporuḷ* (171)

tammin + periyarai → *tammiRperiyarai* (444)

$$13. \quad l + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix} \rightarrow \begin{Bmatrix} l \\ c \\ p \end{Bmatrix} + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix}$$

keel + ka → *keetka* (414)

koḷ + ka → *koḷka* (461)

aaḷ + pa → *aaḷpa* (383)

peḷ + pavee → *peṭpavee* (1283)

aaḷ + ci → *aa'ci* (252)

poruḷ + kaṇṭaar → *poruḷkaṇṭaar* (141)

uḷ + kooṭṭam → *uṭkooṭṭam* (119)

aruḷ + ceermṭa → *aruḷceermṭa* (243)

poruḷ + celvam → *poruṭcelvam* (241)

niiḷ + pukaḷ → *niiḷpukaḷ* (234)

- poru!* + *payan* → *poru!payan* (128)
14. $l + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix} \rightarrow \begin{Bmatrix} l \\ R \end{Bmatrix} + \begin{Bmatrix} k \\ c \\ p \end{Bmatrix}$
- cel* + *ka* → *celka* (684)
- col* + *ka!* → *coRka!* (1100)
- iinRal* + *kaaṇpaan* → *iinRalkaaṇpaan* (99)
- col* + *kooṭṭam* → *coRkooṭṭam* (119)
- uṭal* + *cuvai* → *uṭarcuvai* (253)
- ceyyaamal* + *ceyta* → *ceyyaamaRceyta* (101)
- iṭanil* + *paruvattum* → *iṭanilparuvattum* (218)
- col* + *poru!* → *coRporu!* (128)
15. $\begin{Bmatrix} l \\ l \end{Bmatrix} + m \rightarrow \begin{Bmatrix} n \\ n \end{Bmatrix} + m$
- kaṭal* + *mannum* → *kaṭanmannum* (1164)
- uḷaa!* + *maamukaṭi* → *uḷaaṇmaamukaṭi* (617)

Glossary

The glossary which may serve as a concise lexicon of the text consists of the verb stems (see p. 82), descriptive verb stems (see p. 118) and nouns (see p. 133). The items are entered first in phonemic transcription according to the Tamil alphabet. Then transcriptions in Tamil and the English glosses of the entries are supplied respectively. The Roman numerals in parantheses which follow the phonemic transcription of the verb stems indicate the four major sets (cf. 2.4.1.3.0) of the verb classification. Homophonous forms are listed separately. Besides the commentary of Parimeelalakkar, the Tamil Lexicon (1939) has been extensively used in the assignment of meaning.

Verb Stems :

<i>avku</i> (IV)	அஃகு	'be subtle'
<i>akal</i> (I)	அகல்	'leave, retire'
<i>akal</i> (I)	அகல்	'widen'
<i>akal</i> (II)	அகழ்	'dig'
<i>acaavu</i> (IV)	அசாவு	'languish'
<i>acai</i> (II)	அசை	'move'
<i>acai</i> (II)	அசை	'be idle'
<i>amcu</i> (IV)	அஞ்சு	'fear'
<i>aṭṭu</i> (IV)	அட்டு	'pour'
<i>aṭamku</i> (IV)	அடங்கு	'be subdued'

<i>aṭu</i> (I)	அடு	'attack, kill, slay'
<i>aṭu</i> (I)	அடு	'cook, boil'
<i>aṭu</i> (I)	அடு	'be near'
<i>aṭu</i> (I)	அடு	'conquer'
<i>aṭukku</i> (IV)	அடுக்கு	'pile up'
<i>aṭai</i> (II)	அடை	'get'
<i>aṭai</i> (III)	அடை	'obstruct'
<i>aṇṇaa</i> (II)	அண்ணா	'open'
<i>aṇamku</i> (IV)	அணங்கு	'afflict'
<i>aṇi</i> (II)	அணி	'wear'
<i>aṇuku</i> (IV)	அணுகு	'approach'
<i>atir</i> (II)	அதிர்	'tremble'
<i>amar</i> (II)	அமர்	'desire'
<i>amar</i> (II)	அமர்	'suit'
<i>amar</i> (III)	அமர்	'fight, oppose'
<i>amai</i> (II)	அமை	'be situated, set'
<i>ayar</i> (II)	அயர்	'enjoy'
<i>ari</i> (II)	அரி	'cut off'
<i>arumtu</i> (IV)	அருந்து	'eat'
<i>arumpu</i> (IV)	அரும்பு	'bud'
<i>aruḷu</i> (IV)	அருளு	'bestow, favour'
<i>allaa</i> (II)	அல்லா	'whirl'
<i>ala</i> (II)	அல	'suffer'
<i>alar</i> (II)	அலர்	'spread'
<i>alai</i> (III)	அலை	'afflict'
<i>avvi</i> (III)	அவ்வி	'be envious'
<i>avaavu</i> (IV)	அவாவு	'desire'

<i>avi</i> (II)	அவி	‘perish’
<i>avir</i> (II)	அவிர்	‘shine’
<i>aḷal</i> (I)	அழல்	‘burn, be inflamed’
<i>aḷi</i> (II)	அழி	‘destroy’
<i>aḷu</i> (I)	அழு	‘weep’
<i>aḷukkaRu</i> (I)	அழுக்காறு	‘be envious’
<i>aḷumtu</i> (IV)	அழுந்து	‘sink’
<i>aḷḷu</i> (IV)	அள்ளு	‘sweep’
<i>aḷa</i> (II)	அள	‘measure’
<i>aḷavaḷaavu</i> (IV)	அளவளாவு	‘be intimate’
<i>aḷaavu</i> (IV)	அளாவு	‘mix’
<i>aḷi</i> (III)	அளி	‘bestow’
<i>aḷai</i> (II)	அனை	‘mix’
<i>aRku</i> (IV)	அற்கு	‘be firm’
<i>aRi</i> (II)	அறி	‘know’
<i>aRu</i> (I)	அறு	‘vanish, cease’
<i>aRai</i> (II)	அறை	‘strike’
<i>aaku</i> (IV)	ஆகு	‘become’
<i>aapu</i> (IV)	ஆடு	‘perform, play’
<i>aay</i> (II)	ஆய்	‘examine’
<i>aar</i> (II)	ஆர்	‘become full’
<i>aar</i> (III)	ஆர்	‘fasten’
<i>aaraay</i> (II)	ஆராய்	‘examine’
<i>aal</i> (I)	ஆல்	‘be perfect’

<i>aal</i> (II)	ஆழ்	'sink'
<i>aal</i> (I)	ஆள்	'govern, keep'
<i>aaRRu</i> (IV)	ஆற்று	'do, bear'
<i>aaRu</i> (IV)	ஆறு	'be healed'
<i>ika</i> (II)	இக	'transpass'
<i>ikal</i> (IV)	இகலு	'oppose, fight'
<i>ikal</i> (II)	இகழ்	'revile'
<i>icai</i> (II)	இசை	'praise'
<i>iṭi</i> (III)	இடி	'admonish'
<i>iṭu</i> (I)	இடு	'place, give'
<i>iṇaru</i> (IV)	இணரு	'cluster'
<i>iṇai</i> (II)	இணை	'join together'
<i>imai</i> (III)	இமை	'wink'
<i>iyamku</i> (IV)	இயங்கு	'move'
<i>iyal</i> (I)	இயல்	'make, proceed'
<i>iyai</i> (II)	இயை	'agree'
<i>ira</i> (II)	இர	'beg'
<i>iramku</i> (IV)	இரங்கு	'repent'
<i>iru</i> (II)	இரு	'be, stay'
<i>iru!</i> (I)	இருள்	'become dark'
<i>ilamku</i> (IV)	இலங்கு	'shine'
<i>ivartaru</i> (II)	இவர்தரு	'rise'
<i>ivaRu</i> (IV)	இவறு	'be covetous'
<i>iḷa</i> (II)	இழ	'lose'
<i>iḷi</i> (II)	இழி	'descend'
<i>iḷukku</i> (IV)	இழுக்கு	'slip, discontinue'

<i>iḷai</i> (II)	இழை	‘become soft’
<i>iḷai</i> (III)	இழை	‘do, fix’
<i>iḷi</i> (II)	இளி	‘disgrace’
<i>iḷivaru</i> (II)	இளிவரு	‘degrade’
<i>iRa</i> (II)	இற	‘die’
<i>iRa</i> (II)	இற	‘transgress’
<i>iRu</i> (I)	இறு	‘break, end’
<i>iRai</i> (III)	இறை	‘draw (water)’
<i>iRaimcu</i> (IV)	இறைஞ்சு	‘bow, worship’
<i>ii</i> (II)	ஈ	‘give’
<i>iinṭu</i> (IV)	ஈண்டு	‘join’
<i>iir</i> (II)	ஈர்	‘cut, divide’
<i>iin</i> (I)	ஈன்	‘produce’
<i>uku</i> (I)	உகு	‘shed, fall’
<i>uñarRu</i> (IV)	உஞற்று	‘exert’
<i>uḷku</i> (IV)	உட்கு	‘fear’
<i>uḷal</i> (I)	உடல்	‘be angry’
<i>uḷu</i> (III)	உடு	‘wear, clothe’
<i>uḷai</i> (II)	உடை	‘break’
<i>uṇ</i> (I)	உண்	‘eat, drink’
<i>uṇamku</i> (IV)	உணங்கு	‘dry, languish’
<i>uṇar</i> (II)	உணர்	‘feel, understand’
<i>utavu</i> (IV)	உதவு	‘help’
<i>uy</i> (II)	உய்	‘live, escape’
<i>uy</i> (III)	உய்	‘drive, conduct’

<i>uyar</i> (II)	உயர்	'be elevated'
<i>uyīr</i> (III)	உயிர்	'smell'
<i>uyir</i> (III)	உயிர்	'breathe'
<i>uru</i> (III)	உரு	'form'
<i>uruku</i> (IV)	உருகு	'melt'
<i>uru!</i> (I)	உருள்	'roll'
<i>urai</i> (III)	உரை	'say, tell'
<i>ula</i> (II)	உல	'dry'
<i>ulai</i> (II)	உலை	'ruin'
<i>uva</i> (II)	உவ	'be glad'
<i>uvar</i> (III)	உவர்	'be saltish'
<i>uḷa</i> (II)	உழ	'suffer'
<i>uḷu</i> (I)	உழு	'plough'
<i>uḷḷu</i> (IV)	உள்ளு	'think, consider'
<i>uRamku</i> (IV)	உறங்கு	'sleep'
<i>uRu</i> (I)	உறு	'occur, happen'
<i>uRai</i> (II)	உறை	'live, reside'
<i>uRai</i> (II)	உறை	'drop'
<i>uukku</i> (IV)	ஊக்கு	'energise, undertake'
<i>uukku</i> (IV)	ஊக்கு	'loose'
<i>uuṭu</i> (IV)	ஊடு	'pout, sulk'
<i>uur</i> (II)	ஊர்	'crawl, ride'
<i>uur</i> (II)	ஊர்	'undertake'
<i>uul</i> (III)	ஊழ்	'blossom'
<i>uuRu</i> (IV)	ஊறு	'spring'
<i>uunRu</i> (IV)	ஊன்று	'endure, establish'

<i>evku</i> (IV)	எஃகு	'be strong'
<i>emcu</i> (IV)	எஞ்சு	'remain'
<i>eṭu</i> (III)	எடு	'take, adduce'
<i>eṇṇu</i> (IV)	எண்ணு	'think, consider'
<i>eṇṇu</i> (IV)	எண்ணு	'count'
<i>etir</i> (II)	எதிர்	'face, oppose'
<i>ey</i> (I)	எய்	'shoot'
<i>ey</i> (I)	எய்	'suffer'
<i>eytu</i> (IV)	எய்து	'get, obtain'
<i>eri</i> (II)	எரி	'burn, be inflamed'
<i>eḷu</i> (II)	எழு	'rise'
<i>eḷutu</i> (IV)	எழுது	'write, draw'
<i>eḷḷu</i> (IV)	எள்ளு	'belittle'
<i>eRRu</i> (IV)	எற்று	'overcome, remove'
<i>eRi</i> (II)	எறி	'throw, punish'
<i>en</i> (I)	என்	'say'
<i>eeekkaRu</i> (I)	ஏக்கறு	'lament, stay humbly'
<i>eeuku</i> (IV)	ஏகு	'pass'
<i>eemku</i> (IV)	ஏங்கு	'languish'
<i>eettu</i> (IV)	ஏத்து	'extol'
<i>eemtu</i> (IV)	ஏந்து	'bear, rise'
<i>eemaa</i> (III)	ஏமா	'protect'
<i>eemaar</i> (III)	ஏமாள்	'preserve'
<i>eer</i> (III)	ஏர்	'resemble, be like'
<i>eel</i> (I)	ஏல்	'be suitable, accept'

<i>eevu</i> (IV)	ஏவு	'direct, command'
<i>eeRu</i> (IV)	ஏறு	'ascend'
<i>o</i> (III)	ஒ	'resemble, be fit'
<i>oṭṭu</i> (IV)	ஒட்டு	'agree' adhere'
<i>oṭumku</i> (IV)	ஒடுங்கு	'conceal'
<i>oruvu</i> (IV)	ஒருவு	'remove, renounce'
<i>olku</i> (IV)	ஒல்கு	'loose, wither'
<i>ollu</i> (IV)	ஒல்லு	'be possible'
<i>ollu</i> (IV)	ஒல்லு	'join'
<i>oli</i> (III)	ஒளி	'sound'
<i>ovvu</i> (IV)	ஒவ்வு	'resemble'
<i>oḷi</i> (II)	ஒழி	'cease'
<i>oḷuku</i> (IV)	ஒழுகு	'behave'
<i>oḷuku</i> (IV)	ஒழுகு	'flow'
<i>oḷi</i> (II)	ஒளி	'hide'
<i>oRku</i> (IV)	ஒற்கு	'be idle'
<i>oRRu</i> (IV)	ஒற்று	'touch'
<i>oRRu</i> (IV)	ஒற்று	'spy'
<i>oRu</i> (III)	ஒறு	'punish'
<i>onRu</i> (IV)	ஒன்று	'unite, join'
<i>ooccu</i> (IV)	ஒச்சு	'throw'
<i>ooṭu</i> (IV)	ஒடு	'run'
<i>ootu</i> (IV)	ஒது	'read, recite'
<i>oompu</i> (IV)	ஓம்பு	'cherish'
<i>oompu</i> (IV)	ஓம்பு	'cease'

<i>oor</i> (II)	ஓர்	'consider'
<i>oovu</i> (IV)	ஓவு	'cease'
<i>kaṭi</i> (II)	கடி	'renounce'
<i>kaṭu</i> (III)	கடு	'doubt'
<i>kaṭu</i> (III)	கடு	'exceed'
<i>kaṭuku</i> (IV)	கடுகு	'decrease'
<i>kaṇ</i> (I)	கண்	'see'
<i>kaṇṇooṭu</i> (IV)	கண்ணோடு	'sympathise'
<i>kara</i> (II)	கர	'conceal, hide'
<i>karutu</i> (IV)	கருது	'consider'
<i>karai</i> (II)	கரை	'weep'
